PROMPTNESS OF FIRST PAYMENT
OF
WORKER'S COMPENSATION
1980

STATE OF WISCONSIN

DEPARTMENT OF

INDUSTRY, LABOR & HUMAN RELATIONS

WORKER'S COMPENSATION DIVISION

STAT. RELEASE NO. 3898

JANUARY 1982

State of Wisconsin \ Department of Industry, Labor and Human Relations

WORKER'S COMPENSATION DIVISION

201 E. Washington Avenue
P.O. Box 7901
Madison, Wisconsin 53707

TO: All Insurance Carriers and Self-Insureds

FROM: K. Sue Mattka, Administrator
Worker's Compensation Division

RE: Annual Report on Promptness of First Payment.

The 1980 rate of prompt first payments is well below the 80% standard expected by the Department. The rate improved slightly from 77.1% in 1980 to 78.3% in the first three quarters of 1981. It is encouraging to see the exemplary improvement in the private self-insured employer rate from 79% in 1980 to 85.3% in 1981. My congratulations to the employers responsible for improving promptness performance.

Insurance companies' performance needs a sharp turnaround to bring the promptness ratio into the acceptable range. Many of the companies, who in past years would not allow their performance to go below 90%, are now found in the 70-79% range.

I recommend that all insurers and self-insurers who are below 80%, particularily those who never were substandard before, to study their procedures, determine what has caused this lamentable decline, and get their companies' rates back where they belong.

There has been no effort to rank insurers and self-insurers by size or performance for this report because of the later publication date of the report. The lateness of the report is due, in part, to reorganization and insurance record conversion from a manual to a computer system. A more detailed report will be published in 1982 with attention to trends by groups and by individual insurers and self-insurers.

PROMPTNESS OF FIRST PAYMENT
1980

Promptness of first payment data prior to 1980 have been based on the date the first report of injury was received by the Department. The cases included for any given period were cases that were reported in that period. This method always required considerable lag time to wait for the receipt of the first supplementary report from the insurer or self-insurer. When promptness data were summarized at any later period, the figures changed because additional WC-13's had been tabulated. (The first WC-13 filed by the insurer or self-insurer reporting payment information is our data source.)

Beginning in 1980, the promptness data are based on the dates the first WC-13's filed for claims were received, regardless of when the injury had been reported. Therefore, the 1980 statistics may include work injuries reported during 1980 or anytime prior to 1980, and the 1981 statistics may include work injuries reported 1981 or anytime prior to 1981.

A decrease in the promptness percentage was expected when this change in procedure was made. However, the drop in the prompt rate from 82.7% in 1979 to 77.1% in 1980 was greater than expected. The self-insurers rate did not vary significantly from 1979 to 1980, but the insurance companies rate plunged from 82.8% in 1979 to 76.4% in 1980. Insurance companies made a slight improvement in the first nine months in 1981. The private self-insurers improved dramatically during this same period.

The promptness percentages and number of cases for 1980 and for January-September 1981 are:

1980	Total No. of Cases	No. of Prompt Cases	Percent Prompt
All (Excluding State of Wisconsin)	50,647	39,060	77.1
Insurance Companies	43,290	33,091	76.4
All Self-Insurers (Excluding State of Wisconsin)	7,357	5,969	81.1
Private	6,109	4,824	79.0
Municipal	1,248	1,145	91.8
1981 (Jan.-Sept.)			
All (Excluding State of Wisconsin)	39,047	30,589	78.3
Insurance Companies	33,662	25,907	77.0
All Self-Insurers (Excluding State of Wisconsin)	5,385	4,682	87.0
Private	4,152	3,541	85.3
Municipal	1,233	1,141	92.5

Various performance measurements may be used to evaluate insurance companies' and self-insured employers' compliance with Wisconsin's Worker's Compensation Act. Prompt first payment has been selected because it has proved to be a reliable indicator of overall performance.

The department has monitored first payment performance continuously beginning in 1921. Insurers and self-insurers have been asked for an accounting of continued poor performance as a result of the annual promptness reports. In 1979, all substandard performers were asked to complete a survey. The survey questions were designed to highlight areas which needed improvement. An analysis of the results of this survey follows.

In July 1981, representatives from 10 insurance companies with continuing poor prompt pay records and poor correspondence performance were called in for a special training seminar. These companies will be monitored closely in 1982 and improvements will be expected.

The 1980 promptness includes the percentages for January-September 1981 as well as percentages for 1980. The listing is in alphabetical order by insurance company and self-insured employer. There are no ranking tables in this report.

ANALYSIS OF PROMPTNESS OF FIRST PAYMENT MONITORING

After two years of decline, 1979 brought a marked improvement in insurers' making first payments of indemnity in timely fashion. First payments recorded in the 1977 and 1978 experience were well below the standard of 80% mailed within 14 days of the injured's last day at work, and the performance was declining. The improvement of 1979 showed that the trend can be reversed.

Worker's Compensation Division has monitored first payment performance since 1921, either by correspondence or by personal visits. Insurers and self-insurers are asked to explain why they cannot maintain an acceptable level of performance of delivering 80% of the first payments on time. In 1979, reminder letters and procedural questionnaires were sent to insurers and self-insurers whose performance did not meet the 80% standard.

To evaluate the response, experience of the first six months of 1980 was compared to experience of the first six months of 1981. The first six months of 1980 represent a fairly long period just prior to the mailing of the reminders; the first six months of 1981 provides as nearly comparable a period as possible in the current economic conditions, and allows several months for the insurers to examine their practices and procedures and make changes. T-tests and Fisher-Irwin Exact tests were applied to ascertain whether the changes in Promptness Percentages are significant or due merely to chance or unmeasured factors. Changes were counted significant at the .10 or lower levels.

Several noteworthy positive results were achieved, especially as regards the self-insurers (except the State of Wisconsin). In the first half of 1981, these employers as a group improved to 87.2% of all first payments mailed within 14 days, from a level of 78.9% prompt in the first half of 1980.

A group of 20 self-insurers was identified as having individual Promptness Ratings below 80% in the first half of 1980. Taken as a group, these employers had an aggregate rating lower than that of the group of 76 poor-performing insurance companies. The group of self-insurers improved to an aggregate rating of 85.5%, much better than the group of insurance companies. The later rating for this group of self-insurers is better, and the degree of improvement is better than for the similar group of 76 insurance companies. A significant factor in the sharp rise in the rating of the self-insurers is the greatly improved performance of four of the larger self-insurers.

In addition, 10 insurance companies made significant improvement between the periods studies, and only six declined. The group of 76 poor-performing insurance companies did show a significant improvement in the aggregate.

Some positive events that one could have hoped for did not occur, however. Figures for the aggregate of all insurance companies still show an overall Promptness Ratio of less than 80%, with no significant increase.

Despite significant improvement, the "substandard" insurance companies show an aggregate Promptness Ratio of only 70%, up from 68.2%.

The six insurance companies whose Promptness performance deteriorated are not small. Each tends to average over 50 cases per year.

The overwhelming majority of firms, whether insurance companies or self-insurers, showed no changes.

A small group of insurance companies and another of self-insurers were found to have had substandard Promptness performance in 1979, but performance at or above 80% for the first half of 1980. These were examined separately. The insurers as a group showed no change. The insurance companies declined.

WISCONSIN CANNING & PRESERVING INDUSTRIES

Number of Likely Compensable Cases Reported to DILHR Per 1,000 Employees
12-Month Averages for Years 1945-1981

Data used in computing the ratios plotted on this graph are shown below.

Year	12-Month Averages: Estimated Employment	Cases Reported: Number	Cases Reported: Per 1,000 Employees
1945	6,758	64	9.5
1946	7,867	81	10.3
1947	10,874	66	6.1
1948	8,985	60	6.7
1949	9,544	64	6.7
1950	9,782	49	5.0
1951	11,661	65	5.6
1952	10,560	64	6.1
1953	10,947	59	5.4
1954	10,235	49	4.8
1955	9,442	46	4.9

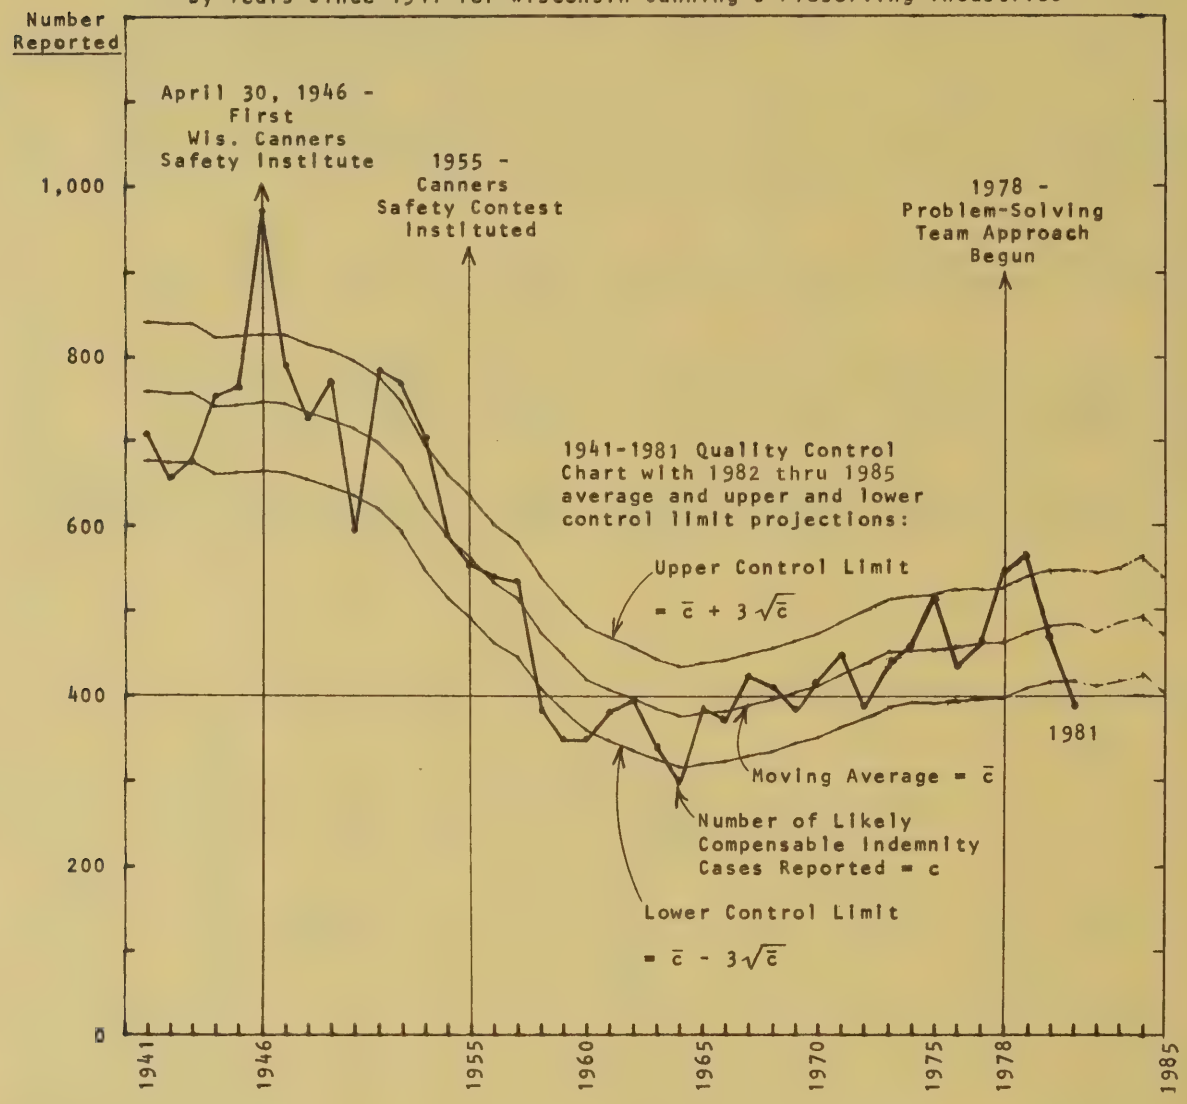
Control Chart of Likely Compensable Indemnity Cases Reported to DILHR
By Years Since 1941 for Wisconsin Canning & Preserving Industries



The signals given by the above chart indicate that some assignable cause(s) entered the system in 1978 and 1979, and again in 1981.

The chart on the cover shows the number of cases reported in relation to the annual average employment in the industry.

Re: 1981 Amendments to Worker's Compensation Act

Governor Lee Sherman Dreyfus has signed the 1981 amendments to the Wisconsin Worker's Compensation Act and the amendments were published on November 27, 1981, in the Wisconsin State Journal. Chapter 92, Laws of 1981. The benefit rates change on January 1, 1982. All other amendments are effective the date after publication.

The amendments make the maximum benefits for temporary total and permanent total disability 100% of the state's average weekly wages of June 30 of the preceding year. As of January 1, 1982, the maximum will be $269. That maximum will change each January 1 thereafter.

The weekly benefit for permanent partial disability will be $90 per week on January 1, 1982 and increase to $100 per week on January 1, 1984.

Other provisions in the amendments include the following:

1) A claim based on stress alone without physical trauma must show stress beyond that common to everyday life.

2) If an employer assists in organizing or financing a car pool or van pool, the employer is not liable for injuries incurred going to or coming from work unless there is a specific agreement for transportation on part of the contract of hire.

3) Employes of a temporary help agency may not make a claim for negligence against the employer with whom they are placed.

4) "Bad faith actions" for failure to pay compensation are made on administrative rather than on civil action remedy. The penalty is 200% of the benefits payable with a maximum of $15,000.

5) Any doctor, hospital, or health care provider shall furnish reports reasonably related to a compensation claim upon request.

6) The Department may upon reason shown, authorize an examination more than 100 miles from the employe's residence. Any necessary expenses must be paid in advance.

7) The time for filing a petition for review of an examiner's order is extended to 21 days.

8) After a pre-hearing conference an examiner may order disclosure of relevant information.

9) If there is disagreement about the continuance of temporary disability between different doctors, the Department may authorize a "tie-breaker" examination.

10) Vocational experts opinion on wage loss may be expressed in verified reports.

11) The combined benefits for Social Security and Worker's Compensation may not be less than the compensation benefits.

This is a summary of the major changes in the Act. There are additional minor changes. We will have copies of the complete revised Act as soon as publication schedules permit.

KSM/HER:dmk

HIGHLIGHTS

The number of cases reported for the canning and preserving industry dropped from 569 in 1979 to 465 in 1980 to 384 in 1981, the same number as reported in 1972 and in 1958. The 384 reported in 1981, 1972 and 1958 was not the all-time low for the 1941-1981 41-year period; the all-time low was reached in 1964 when 295 were reported. In this 41-year period, only seven other years had between 295 and 384 cases reported.

However, a new record was set for the canning and preserving industry in 1981. The average number of cases reported per month for each 1,000 workers employed dropped to a new low of 2.7. This ratio was also lower than the comparable ratio of 2.9 for all nonfarm-nonfederal employees in Wisconsin, and this was the first time the canning ratio was lower than the all nonfarm-nonfederal ratio.

Wisconsin's UC average weekly earnings rose from $129.51 in the fiscal year ending June 30, 1969 to $269.13 in the fiscal year ending June 30, 1981, for an increase of 107.8%. The U. S. consumer price index for urban wage and clerical workers, U. S. city average for all items, rose from 109.8 in calender year 1969 to 247.0 in calendar year 1981, for an increase of 125.0%. Our Wisconsin manual premium rates went up, on the average, by 87.4% between March 1, 1969 and January 1, 1982.

Between March 1, 1979 and January 1, 1982, manual premium rates for the canning and preserving industry rose as follows: canneries (code 2111x) up 51.2%, fruit preserving (code 2112) up 131.7%, fruit packing (code 2105) up 185.9%, and pickle manufacturing (code 2110) up 93.4%.

Even with these increases, latest comparable rates for the neighboring states of Michigan, Illinois, Iowa and Minnesota remain higher than Wisconsin's rates.

A small number of cases usually account for a large part of the total cost of indemnity and medical aid paid in WC cases. Out of the 414 cases first closed in 1981, the following 12 cases accounted for 35.5% of the indemnity paid, but only for 2.9% of the total number closed:

	Indemnity	
1.	$16,596	Machine operator caught hand in machine and cut hand.
2.	16,254	Forklift driver got caught in forklift being serviced and broke his hip.
3.	16,113	Farm worker jumped from tractor and it rolled on him; he received multiple injuries to his leg.
4.	15,126	Mechanic got caught in a food products machine and suffered multiple injuries to upper extremities.
5.	15,022	Laborer received a concussion when he fell on the parking lot.
6.	12,684	Mechanic received a back strain from overexertion on pulling or pushing a machine cover.
7.	12,646	Farm worker's hand amputated when caught in a picking machine.
8.	12,616	Cleaning person broke upper arm when caught in a belt conveyor.
9.	12,615	Farm worker suffered multiple injuries to forearms when tractor collided with another vehicle going the same direction on the road.
10.	11,987	Foreman fell to floor (same level) and sustained muptiple fractures.
11.	11,875	Mixing machine operator strained back lifting or lowering a case of cans or vegetables.
12.	11,626	Canning machine operator got cuts on head when struck by material from a filling machine.

Two fatal cases were reported in 1981, as compared with none in 1980 and two in 1979. One of the deaths reported in 1981 was a 46 year old woman who suffered a heart attack, and the other one was a 44 year old man who was killed when his truck overturned.

The only upward significant trend in cases reported in 1981 for any group was for laborers, except farm. 203 cases were reported in 1981 for laborers, except farm, which was higher than the 179 reported in 1980 and the 184 reported in 1979 for this group of people. Other groups generally showed the opposite trend with fewer cases reported in 1981 than in 1980 or in 1979 or in both years.

Closed and Reclosed Cases. Cases in which all issues before DILHR have been carried to a determination. A case is initially or first closed when all required reports have been filed with WC, all required payments into the work injury supplemental benefit fund have been paid, wages of less than the maximum have been verified, and all increased compensation has been paid, or an order that does or does not retain jurisdiction was resolved or mailed. A reclosed case is one which had been closed one or more previous times.

Safety Contest Firms. Companies included in the Wisconsin Canners and Freezers Association's Safety Contest Report dated January 13, 1982.

Indemnity. Cash payments made or payable under the WC Act and sick leave, holiday pay, salary and other wage continuation payments which are paid in lieu of daily or weekly indemnity, excluding payments made for medical, hospital and related expenses, and payments made out of the work injury supplemental benefit fund (except for supplemental benefits for total disability, which are included in indemnity).

How They Happened. (Accident Type) identifies the event which directly resulted in the injury or illness (ANSI Z16.2, R1969).

Struck by applies to cases in which the injury was produced by impact between the injured person and the source of injury, the motion producing the contact being primarily that of the source of injury rather than of the person.
Overexertion applies to nonimpact cases in which the injury resulted from excessive physical effort, as in lifting, pulling, pushing, wielding, or throwing the source of injury.
Struck against applies to cases in which the injury was produced by impact between the injured person and the source of injury, the motion producing the contact being primarily that of the person rather than of the source of injury, except when the motion of the person was generated in a fall. Includes cases of bumping into objects, stepping on objects, kicking objects, being pushed or thrown against objects, etc. Does not include cases of jumping from elevations.

Contact with temperature extremes applies to impact cases in which the injury consisted of a burn, heat exhaustion, freezing, frostbite, etc., resulting from contact with or exposure to hot or cold objects, air, gases, vapors or liquids. Does not apply to cases of injury from contact with the sun's rays or other radiations, or injury by the toxic or caustic characteristics of chemicals, etc.

Nature of injury. Identifies the injury and illness in terms of its principal physical characteristics (Z16.2-1962, R1969).

Burns, scalds (heat) result from the effects of contact with hot substances. Includes electric burns, but not electric shock. Excludes chemical burns, effects of radiation, sunburn, systemic disability such as heat stroke, friction burns, etc.
Average indemnity = total indemnity divided by the total number of cases closed or reclosed.
Average number of cases = total number of cases divided by the number of years (3 in this table).

Part of Body Affected. Identifies the part of the injured or ill person's body directly affected by the principal identified injury or illness (Z16.2-1962, R1969).
Back includes general or indefinite injuries to the back, vertebrae (except neck), intervertebral discs, sacrum and coccyx.
Trunk cases include back cases.

Mechanical power transmission apparatus includes all mechanical means of transmitting power (belts, chains, ropes, cables, drums, pulleys, sheaves, friction clutches, and gears) from a prime mover up to but not including a shaft (or any pulleys or gears on the shaft), the bearings of which form an integral part of a machine. Directly connected prime movers are defined as having no transmission apparatus.

Healing period is the number of days actual time lost from work, due to occupational or work injury or illness, or working life expectancy if the employe suffered permanent total disability or death, counting six days to the week.
Compensable time is the number of days for which indemnity was paid or is payable, counting six days to the week.

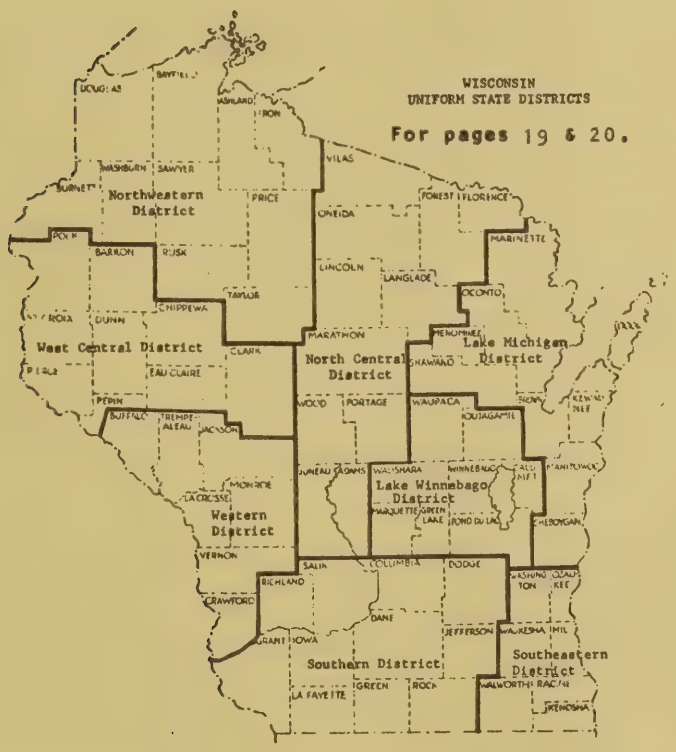
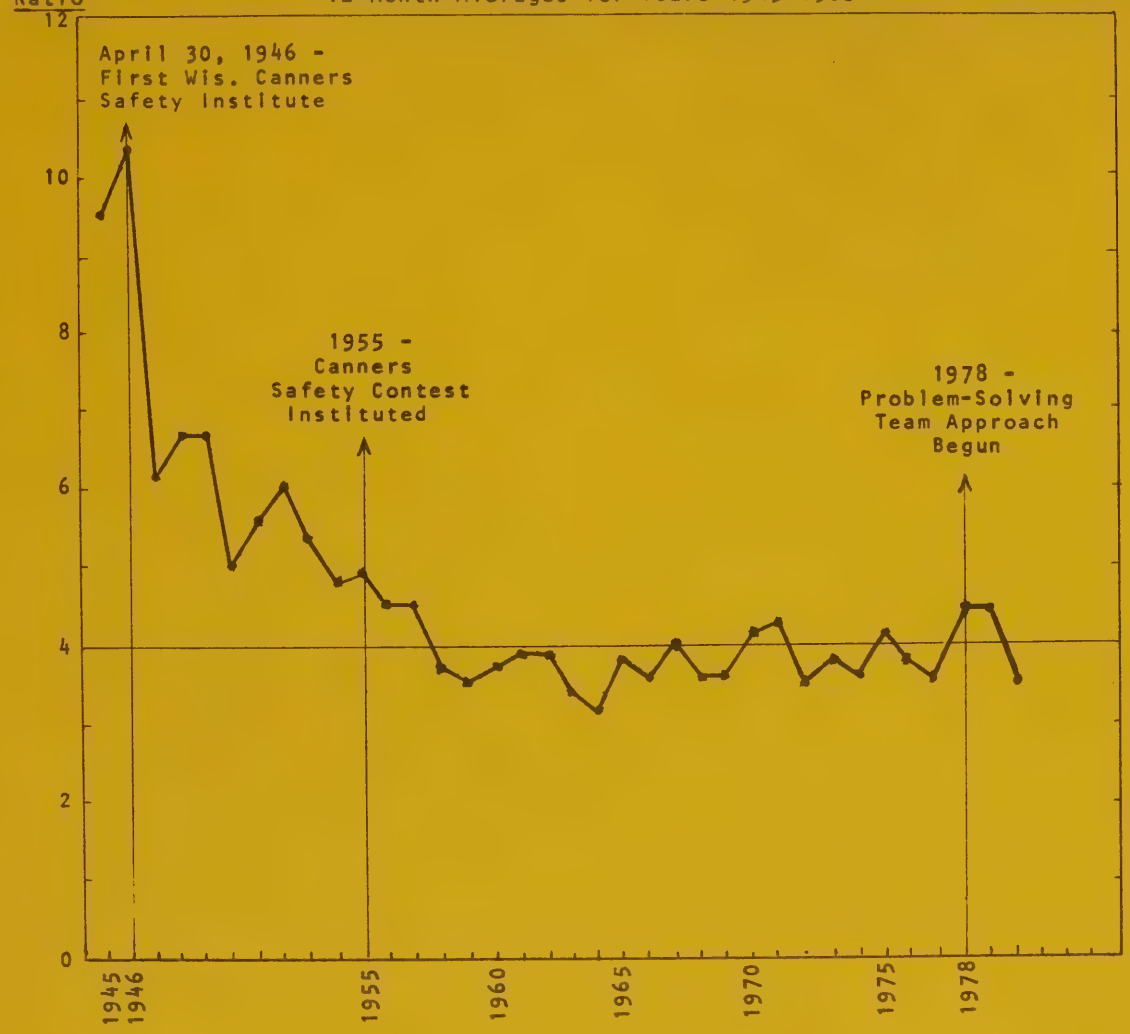
3/ Formerly Elm Tree Frozen Foods Corp.



A report like this has been prepared each year since 1946 at the request of the Wisconsin Canners and Freezers Association. The first Wisconsin Canners Safety and Training Institute, sponsored jointly in 1946 by the Wisconsin Canners Association, the Industrial Commission of Wisconsin and the Wisconsin Council of Safety, set in motion the industry's use of this report in its continuing efforts to improve the safety and health of its workers.

1980 WISCONSIN CANNING & PRESERVING INDUSTRIES

Number of Likely Compensable Cases Reported to DILHR Per 1,000 Employees
12-Month Averages for Years 1945-1980



Data used in computing the ratios plotted on this graph are shown below.

Year	12-Month Averages: Estimated Employment	Cases Reported: Number	Cases Reported: Per 1,000 Employees
1945	6,758	64	9.5
1946	7,867	81	10.3
1947	10,874	66	6.1
1948	8,985	60	6.7
1949	9,544	64	6.7
1950	9,782	49	5.0
1951	11,661	65	5.6
1952	10,560	64	6.1
1953	10,947	59	5.4
1954	10,235	49	4.8
1955	9,442	46	4.9
1956	9,902	45	4.5
1957	9,751	44	4.5
1958	8,762	32	3.7
1959	8,312	29	3.5
1960	7,777	29	3.7
1961	8,140	32	3.9

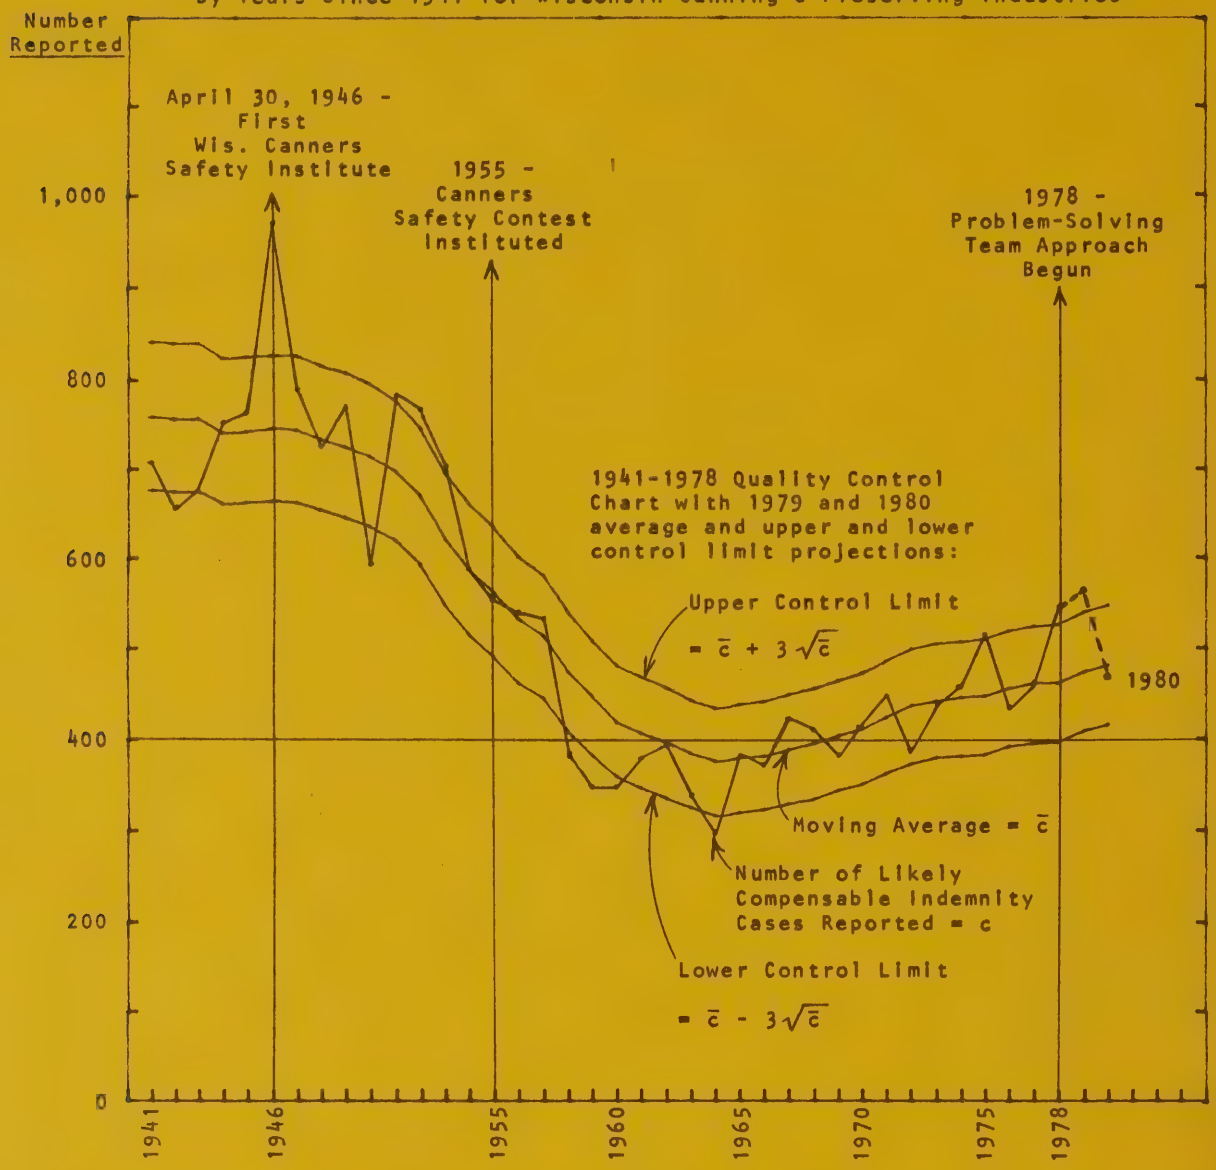
March 10, 1981

Control Chart of Likely Compensable Indemnity Cases Reported to DILHR
By Years Since 1941 for Wisconsin Canning & Preserving Industries



The signals given by the above chart indicate that some assignable cause(s) had entered the system in 1975 and again in 1978 and 1979.

The chart on the cover page shows the number of cases reported in relation to the annual average employment in the industry. Apparently higher levels of employment in 1974 and 1975, and again in 1977, 1978 and 1979 had something to do with the 1975 and 1978 and 1979 reported injury and illness figures being "out of control" in this chart.

Highlights of 1980 Changes in Wisconsin Worker's Compensation Act

(Excerpts From Memorandum From John R. Byrnes, Administrator, Worker's Compensation Division, to Employers, Insurance Carriers, and Other Interested Parties, Dated May 6, 1980)

1. 102.11 is amended to increase the maximum rate for temporary total and permanent disability from $218 per week to $233 per week.

2. 102.11 is amended to increase the maximum rate for permanent partial disability from $65 per week to $70 per week.

3. The increase in benefits for temporary total disability, permanent total disability and permanent partial disability were made retroactive for injuries occurring after January 1, 1980.

4. 102.13 relating to the obligation of employes to submit to reasonable examinations by a practitioner of the employer's choice or to submit to examinations at the direction of the Department is amended to provide that benefits may not be suspended or barred or the right to maintain proceedings for the collection of benefits suspended, if the employe refuses to submit to physical examination that requires that the employe travel 100 miles or more from the employe's residence.

5. 102.17(4) is amended to extend the statute of limitations from 10 years to 12 years for all claims.

6. 102.175 is created to give the Department authority to apportion liability for benefits between two or more injuries in accordance with the proof of the relative contribution of these injuries.

7. 102.18(1)(c) and (d) are created to provide for a tie breaking procedure where two or more examiners have conducted hearings and that are unable to agree within a range of 5% of the highest or lowest estimate of permanent partial disability made by a practitioner is presumed to be reasonable if not higher than the highest or lower than the lowest estimate in evidence.

8. 102.22 is amended to provide that the Department may order reimbursement of finance collection charges or interest resulting to an employe because of inexcusable delay in payment.

9. 102.23, 102.24, 102.25 and 102.26 are amended to make it clear that on appeal to court the Labor and Industry Review Commission and not the Department is the party in interest.

10. 102.31(1)(a) is amended to provide that the Department may by rule provide that notice of cancellation or termination of a policy be given by certified mail to the Wisconsin Compensation Rating Bureau rather than the Department with the Rating Bureau then immediately notifying the Department of the cancellation or termination.

11. 102.42(9) is amended to direct that the Department employ a specialist in rehabilitation.

12. 102.44 is amended to overcome objections raised by the Social Security Administration to the Social Security offset provisions and to make those provisions effective. We have an informal confirmation by Social Security that these amendments are acceptable.

13. 102.44(6) is created to provide that in cases of non-scheduled injury, permanent partial disability is to be determined on the basis of the physical limitations without regard to loss of earning capacity where the employe has returned to work for the same employer as at the time of injury at a wage loss of less than 15%. A good faith offer of employment refused by the employe without reasonable basis has the same effect as an actual reemployment. The claims subject to this section including those upon which an award is issued remain open for the period of the statute of limitations in the event that there is a termination of the employment or a wage loss of 15% or more occurs.

14. 102.48(1) is amended to increase the death benefits to unestranged surviving parents who are not dependent from $2,000 to $5,000.

15. 102.44, 102.52, 102.53 and 102.555 are amended to eliminate the age reduction.

16. 102.555(4) and (5) are amended to reduce the period of layoff for filing an occupational hearing loss claim from one year to 6 months and the period of time for removal from noisy employment from 2 months to 14 days.

17. 102.565 is amended to extend the benefits previously payable for nondisabling silicosis to exposure to other toxic or hazardous substances or conditions when the employe becomes susceptible to disability on further exposure to an extent where it is inadvisable for the employe to continue in that employment.

Closed Case. A closed case is an initially closed case. It is a case in which all issues before the Department of Industry, Labor and Human Relations have been carried to a determination.
Reclosed Case. A closed case which had been a closed case one or more previous times.
Indemnity. Indemnity includes cash payments made or payable under the Worker's Compensation Act, including death benefits; burial expenses; rehabilitation training expenses; payment for occupational deafness, disfigurement and nondisabling silicosis and other clinically observable abnormalities or conditions resulting from exposure in employment over a period of time to toxic or hazardous substances or conditions; sick leave, holiday pay, social security benefits, salary and other wage continuation payments which are paid in lieu of the daily or weekly indemnity; additional payments for penalties and increased compensation or death benefits; payments made into special funds created by the Act; supplemental benefits for total disability from the work injury supplemental benefit fund if they were determined to be payable prior to the time the case is initially closed; and special payments for injured inmates of state institutions, for public employes subject to the Wisconsin Retirement Act, and for employes subject to other statutes related to worker's compensation. Indemnity excludes payments made for medical, hospital and related expenses, and payments made out of the work injury supplemental benefit fund (except for the supplemental benefits for total disability mentioned previously).

Noncompensable or medical only case. A case where the worker received no worker's compensation benefits or where the worker received medical and related benefits but received no indemnity benefits. The cases in these tables are classified according to the situation at the time the case was initially closed; therefore, even though indemnity was paid at the time the case was reclosed, it was still classified as a noncompensable or medical only case.

Safety Contest Firms. Companies included in the Wisconsin Canners and Freezers Association's Safety Contest Report dated January 16, 1981.

How They Happened. (Accident Type) The accident type classification identifies the event which directly resulted in the injury or illness (ANSI Z16.2-1962, R1969).

Struck by applies to cases in which the injury was produced by impact between the injured person and the source of injury, the motion producing the contact being primarily that of the source of injury rather than of the person.

Overexertion applies to nonimpact cases in which the injury resulted from excessive physical effort, as in lifting, pulling pushing, wielding, or throwing the source of injury.

Struck against applies to cases in which the injury was produced by impact between the injured person and the source of injury, the motion producing the contact being primarily that of the person rather than of the source of injury, except when the motion of the person was generated in a fall. Includes cases of bumping into objects, stepping on objects, kicking objects, being pushed or thrown against objects, etc. Does not include cases of jumping from elevations.

Contact with temperature extremes applies only to impact cases in which the injury consisted of a burn, heat exhaustion, freezing, frostbite, etc., resulting from contact with, or exposure to hot or cold objects, air, gases, vapors or liquids. Does not apply in cases of injury from contact with the sun's rays or other radiations, or injury by the toxic or caustic characteristics of chemicals, etc.

Nature of Injury. The nature of injury classification identifies the injury and illness in terms of its principal physical characteristics (Z16.2-1962, R1969).
Burns, scalds (heat) result from the effects of contact with hot substances. Include electric burns, but not electric shock. Do not include chemical burns, effects of radiation, sunburn, systemic disability such as heat stroke, friction burns, etc.
Average indemnity = total indemnity for all three years divided by the total number of cases closed and reclosed during the three years.
Average number of cases = total number of cases for all three years divided by 3.

Part of body affected. The part of body affected classification identifies the part of the injured or ill person's body directly affected by the principal identified injury or illness (Z16.2-1962, R1969).

Back includes general or indefinite injuries to the back, injuries to the vertebrae, except neck, and injuries to the intervertebral discs, sacrum and coccyx. Back cases are also included in the trunk cases.

Not reported cases. The dramatic rise in "not reported" categories is due to the increased workload in the WC Audit Section. Because of the increased workload, some cases have been closed without certain statistical information and without receipt of the dollar amount of medical and hospital treatment and related expenses in certain cases.

Occupational Classification. The occupational classification groups included in this table are based on the 1970 Bureau of the Census 3-digit occupational system.

Operatives, except transport, include workers who operate machine or processing equipment or perform other factory-type duties (hand operations) of intermediate skill level which can be mastered in a few weeks and require only limited training. Transport equipment operatives are covered under a separate classification group.

A small number of cases usually accounts for a large part of the total cost of indemnity and medical aid paid in worker's compensation cases. The above table includes both initially closed cases and reclosed cases, but only the amount of indemnity paid.

77 cases were initially closed in 1980 with $2,000 or more each in total indemnity paid. The total indemnity for these 77 cases amounted to $515,055. A breakdown of 64 of these cases according to nature of injury follows:

- 16 cases of sprains or strains = $107,182 total and $6,699 average; 11 of these were back injuries, mostly resulting from overexertion, occurring more to laborers than any other job class; 3 cases were of the leg.
- 15 cases involving amputations of fingers or hands = $92,341 total and $6,156 average; all 15 were the result of being caught in machinery or conveyors or mechanical power transmission apparatus.
- 13 cases resulted in fractures = $52,973 total and $4,075 average; 9 cases resulted from falls.
- 10 cases resulted in torn muscles or tendons in lower leg or foot = $42,926 total and $4,293 average; 5 cases were from falls.
- 5 cases of severed muscle or tendon of fingers caught in equipment = $26,427 total and $5,285 average.
- 4 cases involved multiple injuries = $52,579 total and $13,145 average.
- Most expensive individual case amounted to $32,453; a machine operator's protruding disc resulted from falling on the same level against a shovel.

A report like this has been prepared each year since 1946 at the request of the Wisconsin Canners and Freezers Association. The first Wisconsin Canners Safety and Training Institute, sponsored jointly in 1946 by the Wisconsin Canners Association, the Industrial Commission of Wisconsin and the Wisconsin Council of Safety, set in motion the industry's use of this report in its continuing efforts to improve the safety and health of its workers.

CORRESPONDENCE/MEMORANDUM

STATE OF WISCONSIN

Date: July 21, 1980

University of Illinois at Urbana-Champaign

File Ref:

To: Insurance Carriers and Self Insurers

From: John R. Byrnes, Administrator, Worker's Compensation Division
State of Wisconsin Department of Industry, Labor and Human Relations

Subject: Promptness of First Indemnity Payments in 1979 Under Worker's Compensation Act of Wisconsin

The 1979 percent of prompt first indemnity payments is at the highest level since 1975. The promptness record for the five year period 1975 -1979 is:

	1979	1978	1977	1976	1975
All Cases	82.7%	78.1%	78.8%	80.6%	80.0%
Insurance Carriers	82.8	77.2	78.2	79.9	79.8
Self Insurers	81.8	84.0	82.9	85.8	80.8
Private	78.6	81.9	80.9	83.0	80.1
Public*	94.9	91.0	87.9	91.8	84.1

My congratulations to the insurance carriers and self insurers who maintained or significantly improved their 1979 rating.

Insurance carriers scoring 90.1 and above by size group (excluding the companies with only 1-3 cases tabulated) are:

Carriers with 50 or more cases

West Bend Mutual Insurance Company	98.9%
Mid Century Insurance Company	94.5
American Guarantee and Liability Insurance Co.	92.9
Regent Insurance Company	92.6
Employers Insurance of Wausau	92.1
General Accident, Fire & Life Assurance Corporation, Ltd.	91.3
Twin City Fire Insurance Company	91.1
General Casualty Company of Wisconsin	90.9
Hartford Accident & Indemnity Company	90.4
Reliance Insurance Company	90.2

Carriers with 25 to 49 cases

Employers Reinsurance Corporation	92.9%
Master Plumbers' Limited Mutual Liability Co.	91.1

* Excluding State of Wisconsin

Carriers with 4 to 24 cases

Assurance Company of America	100.0%
Foremost Insurance Company	100.0
Highlands Insurance Company	100.0
North American Company for Property and Casualty Insurance	100.0
Security National Insurance Company	100.0
The Travelers Indemnity Company of Rhode Island	100.0
Transport Indemnity Company	95.2
American Employers' Insurance Company	94.4
Security Insurance Company of Hartford	90.9

Please refer to attached tables for additional information.

Private self-insured employers scoring 90.1 and above by size groups (excluding the employers with only 1-3 cases tabulated) are:

Employers with 50 or more cases

K-Mart Corporation	100.0%
Wisconsin Gas Company	100.0
Oscar Mayer & Company	95.0
Mirro Aluminum Company	94.1
Milwaukee Transport Services, Inc.	93.8
Evans Products Company	93.3
Pabst Brewing Company	93.2
J. I. Case Company	92.0
Cutler-Hammer, Inc.	91.0
Beatrice Foods Company	90.8
Allis-Chalmers Corporation	90.6
General Motors Corporation	90.4

Employers with 25 to 49 cases

Caterpillar Tractor Company	96.4%
Colt Industries Operating Corp.	91.7

Employers with 4 to 24 cases

Amoco Foam Products Company	100.0
Eaton Corporation	100.0
Envirex, Inc.	100.0
Foremost McKesson, Inc.	100.0
International Harvester Company	100.0
Madison Gas & Electric Company	100.0
Northern States Power Company	100.0
Ryder Truck Lines, Inc.	100.0
Scott Paper Company	100.0
Seven-Up Bottling Company of Oshkosh, Inc.	100.0
Western Electric Company, Inc.	100.0
Aunt Nellie's Foods, Inc.	95.2
Chrysler Outboard Corporation	92.5
Dresser Industries, Inc.	90.5

Public exempt employers scoring 90.1% and above are:

Employers with 50 or more cases

City of Madison	100.0%
Milwaukee Public Schools	100.0
City of Milwaukee	99.7
Milwaukee County	93.7

Employers with 25 to 49 cases

Dane County	100.0%

Employers with 4 to 24 cases

Chippewa County	100.0%
Waupaca County	100.0

Insurance carriers which had a poor promptness record in 1979 will receive a claims handling checklist with this memo to help them assess their claims handling procedures. I would like these companies to comment on the questions asked and to let me know what problems they encountered and how they plan to alleviate them. My address is P. O. Box 7901, Madison, Wi 53707.

I have sent the claims handling checklist to the self insurers which experienced poor promptness records in 1979 in previous correspondence.

A prompt first payment is one in which the time lag between the last day on which the injured or ill employee worked and the date on which the insurance carrier or the self-insured employer sent or delivered the first indemnity payment to the injured or ill employee was 14 days or less. Cases in which salary was continued are also considered prompt. Some of the larger public self insurers continue salary payments during temporary disability. This practice brings up the promptness ratio. because salary payments are considered prompt first payments.
A self-insured employer is a subject employer exempt from insuring all or part of his liability as provided by the Worker's Compensation Act of Wisconsin. Injury cases protected by excess insurance are classified with self-insured employers.

The attachments to this memo are:

Tables 1A and 1B which rank insurance carriers and self-insurers by promptness record by size of company in terms of number of cases tabulated.

The Index is an alphabetic list of the insurance carriers and self insurers and their percent of promptness for 1979.

Promptness checklist for insurance companies which had more than three cases tabulated and had less than 80.0% prompt first payments.

In 1977, the former administrator of the Worker's Compensation Division asked 66 insurance conpanies and 13 self-insurers which had pay lag rates of between 3.0% and 77.3% to report on their claims handling procedures and to find ways to improve their performance. The acceptable level of performance is 80.0%.

Sixteen of the 66 insurers and ten of the 13 self-insurers raised their performance levels in 1979 into the 80.0% to 96.4% range. All of these carriers and employers are to be commended on their improved payment delivery systems. They are:

Insurance Carriers	1979	1977
American Employers Insurance Company	94.4%	65.8%
Master Plumbers' Limited Mutual Liability Co.	91.1	62.9
Twin City Fire Insurance Company	91.1	69.4
Security Insurance Company of Hartford	90.9	51.7
Liberty Mutual Insurance Company	86.2	77.3
Vigiland Insurance Company	85.7	72.4
The Ohio Casualty Insurance Company	84.6	59.7
Continental Insurance Company	84.0	74.2
Tower Insurance Company. Inc.	83.7	70.6
Threshermen's Mutual Insurance Company	83.5	70.3
Maryland Casualty Company	82.3	71.9
Atlantic Mutual Insurance Company	81.5	69.9
American Universal Insurance Company	80.9	76.6
St Paul Fire & Marine Insurance Company	80.3	65.1
Transport Insurance Company	80.2	76.3
The North River Insurance Company	80.0	72.6
Self Insured Employers		
Caterpillar Tractor Company	96.4%	77.1%
J. I. Case Company	92.0	72.0
Colt Industries Operating Corp.	91.7	69.1
General Motors Corporation	90.4	50.3
A. O. Smith Corporation	87.2	70.4
Sears, Roebuck & Company	84.4	76.3
Borden, Inc.	84.4	76.3
Armour & Company	82.5	67.1
American Hospital Supply Corp.	81.7	71.8
Consolidated Freightways Corp. of Delaware	80.0	76.6

The following insurance carriers have improved their performance measurement significantly in the last half of 1979 and are expected to continue the upward trend in 1980.

	Last Half 1979	1977
Bituminous Fire and Marine Insurance Company	90.4%	69.6%
Aetna Insurance Company	83.7	69.4
Shelby Mutual Insurance Company of Shelby, Ohio	82.1	78.6
United States Fidelity & Guaranty Company	83.8	70.8
Fireman's Fund Insurance Company	80.0	74.0
Lumbermen's Underwriters Alliance	85.0	40.8
Universal Underwriters Insurance Company	88.9	54.3
Milwaukee Mutual Insurance Company	80.1	54.2
Transcontinental Insurance Company	83.3	71.8
West American Insurance Company	84.2	75.0
National Surety Corp.	81.3	65.6

The remaining 40 insurance carriers did not achieve a noteworthy improvement. However, several of these insurers have been making efforts to improve their systems of payment deliveries. Their efforts should become more apparent in 1980.

The department's monitoring program for carriers and exempt employers will be continued on a quarterly basis. However, individual reports to companies will be discontinued. Companies which continue to have poor records will be contacted. Performance rates will be available on request. If profiles of your injury claims could help isolate problems that are hampering your efforts to improve your benefit delivery systems, they are available under certain circumstances. Please direct specific data requests to Ruth Wilson, P. O. Box 7946, Madison, Wi 53707. Telephone No. 608-266-0317.

Attach.

John R. Byrnes

RE: Annual Report on Promptness of First Payment

In the attached tables you will find your company's record of promptness of first payment for 1978. This record, in effect, is a report card on compliance with the provision of Wisconsin law requiring timely payment of worker's compensation benefits after an injury is reported.

Prompt payment is extremely important for several reasons. The most significant reason is to avoid uncertainty by injured employes and their families during the recuperation period. Prompt payment of benefits also reduces the likelihood of formal hearings which are time consuming and expensive for everyone involved. Some states that have experienced difficulty in requiring prompt payment have experienced astronomical increases in such litigation.

I strongly commend those who have maintained their record of 80% or higher. Those firms below 80% should seriously consider corrective measures. As you may know, Wisconsin law permits the assessment of a 10% penalty on any late penalty. The Worker's Compensation Division is presently considering substantially increasing the frequency of assessment of this penalty particularly with regard to firms that consistently fail to meet the 80% standard. Repeated failure to meet the standard can also result in possible termination or suspension of the right to write Worker's Compensation insurance or denial of Self-Insurance privileges.

This report was prepared under the supervision of Mrs. Ruth Wilson. Please direct any specific questions relating to this report to Mrs. Wilson.

A Review Of Wisconsin's Promptness Of First Payment Of Compensation Program

The Worker's Compensation Division of the Department of Industry, Labor and Human Relations is responsible for administering Wisconsin's Worker's Compensation Act. The administrative responsibilities include the following:

1. Requiring prompt payment of claims for compensation.
2. Requiring prompt filing of required reports.
3. Timely and equitable handling of disputes.
4. Restoration of injured employees to gainful employment.
5. Determination of whether injuries are caused by safety violations.
6. Determination of employer's insurance coverage or self-insured status.
7. Determination of penalties when employers or insurers do not meet their obligations under the Act.

Various performance measurements are used to monitor the activities listed above. The prompt first payment has been selected to measure insurers' and self insurers' performance because it has proved to be a reliable indicator of overall performance. The State of Wisconsin has collected and reported promptness of first payment data since 1921.

Data beginning with 1975 are not comparable with data prior to that time. Since 1975, the first Supplementary Report on Accidents and Industrial Diseases received by the department provides the data used to measure promptness of first payment. The number of days for a prompt payment was changed from fifteen to fourteen as well. Section 102.43 therefore actually requires that the first payment is due the eleventh day after the injury.

However the definition of a prompt first payment for the purpose of this report is as follows:

> A prompt first indemnity payment is one in which the time lag between the last day on which the injured or ill employee worked* and the date on which the insurance carrier or the self insurer sent or delivered the first indemnity payment to the injured or ill employee was 14 days or less. Cases in which salary was continued are also considered prompt.

The department has set a standard of 80% prompt payments as an acceptable measure of performance. It is recognized that not all claims can be paid within 14 days. In a statistical report of this type, no attempt can be made to determine if reasons for late payments are justifiable or not. If it did, the standard would probably be 95% or higher rather than 80%. All insurance companies and self insureds are measured mathematically with the same rules applying to all cases.

A mailing of individual reports to claims handlers and corporate officers on a regular quarterly basis is being implemented. The timing of these reports has not been stabilized as yet because of administrative and procedural changes in collecting worker's compensation claims data. A start has been made in 1979. In 1980, the individual reports should be mailed within two months after the end of the quarter. The annual summary report will be published in July and a rating of carriers and self insurers will be included in the annual report. Progress, plateaus and regression will be noted.

Promptness Of First Payment Of Compensation During 1978

The current series of annual promptness reports began in 1975. A brief summary of the percentage of prompt first payments record for the last four years is:

	1978	1977	1976	1975
All Cases	78.1%	78.8%	80.6%	80.0%
Insurance Carriers	77.2	78.2	79.9	79.8
Self Insurers	84.0	82.9	85.8	80.8
Private	81.9	80.9	83.0	80.1
Public	91.0	87.9	91.8	84.1

The standard of 80% prompt first payments was met for all carriers and self-insurers combined in 1975 and 1976 but dropped downward in 1977 and 1978. Insurance carriers as a group have been below 80% for the entire four year period. The downward trend continued in 1978 while self insured employers improved their performance from 1977 to 1978. The 78.1% of prompt first payments means that 10,321 injured employees did not receive their payment on time.

Congratulations to the insurance carriers and self insurers listed below who made their first payments promptly at least 90% of the time.

Insurance carriers by size groups, excluding 1 to 3 case size groups are:

<u>Companies with 50 or more cases</u>	
West Bend Mutual Insurance Company	97.6%
Reliance Insurance Company	93.1
<u>Companies with 25 to 49 cases</u>	
Employers Reinsurance Corporation	92.3%
<u>Companies with 4 to 24 cases</u>	
Phoenix Assurance Company of New York	100.0%
Westfield Insurance Company	100.0
City Insurance Company	90.9

Private self insurers by size groups are:

<u>Employers with 50 or more cases</u>	
Wisconsin Gas Company	100.0%
Mirro Aluminum Company	95.2

Milwaukee Transport Services, Inc.	95.1
Oscar Mayer And Company	94.6
Falk Corporation	93.8
Ampco Pittsburgh Corporation	92.5
Allis Chalmers Corporation	92.0
Briggs And Stratton Corporation	91.5
Cutler-Hammer, Inc.	91.4
Beloit Corporation	91.3

Employers with 25 to 49 cases

Rockwell International Corporation	96.0%
Amsted Industries Incorporated	95.9
Conner Forest Industries	95.4
K-Mart Corporation	95.1
Consolidated Freightways Corporation of Delaware	90.7
C-E Morgan Building Products, Inc.	90.3

Employers with 4 to 24 cases

Deere And Company	100.0%
International Harvester Company	100.0
Madison Gas And Electric Company	100.0
Northern States Power Company	100.0
Siemens-Allis, Inc.	100.0
Vulcan Materials Company	100.0
Jackson County Iron Company	92.3
Wisconsin Power And Light Company	92.3
Seven-Up Bottling Co. Of Oshkosh, Inc.	90.9
Eaton Corporation	90.0
Grey Iron Foundry, Inc.	90.0
The Mead Corporation	90.0

Public self insurers by size groups are:

Employers with 50 or more cases

Milwaukee Public Schools	98.4%
Milwaukee, City of	96.0
Milwaukee County	91.8
Madison, City of	91.4

Employers with 25-49 cases

Dane County	100.0%

Employers with 4 to 24 cases

Kenosha County	100.0%
Waupaca County	100.0

The employers and insurance companies listed above handled approximately 8% of the worker's compensation cases in 1978. An additional 47% of the cases were handled by employers and companies who were in the 80.0 to 89.9 percentile range. They have also done a good

job. The remaining 45% of the cases were handled by insurance companies and self insurers who were in the ranges listed below:

70.0 - 79.9%	22.0%
60.0 - 69.9	14.5
50.0 - 59.9	6.3
40.0 - 49.9	1.3
0.0 - 39.9	Less than 1%

Insurance companies and self insured employers who handled significant numbers of cases and did not have good first payment records in 1977 were contacted by the department last year after publication of the 1977 Promptness Report. All of the companies and employers contacted were very concerned about improving their performance. The department will continue to monitor these records. However, significant improvement cannot be expected in the 1978 report but some changes should be noted as the quarterly reports are issued for 1979 and 1980.

Please see Tables 480.78 and 480.77A beginning on page 5 for the 1978 rankings within groups by number of cases.

* Usually the date of disability.

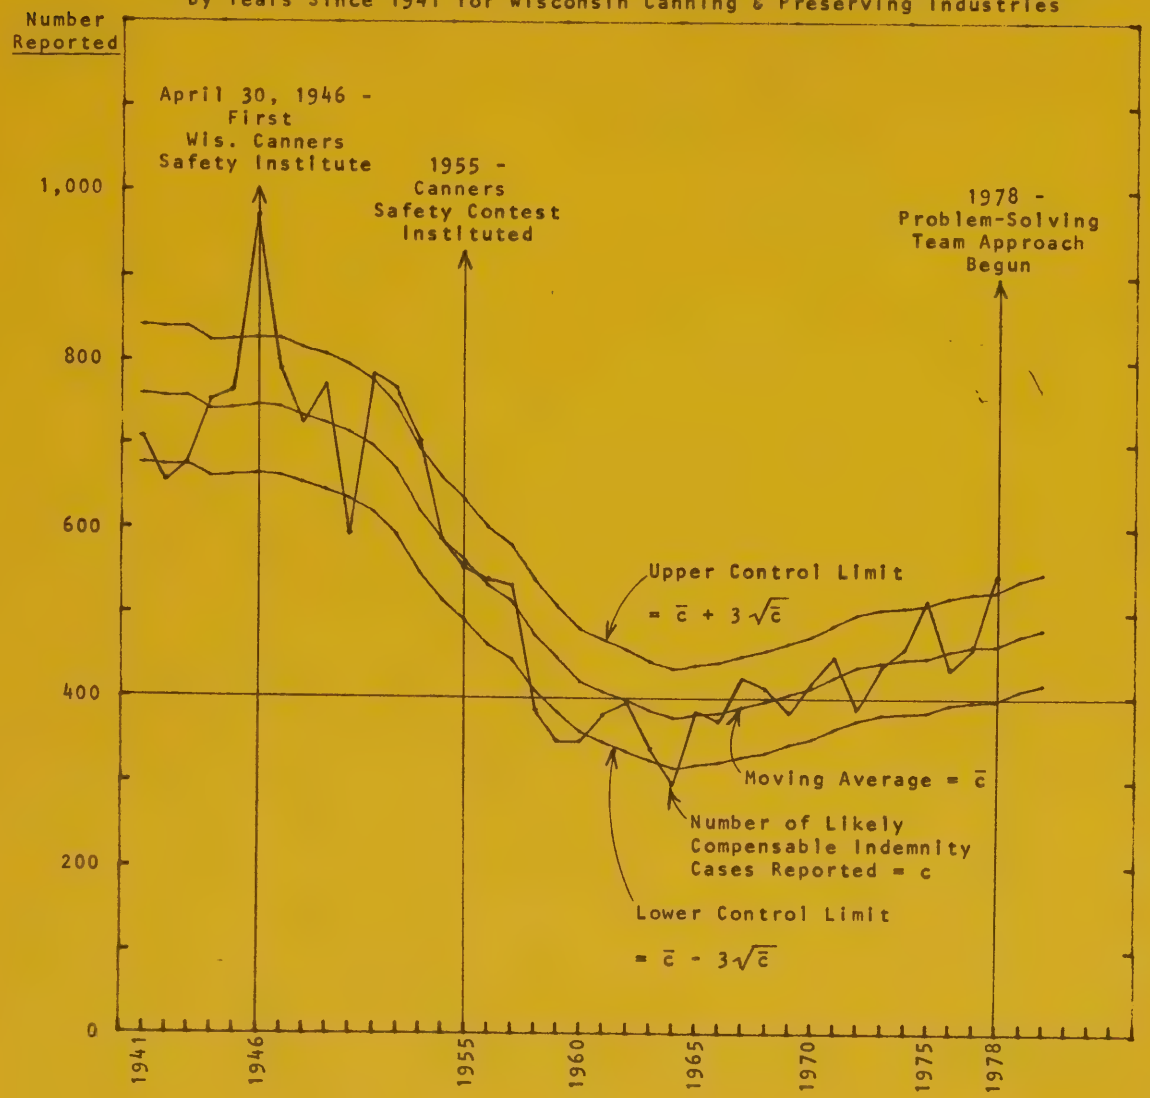
1978 WISCONSIN CANNING & PRESERVING INDUSTRIES

Control Chart of Likely Compensable Indemnity Cases Reported to DILHR
By Years Since 1941 for Wisconsin Canning & Preserving Industries



The signals given by this chart for 1975 and 1978 should be taken most seriously as a strong warning indicator that some assignable cause has entered the system so far as work injuries and illnesses are concerned.

The chart on the next page shows the same information in relation to the annual average employment in the industry. Apparently higher levels of employment in 1974 and 1975 and again in 1977 and 1978 had something to do with the 1975 and 1978 reported injury and illness figures being "out of control" in this chart.

Almost half of the employers included in this study reported more cases in 1978 than in 1977.

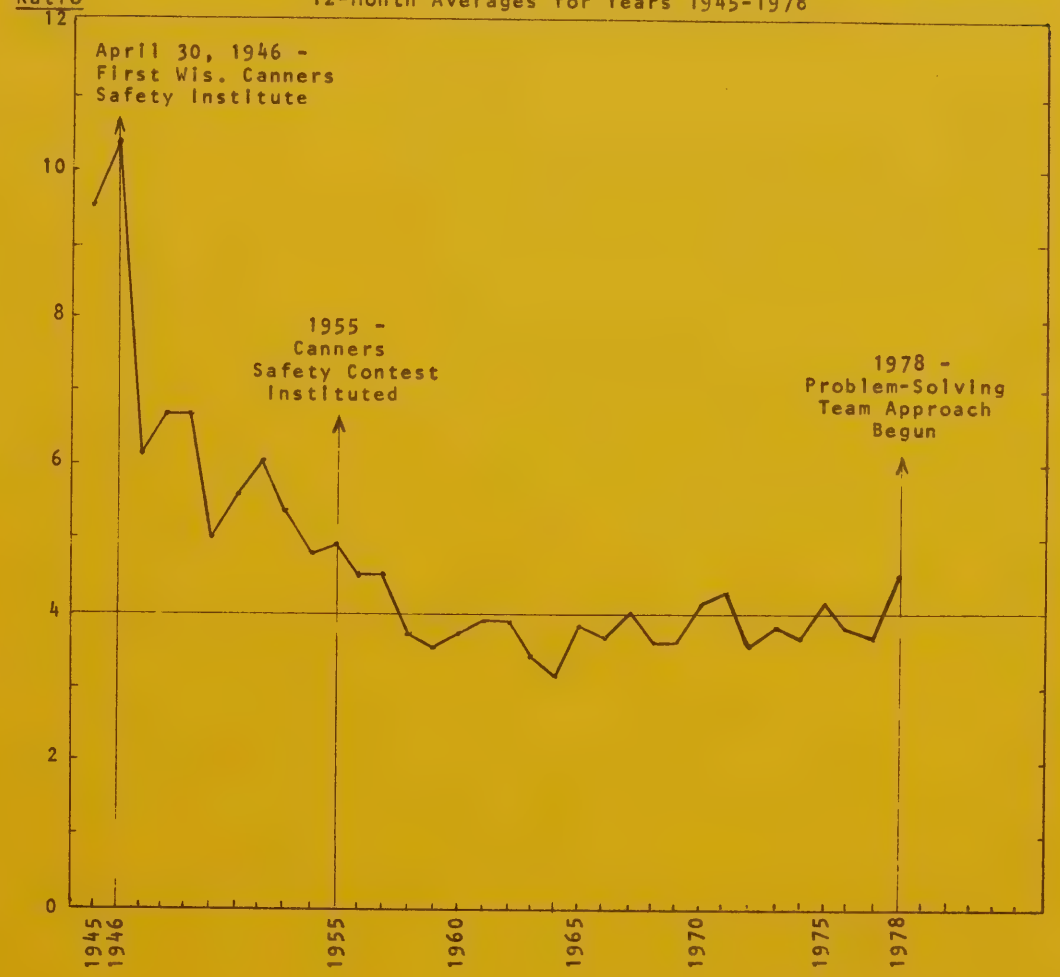
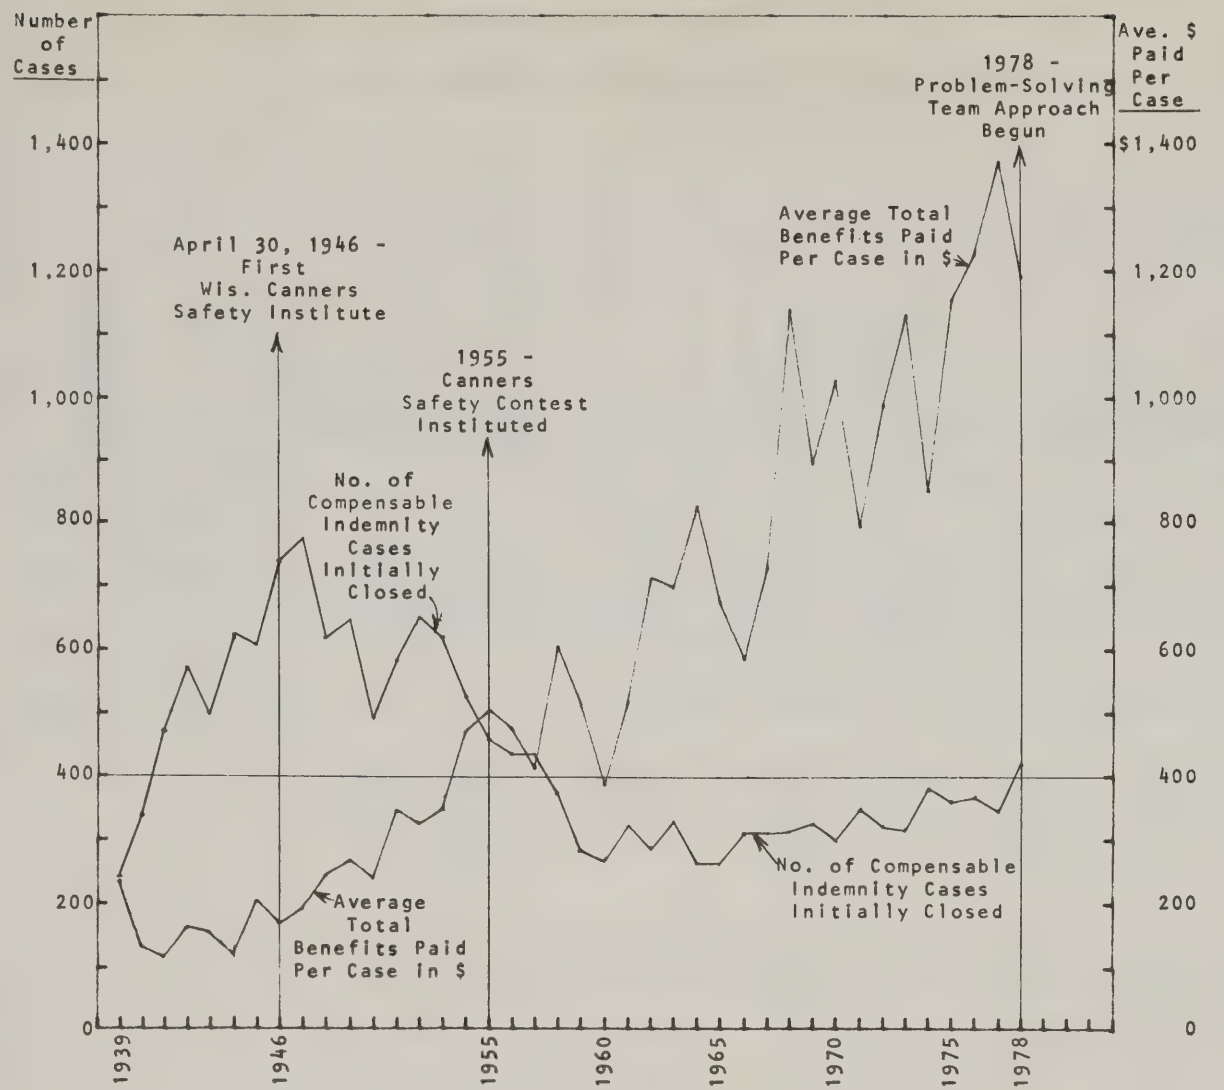
Wisconsin Canning & Preserving Industries
Number of Likely Compensable Cases Reported to DILHR Per 1,000 Employees
12-Month Averages for Years 1945-1978



Data used in computing the ratios plotted on on this graph are shown below.

Year	12-Month Averages: Estimated Employment	Cases Reported: Number	Cases Reported: Per 1,000 Employees
1945	6,758	64	9.5
1946	7,867	81	10.3
1947	10,874	66	6.1
1948	8,985	60	6.7
1949	9,544	64	6.7
1950	9,782	49	5.0
1951	11,661	65	5.6
1952	10,560	64	6.1
1953	10,947	59	5.4
1954	10,235	49	4.8
1955	9,442	46	4.9
1956	9,902	45	4.5
1957	9,751	44	4.5
1958	8,762	32	3.7
1959	8,312	29	3.5
1960	7,777	29	3.7
1961	8,140	32	3.9
1962	8,446	33	3.9
1963	8,179	28	3.4
1964	8,132	25	3.1
1965	8,429	32	3.8
1966	8,724	31	3.6
1967	8,784	35	4.0
1968	9,477	34	3.6
1969	8,915	32	3.6
1970	8,566	35	4.1
1971	8,509	37	4.3
1972	9,031	32	3.5
1973	9,439	36	3.8
1974	10,668	38	3.6
1975	10,548	43	4.1
1976	9,511	36	3.8
1977	10,610	38	3.6
1978	10,055	45	4.5

Trend In the Number and Average Primary Indemnity and Medical Costs Of Compensable Indemnity Cases Initially Closed Under the W. C. Law In the Canning & Preserving Industries Since 1939



This graph shows that the number of compensable indemnity cases initially closed has been rising slowly during the last 18 years, while the average amount of benefits paid per case has been rising dramatically faster.

The total amount and average amount of indemnity and medical costs for compensable indemnity cases closed since 1939 are shown on page 5.

Changes in manual premium rates since 1942 for four canning and preserving classifications are shown on page 6. Comparable rates for Wisconsin and the neighboring states for the latest effective dates follow:

		2111x	2112	2105	2110
Wis.	7/1/78	$3.93	$2.10	$2.39	$2.83
Ill.	9/77	3.68	4.45	2.82	3.15
Mich.	12/77	9.12	7.06	6.03	7.28
Minn.	4/78	5.36	6.65	3.12	8.27
Iowa	7/1/78	4.32	2.35	2.44	3.03

The source for the above figures and the rates shown on page 6 is the Wisconsin Compensation Rating Bureau. Inherent classificational and other differences should be analyzed before drawing inferences from the above manual premium rates.

A report like this has been prepared since 1946 at the request of the Wisconsin Canners and Freezers Association. In 1946 the first Wisconsin Canners Safety Institute was sponsored jointly by the Wisconsin Canners Association, the Industrial Commission of Wisconsin and the Wisconsin Council of Safety. The first safety institute set in motion the industries' continuing efforts to improve safety and health.

(C) Includes 1 case reclosed with increased compensation of $19.94.
(D) Includes 2 cases reclosed with increased compensation of $17.57.
(E) Includes 5 cases reclosed with increased compensation of $1,129.05 (1 case was reclosed twice in 1974).
(F) Includes 1 case reclosed with increased compensation of $35.73.
(G) Includes 2 cases reclosed with increased compensation of $1,674.10.

Safety Violations In Compensable Indemnity Cases Closed

In 1978, there were 10 injury cases with a total of 20 employer violations. The total amount of extra indemnity paid was $5,284.72.

Safety violations included the following:

Wis. Stats. 101.11 Employer's duty to furnish safe employment and place
Wis. Adm. Code Ind. 1910.212 Machinery and Machinery Guarding General Requirements
1910.219 Mechanical Power Transmission Apparatus
1910.133 Personal Protective Equipment - Eye and Face Protection
1.35 Rolls, Wheels and Brushes

No child labor delay payment or decrease (employee) violation cases were closed in 1978.

Listed below are descriptions of 10 work injuries involving safety violations.

Employee was using a water pressure hose to clean the underside of the feed chain of a carrot crowner machine. The side guards had been removed and the machine was in operation. The man's hand was caught between the chain and gear causing amputation to the first joint of the little finger and lacerations to other fingers. Safety Violation Ind 1910.212 and Section 101.11, Wis. Stats.

The tip of the thumb was cut off when employee's hand was caught in the machine. Safety violations Ind 1910.219 and Section 101.11, Wis. Stats.

Employee was putting flour in the flour sifter on molding machine. The flour sifter was running. Employee patted the flour down. Her fingers were caught in the sifter. Two fingers on the left hand were lacerated and pinched. Safety violations Ind 1910.212 and Section 101.11, Wis. Stats.

Employee noticed an onion was not lined properly on the trimming machine. She reached to straighten it. Her hand came in contact with the knives. The first and second fingers of the left hand were lacerated. Safety violations Ind 1910.212 and Section 101.11, Wis. Stats.

Employee climbed on the thermoscrew machine to clean it with the water hose. His hand slipped into the machine. The hand was caught between the side of the tank and the paddle. He received a deep cut to the left hand middle finger. Safety violations Ind 1910.212 and Section 101.11, Wis. Stats.

Employee was struck in both eyes when acid solution splashed out of the tank he was flushing out using a water hose causing chemical burns to the eyes. Safety violations Ind 1910.133 and Section 101.11, Wis. Stats.

Employee caught her finger in pinch point (conveyor brace and notched pulley) while she was cleaning beans out of filler pan. The resulting injury was amputation to the distal joint of the right index finger. Safety violations Ind 1910.219 and Section 101.11, Wis. Stats.

Employee started beet grading machine. An excess of mud, roots and weeds were jamming the topping rollers. The rollers caught his gloved hand and drew it into the rollers. The crushing and tearing injury resulted in the hand being amputated. Safety violations Ind 1.35 and Section 101,06, Wis. Stats.

Employee reached hand into area of chain drive for the waste conveyor auger to remove a corn cob. The hand was caught in the bottom sprocket and chain. Finger tip of the middle finger of the right hand was cut off. Safety violations Ind 1910.219 and Section 101.11, Wis. Stats.

Employee was trying to unplug the chute of the bean filler machine. The filler barrel was revolving and her finger was caught at the shear point on the guard of the gear and shaft that drives the filler crushing the right little finger. Safety violations Ind 1910.212 and Section 101.11, Wis. Stats.

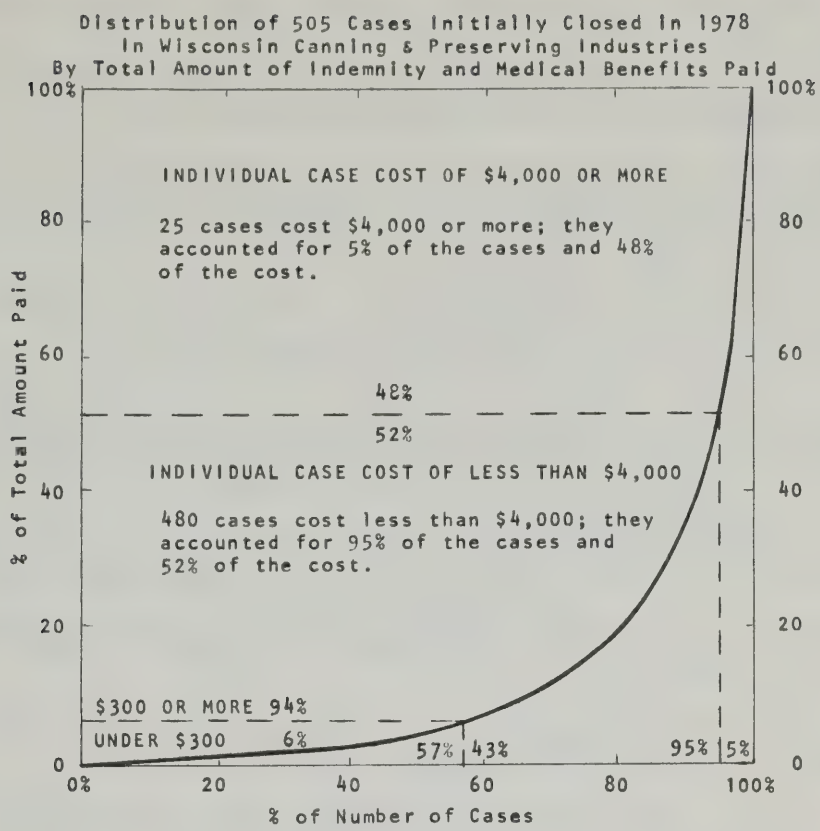
* Increased workload in 1978 in Worker's Compensation Division required the closing of temporary disability cases with less than three weeks lost time without waiting for medical information.



A small number of cases usually account for a large part of the total cost of indemnity and medical aid paid.

Profile of Most Significant Broad Accident Type in the 25 Cases
Initially Closed In 1978 Where The Amount Of Indemnity And Medical Benefits Paid
Was $4,000 Or More

Most Significiant Broad Accident Type: Caught In, On, Under or Between Things: 10 cases (40.0%), Cost $99,707 (45.5%).

Detailed Major Accident Type: Caught In, On, Under or Between Mechanical Apparatus or Parts, 9 cases (36.0%), $89,385 (40.8%).

Major Source: Machines, 7 cases (28.0%), $77,462 (35.4%).

Predominant Natures Of Injury: Amputations, 6 cases (25.0%), $68,981 (31.5%).

Predominant Parts Of Body: Fingers, 7 cases (28.0%), $45,001 (20.5%).

Predominant Occupations: Machine Operatives, 4 cases (16.0%), $28,930 (13.2%).
Laborers, 3 Cases (12.0%), $22,264 (10.2%).

Sex and Age: Male, 9 cases (36.0%), $95,691 (43.7%). 20-44, 4 cases (16.0%), $67,939 (31.0%). 45-60, 5 cases (20.0%), $27,752 (12.7%). Female, 1 case (4.0%), $4,019 (1.8%). Under 20, 1 case (4.0%), $4.019 (1.8%).

Southern District: Safety Violation Involved: Ind. 1.35 and Section 101.06, Wisconsin Statutes, 1 case $36,477 (16.7%).
Ind. 1910.212 and Section 101.11, Wisconsin Statutes, 1 case $4,648 (2.1%).
Ind. 1910.219 and Section 101.11, Wisconsin Statutes, 1 case $4,016 (1.8%).

Applicable OSHA Standards: 1910.212 General requirements for all machines. 1910.219 Mechanical power transmission apparatus.

Comments: The frequency and severity of these accidents might be decreased if (a) careful attention were given to guarding all points of operation on canning machinery, (b) specific guarding standards for cutting machines, canning machinery and agricultural machinery were developed and (c) performance standards were practiced such as always using lock-out devices when repairing or unjamming machinery.

Brief Descriptions of 25 Significant Individual Cases Costing $4,000 or More

The 25 cases described below include 5 temporary disability cases and 20 permanent partial disability cases. The narrative of these cases has been prepared from the first reports of injury and subsequent reports filed with the Department for each case.

Employee's hand was caught between the chain and gear of a carrot crowner machine when he attempted to clean the chain with a water pressure hose. The machine was in operation. Three fingers of the left hand were lacerated resulting in permanent loss of motion as well as amputation to the first joint of the little finger. The amount of indemnity and medical aid was $4,648. Time lost was 19 days.

Employee was working on the husker inspection belt. He reached for a cob that was stuck in the husker roller. His left hand was caught in the rollers. The fingers of his left hand were fractured and lacerated resulting in permanent loss of use of the middle finger. The amount of indemnity and medical aid was $6,008. Time lost was 12 weeks and 4 days.

When the employee was removing a high pressure hose at the quick disconnect assembly the valve broke. The valve and the assembly bounced off the hose hanger and struck the employee in the face causing a fracture to the jaw and severe facial lacerations. The amount of indemnity and medical aid paid was $4,499. Time lost was 21 weeks and 4 days.

Production worker was standing on tiptoe to pull a frozen food bin out. As she was reaching up and pulling it, something snapped just to the left of the midline at the craniocervical junction. The injury has resulted in permanent limitation of motion in the back and neck. The amount of indemnity and medical aid was $7,726. Time lost was 44 weeks and 4 days.

Employee was reaching and lost balance - fell against retort crate striking right shoulder. His right shoulder was dislocated causing permanent injury. The amount of indemnity and medical aid was $12,760. Time lost was 30 weeks.

Employee stumbled as he was walking around front corner of the viner by the feeder. He grabbed the feeder for support and caught his hand between feeder chain fingers and feeder platform. The amount of indemnity and medical aid was $6,489. Lost time was 4 weeks.

Employee was cleaning belt from blower on corn slab. He put his left hand under the belt to remove a corn husk. His arm was pulled into the belt end roll. The severe lacerations to the arm resulted in permanent injury. The amount of indemnity and medical aid was $7,867. Time lost was 14 weeks and 3 days.

Route salesman had to climb a ladder to fasten a canvas over freezer door after loading truck. The ladder tipped and employee fell into an excavation head first. The fall caused back sprain, severe bruises and cuts resulting in permanent back injury. The amount of indemnity and medical aid was $6,321. Lost time was 7 weeks.

Pea combine driver was standing on the engine cleaning the flight chain. The combine and his boots were wet. He slipped and fell. The impact of the fall crushed the vertebrae in his neck. The amount of indemnity and medical aid was $14,352. Time lost was 35 weeks.

Employee started the beet grading machine. An excess of mud, roots and weeds were jamming the topping rollers. The rollers caught his gloved hand and drew it into the rollers. The crushing and tearing injury resulted in the hand being amputated. The amount of indemnity and medical aid was $36,477. Time lost was 75 weeks.

Employee lost balance when attempting to stop an overflow of beans from the bean grader. His right hand was caught in the bean sprocket causing extensive lacerations to the index, middle and ring fingers. The amount of indemnity and medical aid was $8,566. Time lost was 14 weeks and 4 days.

Employee stepped down on a wood pallet. His left foot slid between two boards. He twisted his left ankle which resulted in permanent injury. The amount of indemnity and medical aid was $10,362. Time lost was 26 weeks and 3 days.

Employee twisted left knee as he was moving pallets. The injury caused permanent injury to the knee. The amount of indemnity and medical aid was $4,647. Time lost was 15 weeks.

Employee was packing 5 gallon pails with pickles when a full pail fell and hit her in the leg. Her leg was badly bruised. The amount of indemnity and medical aid was $9,195.

Employee was walking in the main hallway. She slipped on wet floor bruising her knee resulting in permanent injury to the knee. The amount of indemnity and medical aid was $5,268. Lost time was 17 weeks and 4 days.

Truck driver struck the right rear duals of a gas truck that failed to yield from a side road. The employees injuries included 4 cracked ribs and cracked vertebrae in upper spine area. Total amount of indemnity and medical aid $20,977. Time lost was 17 weeks and 4 days.

Employee's hand was caught in a combine. His index finger was amputated at the distal joint. Other fingers were lacerated. The amount of indemnity and medical aid was $7,388. Time lost was 27 weeks and 3 days.

Employee incurred a back injury when he was handling pallet boxes. The amount of indemnity and medical aid paid was $6,489. Time lost was 31 weeks and 3 days.

Employee was trying to unplug corn picker while the machine was running. His hand was pulled in crushing the index and middle fingers of the left hand resulting in amputation of parts of both fingers. The amount of indemnity and medical aid was $7,886. Time lost was 14 weeks and 3 days.

Employee opened dock door and fell from the dock to the ground. The injury was a broken left elbow and forearm. The amount of indemnity and medical aid was $6,343. Time lost was 45 weeks and 2 days.

Employee slipped on soapy water in the laundry room. Her left arm was broken above the wrist and her face was cut above the left eye. The amount of indemnity and medical aid was $7,858. Time lost was 9 weeks and 3 days.

Employee was cleaning beans out of filler pan. Her finger was caught in pinch point between the conveyor brace and notched pulley. Her right index finger was amputated at the distal joint. The amount of indemnity and medical aid was $4,016. Time lost was 23 weeks and 5 days.

Employee was placing covers on can filler machine. He was lifting boxes of covers onto the cart when he felt something crack in his back. The amount of indemnity and medical aid was $4,100. Time lost was 9 weeks and two days.

Inhalation of dust caused edema in the pleural cavities. The amount of indemnity and medical aid was compromised at $4,000. Time lost is unknown.

Statutory Wage And Payment Changes
1970-1979

Effective Date	1-1-79	1-1-78	1-1-77	1-1-76	1-1-75	1-1-74	1-1-72	2-1-70

Wisconsin Department of Industry, Labor and Human Relations

P L E A S E N O T E

The first report of injury form was revised October 1977. A copy of the form faces this page. Insurance carriers should furnish copies of the new form to their covered employers and tell them to destroy all first report forms. If insurance carriers print their own forms, they should follow the same format and request the same information. Self-insurers should be using the revised form and destroy all old forms. Forms printed before October 1977 are obsolete. The address given on the forms is no longer in use. The department has had new post office boxes for over a year. However, mail is still being addressed to the old box numbers. The use of the old numbers results in delays and possible loss of reports.

All mail to the Worker's Compensation Division should be addressed as follows:

Worker's Compensation Division
P. O. Box 7901
Madison, WI 53707

EMPLOYER'S FIRST REPORT OF INJURY OR DISEASE

WC-12 (R. 10/77)

PRINT OR TYPE

THE STATE OF WISCONSIN
Department of Industry, Labor and Human Relations
WORKER'S COMPENSATION DIVISION
Box 7901, Madison, Wisconsin 53707

Employer must submit one copy to the Department of Industry, Labor and Human Relations on the **fourth** day after employe leaves work if disability still continues. In death cases, report must be made within twenty-four hours. In case of permanent disability, or where disability beyond the three day waiting period is certain to result, make a report at once. A report is not required unless disability extends beyond 3 days.

Promptness Of First Payment Of Compensation During 1977

The promptness of first payment of worker's compensation is a performance measurement of insurance carriers and self-insured employers. The percent of injured or ill workers receiving their first compensation payment promptly is calculated for each carrier and self-insurer. A prompt first indemnity payment is one in which the time lag between the last day worked and the date on which the insurance carrier or elf-insured sent or delivered the first indemnity payment to the injured or ill employee is 14 days or less. Cases in which salary was continued are also considered prompt.

Prior to 1975, payments made in 15 days or less were prompt payments and cases where salary was continued were not included. The source for promptness information was changed from the promptness card completed by the injured employee to the worker's compensation supplementary report form filed by the insurance carrier or self-insurer with the department.

The annual record by groups for the three year period is:

Percent Of Promptness

	1977	1976	1975
All Cases	78.8	80.6	80.0
Insurance Carriers	78.2	79.9	79.8
Self-Insurers	82.9	85.8	80.8
Private	80.9	83.0	80.1
Public	87.9	91.8	84.1

The total percent of prompt first payment for all cases fell to a 3 year low in 1977. The insurance carriers' total ranking shows an almost identical decrease. While the self-insured employers, private and public, did not maintain the good record achieved in 1976, their percent ranking remains signficantly better than the insurance carriers. Private self-insurers achieved commendable improvement in 1976 from 1975. However in 1977 they have slipped back to the 1975 level. The group record of the public self-insurers is very good even though the 1977 percent of promptness dropped several points. The record of the Milwaukee area public employers determines the group record of the public self-insurers because of the large number of cases they handle and their salary continuation policy.

Congratulations to the self-insurers and insurance carriers who maintained their exemplary rating or significantly improved their 1977 rating.

The public employers scoring 90.1 and above in the 50 or more cases group are:

Milwaukee, City of	97.3
Milwaukee Public Schools	96.2
Milwaukee County	90.4

The City of Kenosha achieved a score of 96.0 and is the only employer in the 25 to 49 cases group to rate above 90.1%. Four employers in the 4-24 cases group had promptness of first payment percentages of 100%.

Eleven private self-insurers scored 90.1 and above in the 50 or more cases group. They are:

Allis Chalmers Corporation	98.3
Wisconsin Gas Company	96.6
Ampco Pittsburgh Corporation	96.5
Milwaukee Transport Services	94.5
Oscar Mayer And Company, Inc.	94.3
The Anaconda Company	93.2
Beloit Corporation	92.3
American Can Company	90.8
Mirro Aluminum Company	90.8
Connor Forest Industries	90.1

Four private self-insurers achieved a ranking of 90.1% and above in the 25-to-49 cases group. They are:

Rexnord Inc.	97.2
Falk Corporation	95.6
Abex Corporation	93.1
Amsted Industries Incorporated	90.5

Eleven employers in the 4-24 cases group and twelve employers in the 1-3 cases group had promptness of first payment percentages of 90.1% and above.

Please see Table 480.77A beginning on page 10 for the rankings within groups and for annual promptness percentages and numbers of cases.

Only six insurance carriers in the 50 or more cases group performed at a promptness percentage level of 90.1% and over. They are:

West Bend Mutual Insurance Company	95.5
Carriers Insurance Company	94.2
Mid Century Insurance Company	93.6
Northwestern Mutual Insurance Company of Milwaukee, Wisconsin	90.4
American Guarantee And Liability Insurance Company	90.3
Reliance Insurance Company	90.1

No carriers in the 25-to-49 cases group were ranked at 90.1% and above. Five carriers in the 4-24 cases group and twenty carriers in the 1-3 cases group ranked in the 90.1 and above range.

In the insurance carriers group of 50 or more cases, seven carriers ranked in the 85.1 to 90.0% range. They are:

General Accident, Fire And Life Assurance Corporation, Limited	88.4
Lumbermen's Mutual Casualty Company	88.3
Sentry Insurance A Mutual Company	88.3
Pacific Employers Insurance Company	87.6
Employers Mutual Liability Insurance Company of Wisconsin	86.0
The Home Insurance Company	85.5
Fireman's Insurance Company of Newark, New Jersey	85.4

The six carriers with a rating of 90.1% and above can be proud of their record. This achievement is even more significant and praiseworthy when the insurance carrier trend appears to be going in the other direction. Several carriers in the group 85.1% to 90.0% used to be in the 90.1% and above range consistently. The changes in the promptness of 1st payment data collection and scoring do not account for this decline. Special note should be made of the two insurance carriers in this group which are moving upward. They are the Pacific Employers Insurance Company and The Home Insurance Company.

Twelve carriers in the 50 or more cases group ranked in the 80.1 to 85.0% range and 32 were in the 70.1 to 80.0% range. Twenty-five carriers ranked below 70.0%.

Please see Table 480.77 beginning on page 6 for the 1977 insurance company ranking within groups by number of cases. Annual percentages are also given for each company for 1975 and 1976.

An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by the Worker's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the act may carry excess insurance in accordance with regulations of the Insurance Commission without further order of The Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance care classified with exempt employers.

1/ A prompt first indemnity payment is one in which the time lag between the last day on which the injured or ill employee worked and the date on which the insurance carrier or the self-insurer sent or delivered the first indemnity payment to the injured or ill employee was 14 days or less. Cases in which salary was continued are also considered prompt.

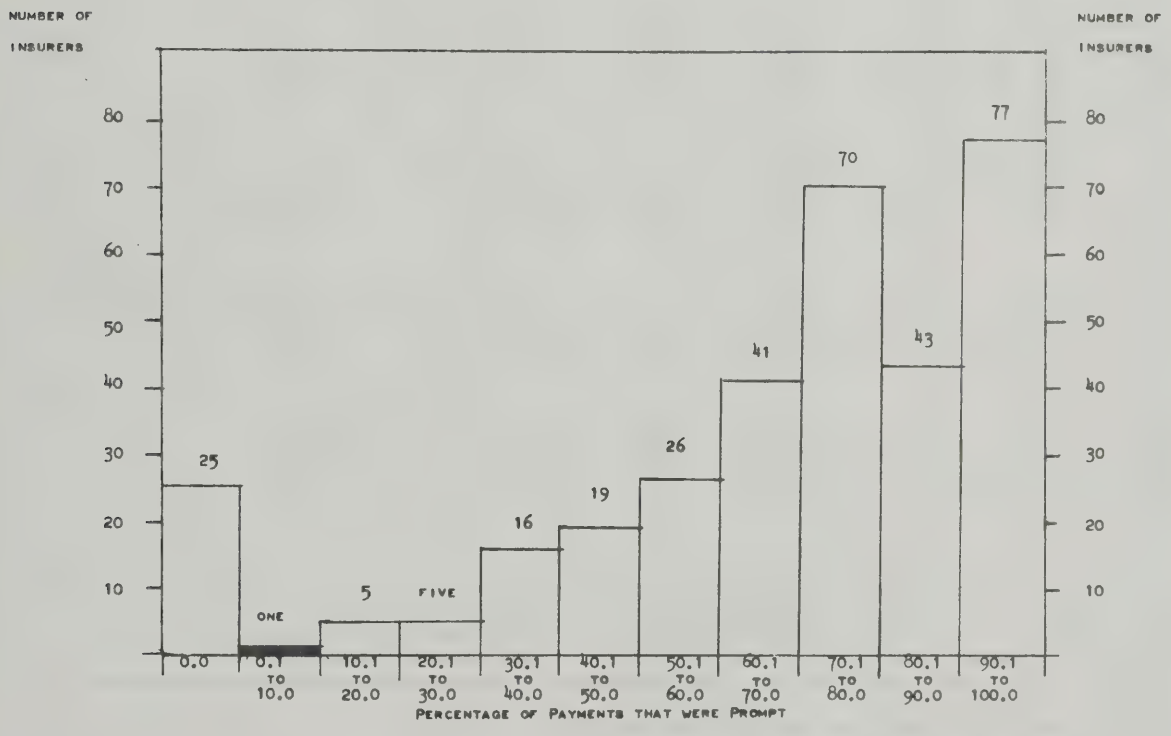
THE CHART BELOW ILLUSTRATES THE NUMBER OF INSURANCE CARRIERS AND SELF-INSURERS WHO MADE A GIVEN PERCENTAGE OF PROMPT FIRST PAYMENT IN WORKER'S COMPENSATION CASES TABULATED IN 1977
FOR GREATER DETAIL, SEE TABLES BEGINNING ON PAGE 7



An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by the Worker's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the act may carry excess insurance in accordance with regulations of the Insurance Commission without further order of The Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance care classified with exempt employers.

Table 428.77

Cases Settled Under Section 102.22 of Wisconsin's Worker's Compensation Act, 1943 - 1977

Preliminary

Promptness Of First Payment 1978

An alpha listing of insurance carriers and self-insured employers with promptness of first payment data begins on page
The figures are preliminary and changes will occur before the annual listing is produced later in 1979. The tables are produced from the active worker's compensation case history file. First payment of compensation data will be coded from additional supplementary report forms sent to the department. Routine file mainte- is a weekly process. However, the figures should be an indicator of the trend of each insurance carrier's and self-insurer's performance as well as the general trend.

Preliminary Percent Of Promptness

January-June	1977	1978
Total	80.0%	79.5%
Insurance Carriers	79.2	78.6
Self-Insurers	84.8	85.5
Private	82.5	83.6
Public	94.6	91.4

If an insurance carrier or a self-insurer questions or wants to study the results of the preliminary reports, listings of the cases charged to each carrier or employer can be produced on request. If errors are found and documented the appropriate changes will be made on the case history file. However, it should be emphasized that the measure of days is from the last day worked to the date the payment was sent or delivered. Reasons for late payments do not affect the measurement regardless of their merit. This objective measurement applies to all first payment data coded.

PLEASE REPLY TO:

TO: ALL INSURANCE CARRIERS LICENSED TO WRITE WORKMEN'S COMPENSATION IN WISCONSIN, AND ALL EXEMPT EMPLOYERS IN WISCONSIN

We are very pleased that more than 8 out of every 10 first payments are made promptly and that improvement continues in the overall promptness record. We commend all insurance carriers and exempt employers who have a promptness record of 90% and above. Keep up the good work!

During the past three years, 36 insurance companies, 43 exempt private (nongovernmental) employers and 5 governmental employers had first payments in the hands of the injured man within 15 days or less after the date of the injury for 9 or more of every 10 first payments made. We wish to congratulate the insurance companies and self-insurers who continue to make prompt first payments year after year -- and especially the insurance companies who continue to do so for a large number of claims. Our congratulations also to the private exempt employers as a group for outranking the insurance carriers for the first time since promptness reports have been published.

Our historical promptness record is a positive indicator of the effectiveness of Wisconsin's Workmen's Compensation program. If other states were to initiate similar indicators showing exemplary service to injured employees, the states would be in a much better position to retain control over their own Workmen's Compensation programs rather than relinquishing control to the federal government.

We congratulate Norman Taugher in his new position as Administrator of the Workmen's Compensation Division. Norm replaced Ralph Gintz who retired April 30 of this year. We congratulate Ralph on his retirement; we hope he and his wife have many years of good fishing and enjoyable traveling.

Sincerely yours,

Philip E. Lerman

PLEASE REPLY TO:

To: ALL INSURANCE CARRIERS LICENSED TO WRITE WORKMEN'S COMPENSATION INSURANCE IN WISCONSIN, AND ALL EXEMPT EMPLOYERS IN WISCONSIN

The combined percent of promptness of insurance companies and exempt employers has reached a nine year high of 86.8 for 1972. This is one full percentage point above the 1971 figure of 85.8. Private exempt employers have exceeded this with a combined promptness percentage of 87.0. Over 69% of the exempt private employers have an exemplary promptness percentage in the 90 to 100% range for the 1970-72 period they are ranked. The marked improvement of the public exempt employers is encouraging. I hope to see a continued improvement in this area.

I direct the reader's attention to the tables in the appendix ranking all insurance carriers and exempt employers for the 1st six months of 1973. An evaluation of performance for 1973 will be made in the 1973 annual release.

Section Ind. 80.02(2) of the Wisconsin Administrative Code provides that, "Self-Insured employers and insurance companies on all accidents which require a first report must: (a) Make a supplementary report on form WC-13 on the eleventh day following that on which the accident occurred." While there has been some improvement in the filing of WC-13's, the statistical section report there are still many late promptness reports where no WC-13 has been filed.

Section Ind. 80.02(2)(b) requires that there must be a supplementary report WC-13 (other adequate notice will suffice) immediately upon stopping payment for any reason. This report must be accompanied by an explanatory memorandum, with a copy furnished to the claimant or his attorney. Some employers and insurance carriers are not complying with this statutory requirement.

The problem of insurance carrier or exempt employer identification has been outlined to you previously and I am happy to note marked improvement in this area. However, a few insurance groups continue to use the group name rather than the carrier name.

Group names should never be used for insurance carriers. When a carrier elects to use a given name for writing workmen's compensation, that name and none other should be used in communicating with the Workmen's Compensation Division or in other matters related to the particular case. Insurance groups do not remain constant and it is impossible for us to maintain records that would reflect changes each year.

Your thoughtful cooperation in observing this rule of the Commission will be very much appreciated and will result in a better administered program for all concerned.

Sincerely,

N. J. Taugher

Norman J. Taugher
Administrator

1/ Merged into Employers Commercial Union Insurance Company 2-3-72.

2/ Prior to 7/1/71 known as Hardware Mutual Casualty Company.

3/ The Travelers Insurance Company and The Travelers Indemnity Company divided into two separate companies, August 1972.

4/ Prior to March 31, 1971 known as Employers Commercial Union Insurance Company of America.

5/ Changed to Colonial Penn Franklin Insurance Company 2-9-72.

6/ Prior to 5-12-71 known as Northwestern Mutual Insurance Company.

7/ Merged into the Continental Insurance Company 2-10-71.

8/ Changed name to American Empire Insurance Company 5-26-72.

9/ Includes cases reported under the group name Royal Globe Insurance Cos. This record will not be used in future annual evaluations.

PROMPTNESS OF FIRST PAYMENT OF WORKMEN'S COMPENSATION

Promptness is measured by the percentage of prompt first payments made by insurance carriers and self-insurers to injured employees covered by the Workmen's Compensation Act. A prompt first payment must be received by an injured employee within fifteen days after commencement of disability. In practice, however, if the amount of the first payment is not sufficient but the second payment is paid by the eighteenth day, the payment is considered prompt. However, if the second payment is not paid by the eighteenth day, the time is computed from the last day worked to the second payment date and becomes a late payment.

Section 102.43 of the Workmen's Compensation Act provides: "If the injury causes disability, an indemnity shall be due as wages commencing the fourth calendar day, exclusive of Sundays only, excepting where such employes work on Sunday, after the employe leaves work as the result of the injury, and shall be payable weekly thereafter, during such disability. If the disability shall exist after ten calendar days from the date the employe leaves work as a result of the injury and only if it so exists indemnity shall also be due and payable for the first three calendar days, exclusive of Sundays only, excepting where such employes work on Sunday. * * *" The footnote reference to this portion of Section 102.43 reads as follows: "The payment to be made on the eleventh calendar day will pay for all disability to that date except where the waiting period is to be excluded because disability does not continue after ten calendar days from the date of initial disability."

An addressed self-mailer return postage paid promptness post card, a small facts pamphlet and a letter explaining the benefits provided by the Workmen's Compensation Act are sent to the injured employee. The returned promptness cards are carefully edited. Cards that are not correctly completed are discarded. In some years, more than 20% of the cards received must be rejected because of errors and omissions.

It has always been recognized that there are a number of reasons why it may be more difficult for one company to make prompt first compensation payments than for another company. Because such a large number of cases are dealt with, no attempt is made to determine whether first payments were delayed for a good cause or not. (Section 102.2 provides for 10% increased compensation if inexcusable delay in making payments is found.) It is felt that the various problems and reasons for late payments tend to balance out over the long run.

1/ An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by the Workmen's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the Act may carry excess insurance in accordance with regulations of the insurance commission without further order of the Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance are classified with exempt employers.

2/ Prior to 9/30/71 known as Rockwell Standard Company.

3/ Prior to 4/22/71 known as Eaton Yale & Town Inc.

4/ Discontinued 1/1/71.

5/ 4/1/71 Charmglow became a division of Beatrice Foods.

1/ An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by The Workmen's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the act may carry excess insurance in accordance with regulations of the Insurance Commission without further order of The Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance are classified with exempt employers.

Table 430.72

Work Injury Cases Of Individual Insurance Companies

Classified By Time Elapsed From Date Disability Commenced
To Date First Payment Of Workmen's Compensation Was Received By Injured Employee

First and Second Half 1972

Insurance Company	Period Covered	Cases With Date Of Receipt Of First Payment Reported By Injured Employee To Department Of Industry, Labor and Human Relations

A/ Cases reported in which first payment was made 15 days or less after date of disability.

1/ Name change from Employers Commercial Union Insurance Company effective January 1, 1973.

2/ Many of the cases listed for the above insurance company have been incorrectly assigned because the group insurance name has been printed in the space provided for the insurance carrier's name rather than the insurance carrier's name on the Workmen's Compensation first reports of injury. It is not practical or possible to check all first reports filed with group names for correct insurance carrier identification; the remedy for this situation is proper insurance carrier identification on the W. C. 12, first report of injury.

Canning Industry in Wisconsin

Work Injury Highlights

Work injury cases in the Canning Industry in Wisconsin were settled or disposed of during 1971 at a cost of almost $321,000 and during 1972 at a cost of over $330,000.

The total cost reported in the Department of Industry, Labor and Human Relations in 1971 was $321,049. Using the average total employment for the industry in 1971, the average cost per employee work injuries was 36.48. The total cost reported in 1972 was $330,240; the average cost per employee in 1972 was $37.54.

The above figures include medical aid and indemnity for compensable cases, compromise payments in compensable cases and medical aid reported in noncompensable cases. Not included are the additional costs such as funeral expense, insurance premiums, net cost of property damage, cost of maintenance during rehabilitation, production losses, first aid treatments, medical aid not reported in cases not covered under the Wisconsin Workmen's Compensation Act, etc. or payments made into either the Children's Additional Death Benefit Fund or the Second Injury Fund.

Compensable Settled Case Data: 1971 & 1972

1. There were 349 compensable work injury cases settled in 1971: 44 permanent partial and 305 temporary disability cases. In 1972, there were 318 compensable work injury cases settled: 1 fatal case, 49 permanent partial and 268 temporary disability cases.

2. Average indemnity increased from $507 in 1971 to $638 in 1972. Average medical aid also increased from $287 to $351. Thus, average total cost increased from $794 to $989.

3. 1971: Average weekly compensation paid in the 305 temporary disability cases was $62.14.
   1972: Average weekly compensation paid in the 268 temporary disability cases was $67.27.

4. Compensable time for the 349 cases in 1971 was 3,192½ weeks and 318 cases in 1972 was 3,467 weeks. In other words, the actual time loss paid for was the equivalent of paying 106 employees for a full year at wage equal to the amount allowable for work injuries. The average compensable time for the 44 permanent partial disability cases in 1971 and the 49 permanent partial disability cases in 1972 was 96-2/3 weeks; for the 305 temporary cases in 1971 and the 268 temporary cases in 1972, 6 weeks. The higher average in permanent partial cases suggests more severe injuries.

5. In 1971, the total healing period for the 349 cases was 1,732-5/6 weeks - the equivalent of a year's full time work for 33 workers. In 1972, the total healing period for the 318 cases was 1,863-2/3 weeks - the equivalent of a year's full time for 36 workers.

6. In 1971, there were 22 injury cases with employer violations of safety orders with a total of 49 violations. The total amount of extra indemnity paid by employers was $6,066.13. In 1972, there were 16 injury cases with employer violations with a total of 34 violations. The total amount of extra indemnity was $1,275.97.

7. In 1971, $6,066.13 was paid in extra indemnity by canning employers because of safety order violations. In 1972, canning employers paid $1,275.97 because of safety order violations.

8. Wisconsin Administrative Code Section Ind 1.18 -- Belts, Pulleys, etc. -- was held violated in 8% of the penalty cases in the two year period 1971-72. Statute 101.06 -- Employer's duty to furnish safe employment and place -- was held violated in almost 43% of the violations in the two year period 1971-72.

9. There was one violation of the Child Labor Law in 1971 in which double indemnity of $17.92 was paid. There were no Child Labor Law Violations settled in 1972. There were no decreased compensation cases settled in either 1971 or 1972.

10. Falls accounted for 21 out of every 100 work injuries in both 1971 and 1972 with $24 and $36 out of every $100 for 1971 and 1972 respectively.

11. 1971: 20 out of every 100 work injuries occurred when an employee was struck by an object, but these injuries accounted for only $6.14 out of every $100 in indemnity and medical aid. 1972: 31 out of every 100 work injuries occurred when an employee was struck by an object, these injuries accounted for over $13 out of every $100 in indemnity and medical aid.

12. 1971: Twenty out of every 100 work injuries were due to being caught in, on, under or between objects. Over $42 out of every $100 in indemnity and medical aid was payable for resultant injuries. 1972: 19 out of every 100 work injuries were due to being caught in, on, under or between objects. Over $26 out of every $100 in indemnity and medical aid was payable for resultant injuries.

13. 1971: Overexertion accounted for less than 13 out of every 100 work injuries and only $5 out of every $100 in indemnity and medical aid. 1972: Overexertion accounted for only 10 out of every 100 work injuries and $5.84 out of every $100 in indemnity and medical aid.

14. 1971: Vehicles were the source of injury in 9 out of every 100 cases and accounted for $7.50 out of every $100 in indemnity and medical aid. 1972: Vehicles were the source of injury in 8 out of every 100 cases and accounted for over $17.00 out of every $100 in indemnity and medical aid.

15. 1971: Working surfaces were the source of injury in over 18 out of every 100 cases, and accounted for $22 out of every $100 in indemnity and medical aid. 1972: Work surfaces were the source of injury in 20 out of every 100 cases and accounted for over $33 out of every $100 in indemnity and medical aid.

16. Machines and machinery were the sources of injury in over 16 out of every 100 cases in 1971 and 17 in 1972 and accounted for almost $30 out of every $100 in indemnity and medical aid in 1971 and $20 in 1972.

17. 1971: Containers were the source of injury in almost 15 out of every 100 cases in 1971 and 12 out of every 100 cases in 1972 but cost less than $8 out of every $100 in indemnity and medical aid and slightly more than $7 in 1972.

18. 1971: Hoists and conveyors were the sources of injury in only 4 work injury cases settled but each case cost an average of $2,122 in indemnity and medical aid. In 1972, hoists and conveyors were the sources of injury for 8 work injury cases, but the average cost was down to $331 in indemnity and medical aid.

19. 1971: Although only about 5 out of every 100 injured workers suffered amputations, these cases accounted for almost $18 out of every $100 in indemnity and medical aid. 1972: Again only about 5 out of every 100 injured workers suffered amputations. The cost decreased to about $10 out of every $100 in indemnity and medical aid.

20. 1971: Fractures accounted for over 14 out of every 100 injuries and over $24 out of every $100 in medical aid and indemnity. 1972: Fractures accounted for over 18 out of every 100 and cost over $41 out of every $100 in medical aid and indemnity.

21. Almost 16 out of every 100 of the injured workers suffered cuts, lacerations or abrasions both in 1971 and 1972 accounting for $5.45 out of every $100 in indemnity and medical aid in 1971 as compared with slightly over $4.00 in 1972.

22. 1971: Employees suffered injuries to the fingers in almost 18 out of every 100 cases and accounted for almost $18 out of every $100 in indemnity and medical aid. 1972: Finger injuries accounted for almost 20 out of every 100 cases with a cost of $21 out of every $100.

23. 1971: Injuries to the trunk occurred in over 23 out of every 100 cases and accounted for $26.25 out of every $100 in medical aid and indemnity. 1972: Injuries to the trunk occurred in 21 out of every 100 cases with a cost of $20 out of every $100.

24. Excluding multiple injuries, legs and arms bore the highest average cost in 1971: $1,219 and $1,106 respectively. Average cost for the classification "head, face and neck" was $617, injuries to the feet bore the highest average cost in 1972 including multiple injuries which had the average cost of $1,361. Legs and arms averaged $1,036 and $996 respectively in 1972. The average cost of injuries to the fingers was $1,028 while injuries to the head, face and neck had an average cost of $697. In 1971, the average cost for injuries to the head, face and neck was $617.

Noncompensable Cases Disposed Of

1971

There were 118 noncompensable cases disposed of during 1971. In 23 of these cases, a total of $1,483 was reported as paid in medical aid. A total of 50 working days was reported as lost.

1972

There were 72 noncompensable cases disposed of during 1972. In 7 of these cases, a total of $822 was reported as paid in medical aid. A total of 17 working days was reported as lost.

Compromise Cases Disposed Of

1971

Compromise settlements were made in 6 permanent partial cases at a cost of $41,101. Three temporary cases were settled at a cost of $3,802.

1972

Compromise settlements were made in 2 permanent partial cases at a cost of $17,041. One temporary case was settled at a cost of $759.

Explanations

Healing period = actual time lost from work, due to work injury or occupational disease, counting six days to the week.

Compensable time = number of days for which indemnity (workmen's compensation) is due and payable under the Workmen's Compensation Act of Wisconsin, counting six days to the week.

Total benefits = indemnity and medical aid paid or payable; medical aid includes estimated cost in contract cases. Excluded are payments for funeral expenses, payments to or from the Second Injury Indemnity Fund and the Children's Additional Death Benefit Fund, payments for maintenance during rehabilitation training, the cost of artificial members furnished, payments in compromise cases, additional payments in reopened cases, and the amount of medical aid payments where the injury did not cause disability beyond the waiting period of three days.

Nec = not elsewhere classified.

(A) = classification includes one permanent total disability case.

Compensable cases = all cases, except compromise cases, in which indemnity (workmen's compensation) is due and payable.

Compromise cases = all cases in which a compromise of liability under the Workmen's Compensation Act of Wisconsin is made by the employer and the employee. All compromises may be reviewed, set aside, modified or confirmed by the Wisconsin Department of Industry, Labor and Human Relations upon application of either party within one year from the date of compromise. The amount of the compromise settlement includes both indemnity and medical aid.

Noncompensable cases = cases in which no indemnity (workmen's compensation) is due or payable. Examples: no temporary disability beyond 3 days; statute of limitations bars claim; injury was either not in course of or not due to employment; claim not prosecuted by claimant; etc.

Reopened cases = cases which were settled or disposed of in prior years but were reopened because additional or lesser benefits were due. From the Foreword, Workmen's Compensation Twenty-Ninth Report: "It is the Commission's policy not to approve final settlements in cases in which no contest arises. When the Commission determines that proper benefits have been paid, the case is placed on file. If later it is discovered that additional benefits are due, the matter is reactivated and the employer or insurance carrier is required to make additional payment. Cases so handled may be reopened within six years from the date of last payment of compensation, and further benefits ordered on proper showing." Contested cases may also be reopened.

Canning Industries

Work Injuries Involving Safety Violations

Employee crawled on a raised platform to turn on a switch for one of a row of corn husking machines. He lost his balance and fell backwards into the open feeder belt gears of another machine. He stated that his right arm was caught in the unguarded gears causing injury to his arm and shoulder. Safety violation - Ind. 1.26, 180 and Section 101.06, Wisconsin Statutes.

Employee was operating a labeling machine. The belt was slipping but when he put pressure on the belt it ran. The third time he did this his finger became caught between the belt and driving wheel on the machine. The injury sustained was a loss of the distal end of the left index finger. Safety violation - Ind. 1.80, Ind. 1.18 and Section 101.06, Wisconsin Statutes.

Employee was working in the bottom of a can retort. When he finished, he rode up on the hook of a crate hoist. As he was being pulled up on the hoist, the cable broke and he fell onto the edge of the retort. The falling cable hook and pulley hit him in the head. He sustained a back injury and lacerations to the head. Safety violation - Ind. 35.31 and Section 101.06, Wisconsin Statutes.

Employee was working on a slicing machine. He was cutting peppers. The machine became plugged and as he was pushing with his right hand to attempt to clear the machine, the tips of 2 fingers were cut by the slicing head. The second finger tip was cut off. Safety violation - Ind. 1.41 and Section 101.06, Wisconsin Statutes.

PLEASE REPLY TO:

TO: ALL INSURANCE CARRIERS LICENSED TO WRITE WORKMEN'S COMPENSATION IN WISCONSIN, AND ALL EXEMPT EMPLOYERS IN WISCONSIN

Four Insurance Carriers have maintained excellent records for the past five year period, 1967-1971. We wish to congratulate Carriers Insurance Company, Iowa National Mutual Insurance Company, Northwestern National Insurance Company of Milwaukee, Wisconsin and General Casualty Company of Wisconsin.

We wish to congratulate Employers Mutual Liability Insurance Company of Wisconsin for improving their consistently good record. This company's service to injured employees is especially exemplary because of the large volume of claims handled.

Aetna Casualty and Surety Company and American Mutual Liability Insurance Company are to be congratulated for the marked improvement in their promptness records in 1971.

The improvement of Argonaut Insurance Company and Royal Indemnity Company from the 60 range to the mid 80 range in 1971 is especially noteworthy. Keep up the good work!

Our congratulations go too, to all insurance companies and exempt employers who have maintained good records or who have improved their records.

All insurance companies and exempt employers with percentages below 80% must re-examine their methods and work to improve their service to the injured workers. Promptness in paying compensation should be accepted as the only fair and equitable way of discharging your obligations.

We recommend that you make every effort to get compensation payments to injured employees promptly. Perhaps consultations with companies who seem to have solved this problem might be helpful. Injured workers should receive special consideration because not only are they not receiving a pay check, but they are also disabled.

Sincerely yours,

Philip E. Lerman

Philip E. Lerman, Chairman

John C. Zinos

John C. Zinos, Commissioner

William A. Johnson

William A. Johnson, Commissioner

PLEASE REPLY TO:

TO: ALL INSURANCE CARRIERS LICENSED TO WRITE WORKMEN'S COMPENSATION INSURANCE IN WISCONSIN, AND ALL EXEMPT EMPLOYERS IN WISCONSIN

The record of most insurance carriers and self-insurers in meeting their obligations to pay due claims is very good. The record, as measured by the combined promptness percentage of insurance companies and exempt employers, has reached an 8 year high of 85.8 in 1971 as compared with a low of 83.8 in 1970. However, the same problems with records that I have discussed in previous years in this report, have not improved.

Section Ind. 80.02(2) of the Wisconsin Administrative Code provides that, "Self-insured employers and insurance companies on all accidents which require a first report must: (a) Make a supplementary report on form WC-13 on the eleventh day following that on which the accident occurred." The Statistical Division has found, when checking promptness cards against the injured worker's file; 1. the form WC-13 is not on file after several months following receipt of the WC-12 or; 2. the WC-13 has so little information filled in that the information given on the promptness card cannot be checked.

Section Ind. 80.02(2)(b) requires that there must be a supplementary report WC-13 (other adequate notice will suffice) immediately upon stopping payment for any reason. This report must be accompanied by an explanatory memorandum, with a copy furnished to the claimant or his attorney. Some employers and insurance carriers are not complying with this statutory requirement.

The problem of identification of the carrier or exempt employer on the WC-12 and WC-13 rather than improving has become worse. The carrier name that should be used on all forms and correspondence is the name under which the carrier is licensed to write workmen's compensation insurance. Exempt employers should also identify themselves, rather than using the name of the carrier which has written excess coverage.

Again, group names should never be used for insurance carriers. When a carrier elects to use a given name for writing workmen's compensation, that name and none other should be used in communicating with the Workmen's Compensation Division or in other matters related to the particular case. Insurance groups do not remain constant and it is impossible for us to maintain records that would reflect changes each year.

Your thoughtful cooperation in observing this rule of the Commission will be very much appreciated and will result in a better administered program for all concerned.

Sincerely,

Ralph E. Gintz
Administrator

1/ Section 102.22, Workmen's Compensation Act of Wisconsin, provides: "* * * Where the employer or his insurer is guilty of inexcusable delay in making payments, the payments as to which such delay is found shall be increased by 10 per cent. Where such delay is chargeable to the employer and not to the insurer Section 102.62 shall be applicable and the relative liability of the parties shall be fixed and discharged as therein provided."

2/ Reopened case.

PROMPTNESS OF FIRST PAYMENT OF WORKMEN'S COMPENSATION

Promptness is measured by the percentage of prompt first payments made by insurance carriers and self-insurers to injured employees covered by the Workmen's Compensation Act. A prompt first payment must be received by an injured employee within fifteen days after commencement of disability. In practice, however, if the amount of the first payment is not sufficient but the second payment is paid by the eighteenth day, the payment is considered prompt. However, if the second payment is not paid by the eighteenth day, the time is computed from the last day worked to the second payment date and becomes a late payment.

Section 102.43 of the Workmen's Compensation Act provides: "If the injury causes disability, an indemnity shall be due as wages commencing the fourth calendar day, exclusive of Sundays only, excepting where such employes work on Sunday, after the employe leaves work as the result of the injury, and shall be payable weekly thereafter, during such disability. If the disability shall exist after ten calendar days from the date the employe leaves work as a result of the injury and only if it so exists indemnity shall also be due and payable for the first three calendar days, exclusive of Sundays only, excepting where such employes work on Sunday. * * *" The footnote reference to this portion of Section 102.43 reads as follows: "The payment to be made on the eleventh calendar day will pay for all disability to that date except where the waiting period is to be excluded because disability does not continue after ten calendar days from the date of initial disability."

An addressed self-mailer return postage paid promptness post card, a small facts pamphlet and a letter explaining the benefits provided by the Workmen's Compensation Act are sent to the injured employee. The returned promptness cards are carefully edited. Cards that are not correctly completed are discarded. In some years, more than 20% of the cards received must be rejected because of errors and omissions.

It has always been recognized that there are a number of reasons why it may be more difficult for one company to make prompt first compensation payments than for another company. Because such a large number of cases are dealt with, no attempt is made to determine whether first payments were delayed for a good cause or not. (Section 102.22 provides for 10% increased compensation if inexcusable delay in making payments is found.) It is felt that the various problems and reasons for late payments tend to balance out over the long run.

1/ AN EXEMPT EMPLOYER (SELF-INSURED) IS A SUBJECT EMPLOYER EXEMPTED FROM INSURING ALL OR PART OF HIS LIABILITY AS PROVIDED BY THE WORKMEN'S COMPENSATION ACT OF WISCONSIN. AN EMPLOYER WHO HAS BEEN GRANTED EXEMPTION FROM INSURING HIS RISK UNDER THE ACT MAY CARRY EXCESS INSURANCE IN ACCORDANCE WITH REGULATIONS OF THE INSURANCE COMMISSION WITHOUT FURTHER ORDER OF THE DEPARTMENT OF INDUSTRY, LABOR AND HUMAN RELATIONS. SUCH EXCESS INSURANCE IS NOT DEEMED TO BE FULL COVERAGE. INJURY CASES PROTECTED BY EXCESS INSURANCE CLASSIFIED WITH EXEMPT EMPLOYERS.

To: All Insurance Carriers Licensed To Write Workmen's Compensation In Wisconsin, and All Exempt Employers In Wisconsin

During the past five years, 3 insurance companies (of the ranked companies) have had records rated as excellent. We wish to congratulate Elac Insurance Company Limited, Carriers Insurance Company and Iowa Mutual Insurance Company for this remarkable achievement.

Northwestern National Insurance Company of Milwaukee, Wisconsin has the commendable record of maintaining first place in the rating chart for the past three years.

For their greatly improved records over the past five years, we wish to commend the Home Indemnity Company and the Great American Insurance Company. Keep up the good work.

Our congratulations go too, to all insurance companies who have maintained good records or who have improved their records.

All insurance companies and exempt employers with percentages below 80% must re-examine their methods and their consciences. Promptness in paying compensation due injured workers should be accepted as the only fair and equitable way of discharging your obligations.

The injured workers not only are out of work for a period of time, but are also disabled. The drop in income and the suffering caused by disability are hard enough on injured workers and their families. They should not be expected to wait several weeks for the money due them.

Sincerely,

Philip E. Lerman

Philip E. Lerman, Chairman

J. R. Kautzer

J. R. Kautzer, Commissioner

John C. Zinos, Commissioner

Promptness Of First Workmen's Compensation Payment

Promptness is measured by the percentage of prompt first payments made by insurance carriers and self-insurers to injured employees covered by the Workmen's Compensation Act. A prompt first payment must be received by an injured employee within fifteen days after commencement of disability. In practice, however, if the amount of the first payment is not sufficient but the second payment is paid by the eighteenth day, the payment is considered prompt. However, if the second payment is not paid by the eighteenth day, the time is computed from the last day worked to the second payment date and becomes a late payment.

Section 102.43 of the Workmen's Compensation Act provides: "If the injury causes disability, an indemnity shall be due as wages commencing the fourth calendar day, exclusive of Sundays only, excepting where such employes work on Sunday, after the employe leaves work as the result of the injury, and shall be payable weekly thereafter, during such disability. If the disability shall exist after ten calendar days from the date the employe leaves work as a result of the injury and only if it so exists indemnity shall also be due and payable for the first three calendar days, exclusive of Sundays only, excepting where such employes work on Sunday. * * *" The footnote reference to this portion of Section 102.43 reads as follows: "The payment to be made on the eleventh calendar day will pay for all disability to that date except where the waiting period is to be excluded because disability does not continue after ten calendar days from the date of initial disability."

From 1921 to 1938, Wisconsin's record of promptness was tabulated from reports of carriers and self-insurers in cases settled. The date reported by each carrier and self-insurer was taken as the date upon which payment was made. This method proved unsatisfactory. It lacked uniformity because of variance in reporting practices. DILHR many times called attention to the fact that various dates were reported as the date of payment. In some cases, the carrier or self-insurer reported the date upon which the check was made out, in others, the date upon which the check was mailed to the employer with instructions to transmit it to the employee, and in still other cases, the date upon which the check was actually mailed to the employee.

In 1937, DILHR therefore changed to the post card method of asking the injured employee to report the amount of his first compensation payment and the date on which the first payment was received by him, to obviate the previous lack of uniformity which resulted from many varying reports and varying methods used and failure to obtain date of actual receipt by the employee. In measuring the time taken to make first payments of workmen's compensation, the vital question is: "When does the injured man receive his first payment?" -- <u>not</u>, "When does somebody report that first payment has been or is being made to the injured person?"

An addressed self-mailer return postage paid promptness post card, a small facts pamphlet and a letter explaining the benefits provided by the Workmen's Compensation Act are sent in a window envelop to each injured person (except State of Wisconsin employees and those killed on the job) when his injury case is reported to DILHR. The injured person is requested to return the promptness post card to DILHR with the following information:

ST-WC-31 FIRST PAYMENT-WORKMENS COMPENSATION

DATE YOU RECEIVED FIRST PAYMENT OF COMPENSATION:

MONTH DAY YEAR

LAST DAY WORKED AFTER INJURY:

MONTH DAY YEAR

IF YOU HAVE RETURNED TO WORK, GIVE DATE:

DO NOT FOLD, SPINDLE, OR MUTILATE THIS CARD

DEI E14163 BK.

When promptness post cards are received by DILHR, they are scrutinized for omissions and corrections. Cards are rejected for the following reasons: (1) employee reported no lost time or less than four days of lost time due to the injury; (2) employee reported that salary was paid in lieu of workmen's compensation indemnity payments; (3) date of receipt of first payment was not given; (4) payment was reported as having been received on or before the last day worked; (5) date of receipt of first payment was later than date card was received by DILHR; (6) first payment was received before the check was issued; (7) the date and amount reported by the injured worker were for the second or subsequent payments, rather than for the first payment; and (8) certain cases of intermittent disability--e.g., where payment was not due for the first period of disability but became due after subsequent periods of disability. The rejected cards are filed away and not used in the tabulation.

On an average, returned postal cards account for around 70% of all of the cards mailed out each year. In some years, more than 20% of those received are rejected after careful editing. About 25% of the accepted cards are checked against supplemental forms on file for one or more reasons. Cases in which postal cards are not returned include some in which the employee has no payment coming because he returned to work by the fourth day, and, very likely, include an even larger proportion in which the employee merely neglects to send in the card. Most of the rejected cards are no lost time cases; quite a few of the rejected cards are incomplete.

It has always been recognized that there are a number of reasons why it may be more difficult for one company to make prompt first compensation payments than for another company. Because such a large number of cases are dealt with, no attempt is made to determine whether first payments were delayed for a good cause or not. (Section 102.22 provides for 10% increased compensation if inexcusable delay in making payments is found.) It is felt that the various problems and reasons for late payments tend to balance out over the long run.

MADISON, WISCONSIN 53701

To: All Insurance Carriers Licensed To Write Workmen's Compensation Insurance In Wisconsin, And All Exempt Employers In Wisconsin

The record of most insurance carriers and self-insurers in meeting their obligation to pay due claims promptly is very good. However, there are some problems relating to records and record completion that need special attention.

Section Ind 80.02(2) of the Wisconsin Administrative Code provides that, "Self-insured employers and insurance companies on all accidents which require a first report must: (a) Make a supplementary report on form WC-13 on the eleventh day following that on which the accident occurred." The Statistical Division has found, when checking promptness cards against the injured worker's file, that the form WC-13 is not on file after several months following receipt of the WC-12.

Section Ind 80.02(2)(b) requires that there must be a supplementary report WC-13 (other adequate notice will suffice) immediately upon stopping payments for any reason. This report must be accompanied by an explanatory memorandum, with a copy furnished to the claimant or his attorney. Some employers and insurance carriers are not complying with this statuatory requirement.

Another serious problem is the proper identification of the carrier or exempt employer on the W.C. 12 and the W.C. 13. The carrier name that should be used on all forms and correspondence is the name under which the carrier is licensed to write workmen's compensation insurance. Exempt employers should identify themselves, rather than using the name of the carrier which has written the excess coverage insurance.

Group names should never be used for insurance carriers. When a carrier elects to use a given name for writing workmen's compensation, that name and none other should be used in communicating with the Workmen's Compensation Division or in other matters related to the particular case. Insurance groups do not remain constant and it is impossible for us to maintain records that would reflect changes each year.

Your thoughtful cooperation in observing this rule of the Commission will be very much appreciated and will result in a better administered program for all concerned.

Sincerely,

Ralph E. Gintz
Administrator

1/ An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by The Workmen's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the act may carry exvess insurance in accordance with regulations of the Insurance Commission without further order of The Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance are classified with exempt employers.

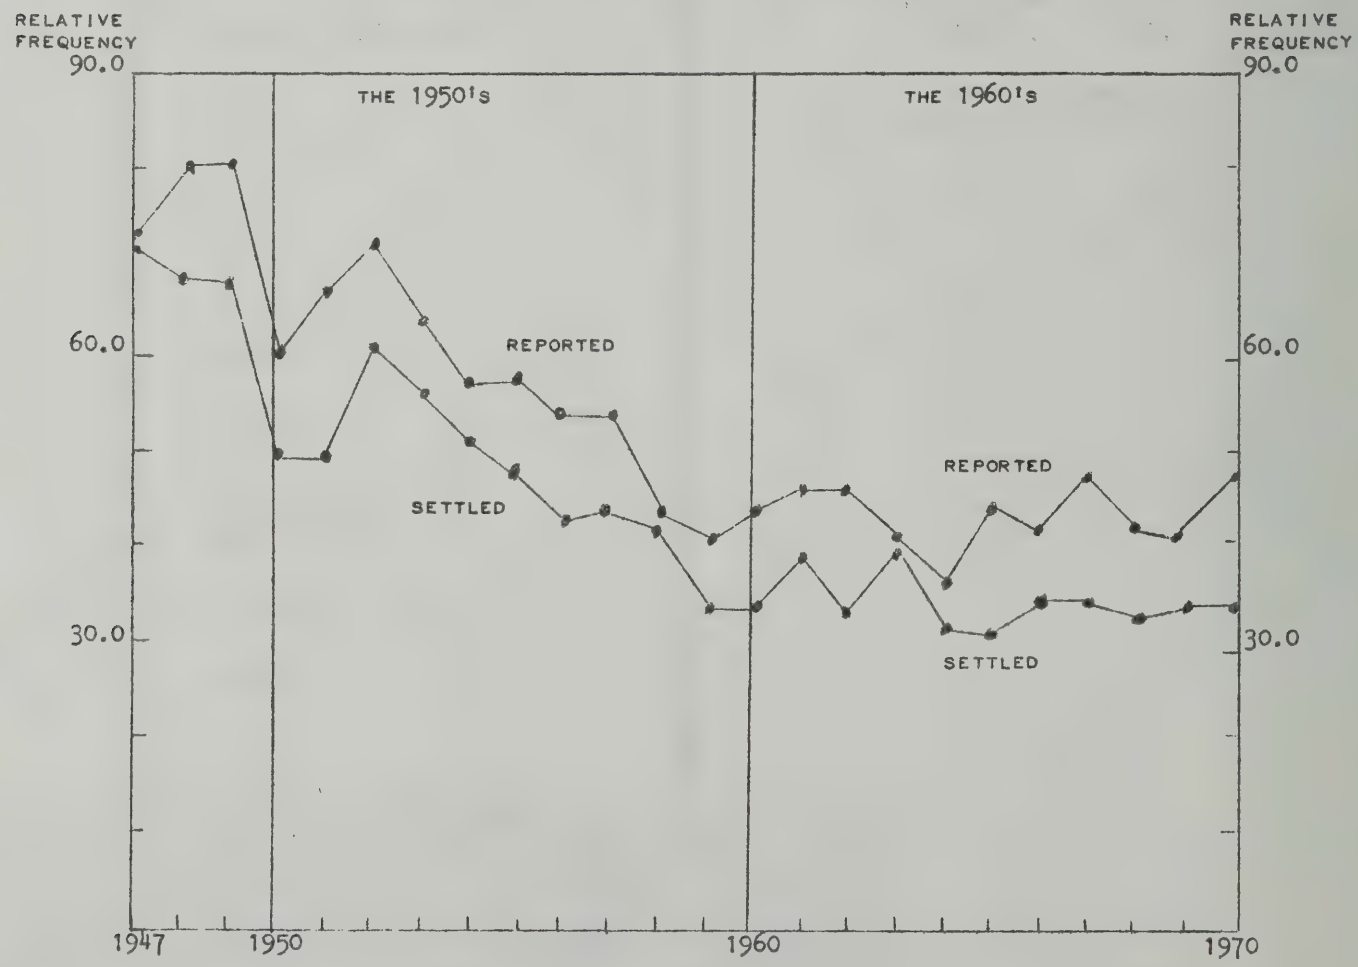
Canning Industry in Wisconsin

This report covers the experience of establishments primarily engaged in: (a) Canning fruits and vegetables, and fruit and vegetable juices; (b) manufacturing catsup and similar tomato sauces, preserves, jams; and jellies; (c) pickling and brining fruits and vegetables; (d) manufacturing salad dressings, vegetable relishes, sauces, and seasonings; (e) quick freezing and cold packing (freezing) fruits, fruit juices, vegetables and specialties; (f) shucking and packing of fresh oysters in non-sealed containers; (g) sun drying or artifically dehydrating fruits, vegetables, and nuts; (h) manufacturing packaged soup mixes from dehydrated ingredients; (i) cooking and canning fish, shrimp, oysters, clams, crabs, and other sea foods; (j) smoking, salting, drying or otherwise curing fish for trade; and (k) canning specialty products, such as baby foods, "native foods", and soups.

The chart below shows the trend (since the first comparable annual Wisconsin Canners Safety Institute held in April 1946) in the relative frequency of injury cases reported, and of compensable injury cases settled, under the Workmen's Compensation Act of Wisconsin, per 1,000 wage and salary workers employed in the Canning Industry.



RELATIVE FREQUENCIES:

YEAR	REPORTED	SETTLED	YEAR	REPORTED	SETTLED	YEAR	REPORTED	SETTLED
47	72.6	71.5	55	58.5	48.3	63	41.4	40.3
48	80.6	68.7	56	54.2	43.6	64	36.3	32.1
49	81.0	68.0	57	54.4	44.6	65	45.4	31.4
50	60.3	50.0	58	43.8	42.5	66	42.4	35.9
51	67.2	49.9	59	41.5	34.1	67	48.0	35.3
52	72.4	61.6	60	44.6	34.2	68	42.9	33.2
53	64.2	56.1	61	46.6	39.7	69	42.8	35.2
54	57.2	51.2	62	46.5	33.6	70	49.1	35.2

Canning Industry Work Injury Highlights

1. Canning industry experienced a downward trend in injury cases reported and settled under W. C. Act in late 1940's and 1950's (preceded by a sharp upward trend prior to and during World War II), followed by a leveling off in incidence of such cases during 1960's and into 1970.

2. Injury frequency rate in 1960's peaked at 25.9 in 1967, and dropped back to 22.5 in 1969. Injury severity rate of 1,548 for 1969 was second only to 1,691 peak in 1962.

3. Number of workmen's compensation cases reported to DILHR per 1,000 persons employed stood at 49.1, the highest level since the 54.4 ratio for 1957. Number of compensable cases settled (where indemnity was paid) per 1,000 persons employed stood at 35.2 in 1969 and again in 1970, higher than comparable figures for 1959, 1960, 1962, 1964, 1965 and 1968, but lower than those for 1957, 1958, 1961, 1963, 1966 and 1967.

4. Dollar-wise, total indemnity and medical aid payments for compensable cases closed in 1968 still stands at an all-time high; 1970 had second highest total amount.

5. In the last five years, the odds in favor of an employee becoming a reported workmen's statistic were better than 1 to 24 (or a probability higher than 1/25) in any given year.

6. The manual premium rate for fruit packing (code 2105) rose from $1.17 to $1.43 per $100 of payroll effective March 1, 1971; the rates for Canneries, n.o.c. (code 2111x), fruit evaporating or preserving (code 2112) and pickle mfg. (code 2110) dropped from previous rates.

7. 21 cases settled in 1970 had safety violations -- two less than for 1969.

8. In the last five years, slightly more than 2 out of every 10 cases reported resulted from falls, about 3 out of every 10 from being struck by or against something, and a little less than 2 out of every 10 from being caught, in, under, between something (not traffic or vehicle accidents).

9. Pages 4-11 of this report show various cost data for 17 workmen's compensation cases reported in 1969. Indemnity and medical aid costs totalled $17,861 and averaged $1,051 per case (with a high of $14,304 and a low of $24); other costs shown on these pages totalled $899 and averaged $53 per case (with a high of $328 and a low of $1).

   These other costs do not include (1) insurance carrier expenses; (2) costs incurred by governmental agencies in carrying out their duties relative to insurance, work injuries and disease, and health and safety; (3) rehabilitation costs, etc. Where the employer did not show any supervisory or administrative costs on account of the injury in a given injury case we added an extra $3. Also, where we didn't know the medical costs in a noncompensable injury case we estimated the medical aid cost to be $25.

   From your experience, would you say the following averages are about right, low or high? What is your best offhand estimate?

Other Specified Cost Category	Average of 17 Cases	Your Estimate
a. Injured employee	$25	$_____
b. Other employees	5	_____
c. Supervisory & administrative	20	_____
d. Other costs	3	_____
e. Total	$53	_____

A/ UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN, A COVERED EMPLOYER MUST MAKE A REPORT OF INJURY DIRECTLY TO THE DEPARTMENT OF INDUSTRY, LABOR AND HUMAN RELATIONS ON THE FOURTH DAY AFTER EMPLOYEE LEAVES WORK IF DISABILITY STILL CONTINUES. IN DEATH CASES, A REPORT IS MADE WITHIN TWENTY-FOUR HOURS. IN CASE OF PERMANENT DISABILITY, OR WHERE MORE THAN THREE DAYS OF TEMPORARY DISABILITY IS CERTAIN TO RESULT, A REPORT IS MADE AT ONCE.

1/ TOTAL BENEFITS INCLUDE INDEMNITY AND MEDICAL AID; MEDICAL AID INCLUDES ESTIMATED COSTS IN CONTRACT CASES. EXCLUDED ARE: PAYMENTS FOR FUNERAL EXPENSES, PAYMENTS TO OR FROM THE SECOND INJURIES FUND AND THE CHILDREN'S ADDITIONAL DEATH BENEFIT FUND, PAYMENTS FOR MAINTENANCE DURING REHABILITATION TRAINING PERIODS, THE COST OF ARTIFICIAL MEMBERS FURNISHED, PAYMENTS IN COMPROMISE CASES, ADDITIONAL PAYMENTS IN REOPENED CASES, AND THE AMOUNT OF MEDICAL AID PAYMENTS WHERE THE INJURY DID NOT CAUSE DISABILITY BEYOND THE WAITING PERIOD OF THREE DAYS.

2/ AT THE REQUEST OF PRIVATE INDUSTRY IN WISCONSIN, AN ACCIDENT-INJURY COSTING ADVISORY COMMITTEE WAS FORMED - COMPOSED OF MEMBERS FROM INDUSTRY, LABOR, THE WISCONSIN COUNCIL OF SAFETY AND REPRESENTATIVES OF VARIOUS STATE GOVERNMENT AGENCIES. THIS COMMITTEE WAS FORMED IN 1967 TO HELP DEVELOP A PROGRAM TO ASSIST IN DETERMINING THE VIRTUALLY UNKNOWN TOTAL COSTS TO PRIVATE INDUSTRY AND GOVERNMENT OF WORK INJURIES AND ACCIDENTS. IT WAS DECIDED THAT DILHR'S STATISTICAL DIVISION SHOULD USE A RANDOM SAMPLING SCHEME BASED ON THE FIRST REPORTS OF INJURIES. ITS APPROACH, THUS FAR, HAS BEEN TO COMPILE DATA FOR DETERMINING COST PARAMETERS FOR ACCIDENTS AND EXPOSURES CAUSING INJURY OR DISEASE ONLY BECAUSE DILHR'S ONGOING WORKMEN'S COMPENSATION STATISTICS PROGRAM LENDS ITSELF TO THE PRESENT COSTING SYSTEM. AN EVEN MORE SIGNIFICANT CONTRIBUTION TO TOTAL LOSS CONTROL OR RISK MANAGEMENT WOULD BE IN COSTING NO-INJURY ACCIDENTS AND LOSSES IN ACCIDENTS WITH NO VISIBLE DAMAGE. IN 1969, AND THE LATER PART OF 1968, ONE OUT OF EVERY THREE STATE EMPLOYEE CASES AND ONE OUT OF EVERY TEN NONSTATE CASES WERE RANDOMLY SELECTED FROM EACH DAILY FOLDER FOR FURTHER FOLLOW-UP WITH THE EMPLOYER FOR ADDITIONAL COST INFORMATION. EMPLOYERS WERE REQUESTED TO PROVIDE THE STATISTICAL DIVISION WITH COSTS INCURRED FROM THE NONPRODUCTIVE TIME OF THE INJURED EMPLOYEE AND OTHER WORKERS -- COSTS WHICH ARE NOT COVERED UNDER THE ACT -- AND WITH PROPERTY AND PRODUCT DAMAGE AND ADMINISTRATIVE COSTS RESULTING FROM THE ACCIDENT. THE INITIAL SAMPLING PHASE WAS TERMINATED AT THE END OF 1969. A FINAL REPORT WILL BE ISSUED LATER THIS YEAR. THE 17 CASES INCLUDED IN THIS SUMMARY WERE SELECTED BY A VISUAL CHECK OF 1,754 RESPONSES (CASES REPORTED IN 1969).

3/ INCLUDES WAGE OR SALARY COSTS PAID FOR TIME NOT WORKED BY THE INJURED EMPLOYE; A. WAGE OR SALARY PAID FROM TIME OF ACCIDENT TO END OF TOUR OR WORK DAY; B. WAGE OR SALARY PAID IN LIEU OF WORKMEN'S COMPENSATION; C. WAGE OR SALARY PAID FROM EMPLOYE'S ACCRUED SICK, VACATION OR COMPENSABLE TIME, OR HIS REGULAR SALARY; D. NET WAGE OR SALARY COST DUE TO LOST TIME IN GOING TO AND FROM SOURCE OF MEDICAL CARE; AND E. NET WAGE OR SALARY COSTS DUE TO DECREASED OUTPUT (OR REDUCED EFFICIENCY) AFTER THE ACCIDENT.

4/ INCLUDES COST OF OTHER EMPLOYES WHO MAY HAVE STOPPED WORKING TO LOOK ON OR ASSIST THE INJURED; A. WAGE COSTS OF OTHER EMPLOYES WHO STOPPED WORKING AT THE TIME OF THE ACCIDENT TO ASSIST THE INJURED OR LOOK ON, OR OTHER EMPLOYES WHO MAY HAVE BEEN INJURED BY THE SAME ACCIDENT OR DISEASE; B. NET WAGE COSTS OF OTHER EMPLOYES DUE TO REDUCED OUTPUT AFTER THE ACCIDENT OR DISEASE; AND C. NET COST OF WAGE OF NEW REPLACEMENT EMPLOYE DURING LEARNING PERIOD.

5/ INCLUDES COSTS OF THE INJURED'S SUPERVISOR'S TIME IN ASCERTAINING THE FACTS, INVESTIGATING THE CIRCUMSTANCES AND REPORTING THE ACCIDENT, AND ALSO ADMINISTRATIVE COSTS INVOLVED IN EXECUTIVE AND CLERICAL TIME SPENT IN NOTIFYING RELATIVES, VISITS TO HOSPITALS WHERE INJURED MAY BE, REPORTING TO INSURANCE COMPANY, TYPING AND ANY OTHER TIME SPENT NECESSITATED BY THE ACCIDENT AND INJURY; A. WAGE OR SALARY COST OF SUPERVISOR'S TIME SPENT IN INVESTIGATING AND REPORTING THE ACCIDENT; B. WAGE OR SALARY COST OF SUPERVISOR'S TIME SPENT IN AUTHORIZING TRIPS BY INJURED EMPLOYE TO FIRST AID OR DOCTOR'S OFFICE; C. WAGE OR SALARY COST OF SUPERVISOR'S TIME SPENT IN TRAINING NEW REPLACEMENT EMPLOYE; AND D. ADMINISTRATIVE AND CLERICAL TIME SPENT ON ACTIVITIES NECESSITATED BY THE ACCIDENT OR DISEASE RESULTING IN INJURY.

6/ OTHER COSTS INCLUDE DAMAGE TO PROPERTY, EQUIPMENT, TOOLS, MATERIALS AND SUPPLIES. DAMAGE TO MOTOR VEHICLES ARE INCLUDED IF ESTIMATES FOR REPAIRS HAVE BEEN MADE. FOR EQUIPMENT DAMAGED BUT REPAIRABLE, THE COST IS THE ACTUAL AMOUNT FOR REPAIR. WHEN EQUIPMENT IS DAMAGED BEYOND REPAIR THE COST IS ITS PRESENT VALUE LESS SALVAGE VALUE. INCLUDED ALSO ARE OVERTIME COSTS NECESSITATED BY THE ACCIDENT -- EXTRA MAN HOURS OR OVERTIME TO CLEAN UP, OR MEET A PRODUCTION DEADLINE. OTHER ITEMS MAY BE LOSS OF GOODS OR WORK IN THE PROCESS OF COMPLETION (OR COMPLETED), DAMAGE TO REAL ESTATE AND APPURTENANCES, COST OF EXCESS WASTE OR SPOILAGE OR DAMAGE TO EQUIPMENT BY NEW REPLACEMENT EMPLOYE DURING LEARNING PERIOD, COST OF PUBLIC LIABILITY IF ANOTHER'S PROPERTY IS DAMAGE. RENTAL OF EQUIPMENT NEEDED WHILE DAMAGED EQUIPMENT IS BEING REPAIRED, COST OF SAFETY EQUIPMENT SPECIFICALLY PURCHASED TO PREVENT OCCURRENCE OF THE SAME ACCIDENT TYPE, AND ANY OTHER COST GROWING OUT OF THE ACCIDENT.

7/ NONCOMPENSABLE CASES = CASES IN WHICH NO INDEMNITY (WORKMEN'S COMPENSATION) IS DUE OR PAYABLE. EXAMPLES: NO TEMPORARY DISABILITY BEYOND 3 DAYS; STATUTE OF LIMITATIONS BARS CLAIM; INJURY WAS EITHER NOT IN COURSE OF OR NOT DUE TO EMPLOYMENT; CLAIM NOT PROSECUTED BY CLAIMANT, ETC.

8/ COMPENSABLE CASES = ALL CASES, EXCEPT COMPROMISE CASES, IN WHICH INDEMNITY (WORKMEN'S COMPENSATION) IS DUE AND PAYABLE. 9/ COUNTIES: (1) EAU CLAIRE; (2) LINCOLN, OCONTO; (3) LA CROSSE; (4) BROWN, MANITOWOC; (5) COLUMBIA, DANE, SAUK; (6) DODGE, JEFFERSON, WASHINGTON; (8) WALWORTH.

(A) Includes 1 permanent total disability case.

1/ Including indemnity and medical aid; medical aid includes estimated cost in contract cases. Excluded: payments for funeral expenses, payments to or from the Second Injuries Fund and the Children's Additional Death Benefit Fund, payments for maintenance during rehabilitation training periods, the cost of artificial members furnished, payments in compromise cases, additional payments in reopened cases, and the amount of medical aid payments where the injury did not cause disability beyond the waiting period of 3 days.

1970....	10	21	2,849.60(A)

(A) Includes 4 cases reopened in canning industry with increased compensation of $432.32.

SAFETY ORDER VIOLATION COSTS TO CANNING INDUSTRY EMPLOYERS IN CASES SETTLED, 1959-1970

$17,735.62 WAS PAID IN EXTRA INDEMNITY BY CANNING EMPLOYERS DURING THE 1960'S. $2,849.60 WAS PAID IN EXTRA INDEMNITY IN 1970 AS COMPARED WITH $3,841.45 IN 1969 AND $1,382.34 IN 1960.

WISCONSIN ADMINISTRATIVE CODE SECTION IND 1.18 -- BELTS, PULLEYS, ETC. -- WAS HELD VIOLATED IN ALMOST 27% OF THESE PENALTY CASES; HOWEVER, THERE WERE NONE IN 1968, BUT 7 AGAIN IN 1969, AND 8 IN 1970 INCLUDING 3 REOPENED CASES. STATUTE 101.06 -- EMPLOYER'S DUTY TO FURNISH SAFE EMPLOYMENT AND PLACE -- WAS HELD VIOLATED IN ALMOST 69% OF THE VIOLATION CASES SETTLED DURING THE 3 YEAR PERIOD, 1966-1968, ALL OF THE VIOLATION CASES SETTLED IN 1969 AND 88% OF THE VIOLATION CASES SETTLED IN 1970.

THERE WAS ONE VIOLATION OF THE CHILD LABOR LAW IN CASES SETTLED IN 1968 IN THE CANNING INDUSTRY IN WHICH DOUBLE INDEMNITY OF $486.53 WAS PAID; THERE WERE TWO IN 1969 IN WHICH DOUBLE INDEMNITY OF $137.66 AND $826.62 WERE PAID; THERE WAS ONE IN 1970 IN WHICH DOUBLE INDEMNITY OF $60.10 WAS PAID: (1) A 17 YEAR OLD BOY CAUGHT HIS FINGER IN A FILLING MACHINE; PART OF THE DISTAL END OF HIS INDEX FINGER WAS AMPUTATED; (2) A 17 YEAR OLD BOY CAUGHT HIS HAND IN THE REVOLVING BLADES OF A CAN FILLING MACHINE, RESULTING IN AMPUTATION TO 7/19 OF THE DISTAL JOINT OF HIS RIGHT INDEX FINGER; (3) A 16 YEAR OLD BOY WAS BURNED BY LYE ON HIS LEFT FOOT, LEFT UPPER LEG, RIGHT ARM AND ABDOMEN WHILE PUTTING CAUSTIC SODA IN PEELER; (4) A 17 YEAR OLD GIRL CUT INDEX FINGER WITH KNIFE.

IN 1970, THERE WERE 2 INJURY CASES SETTLED IN THE CANNING INDUSTRY IN WHICH INDEMNITY WAS DECREASED BY 15% ($181.27), PURSUANT TO SECTION 102.58, WISCONSIN STATUTES, BECAUSE OF THE FAILURE OF THE EMPLOYE TO USE SAFETY DEVICES.

(ABOVE TABLE ALSO INCLUDES DOUBLE AND TREBLE LIABILITY CASES.)

A/ INCLUDES 2 REOPENED CASES.
B/ INCLUDES 1 REOPENED CASE.

Canning Industries

Work Injuries Involving Safety Violations

Employe caught his left hand in dough roller on sheeter. Two fingers were caught in roller and 10 stitches were taken. Safety violation - Ind 1.18 and Section 101.06, Wis. Stats.

Employe was brushing debris from the bearing housing in preparation to grease the bearing on the conveyor to take loose waste away from the air cleaner. His gloved hand was caught between the conveyor belt and the tail pulley. Abrasions and laceration of right wrist to right forearm. Safety violation Ind 1.77 and Section 101.06, Wis. Stats.

Employe was cleaning beans off filling machine while machine was in operation. Right index finger was caught by descending plunger. Cut tendon and broken bone, right index finger. Ind. 1.31 and Section 101.06, Wis. Stats.

While trying to straighten belt on the unscrambler by pulling on the belt with his right hand, the employe accidently hit the switch with his shoulder or elbow and caught fingers of right hand in sprocket, cut off little finger to the first joint and badly cut the second finger. Ind. 1.18 1/

Employe was putting a V-Belt on a motor drive unit. Another employe turned on the power while he was working on the belt. His hand was caught in the nip of the V-Belt and pulley. Severed thumb of left hand. Ind 1.20 and Section 101.06, Wis. Stats.

Injured had turned off the power to the bean washer to clean out the screens. While he was in the washer, another employe turned the power on and injured's knee was caught between an auger and frame of the machine. Bruised right knee - internal bleading. Ind 1.32(2) & Section 101.06, Wis. Stats.

Corn cutter operator's gloved hand slipped beneath the chain which pulled the hand into the cutter. Lost tip of middle finger on right hand. Ind 1.35 and Section 101.06, Wis. Stats.

The automatic boxer machine got stuck. The injured left the electric current on and started the machine by reaching in back of the motor drive guard, pulling the V-Belt to restart the machine. The machine quickly restarted and caught the finger between the drive pulley and the V-Belt. It severed the tip of the finger. Ind 1.18 and Section 101.06, Wis. Stats.

Injured was riding on hand-operated lift truck, sitting on the left; he lost control and caught his left ankle between the truck and adjacent machinery. Leg fracture. Section 101.07. 2/

Injured's fingers came in contact with rollers which process pizza dough. The opening between table and guard on roller was approximately one inch. This opening caused injured to come in contact with rollers. Loss of use of hand due to crushing injury. Ind 1.35 and Section 101.06, Wis. Stats.

While trying to pick plastic out of the shrinking machine employe caught finger in roller. Torn tendon and badly bruised ring fringer. Ind 1.32 and Section 101.06, Wis. Stats.

Employe was filling alcohol burner without turning off the burner. The spout on the can fell off and alcohol spilled on the burner causing a fire. The employe's clothes caught fire. Another employe threw him into a snow bank to extinguish the flame. First and second degree burns on left side of face and on left arm. Ind 8.72(2), Ind 8.82(1) and Section 101.06, Wis. Stats.

Employe was trying to clear cauliflower cutting machine. His hand came in contact with moving belt and was drawn into knife blades. Cut right hand. Ind 1.41 and Section 101.06, Wis. Stats.

Injury was caused by an unguarded crank on a dough mixing machine. Injured's hand became caught in the reciprocating parts of the crank assembly. Hurt hands. Ind 1.31 and Section 101.06, Wis. Stats.

Injured stuck his foot into auger to loosen the jam up of cob corn which was between the auger rolls of the picker machine. Severly bruised right foot with bruise extending in ankle. Section 101.07 2/

When the pulley belt on the combine stopped turning, the employe reached up under the guard and pulled on the belt. It started and took his thumb in causing the injury. Eight stitches and a broken bone in the left thumb. Ind 1.18 and Section 101.06, Wis. Stats. 1/

A can jammed in the boxer, causing the drive belt to stick. Employe tried to loosen the belt by hand, the switch was on and the belt started, catching her finger between the V-Belt and the pulley. Cut off the tip of the ring finger on her right hand. Ind 1.18, Ind 1.32(2) and Section 101.06, Wis. Stats.

While trying to determine cause of blower fan of harvester heating up, the employe kept shifting his position to see better. The machine had not been turned off and the chain guard was not in place. The employe caught his foot between chain and tightener. Split toe open and lost toe nail of big toe, left foot. Ind 1.18 and Section 101.06, Wis. Stats.

While removing pans from sheeter, employe got her fingers caught in drive chain. Amputation of ring finger at distal. Ind 1.18 and Section 101.06, Wis. Stats.

Employe fell from ladder while cleaning the carrot waste out of a dewatering reel located near the ceiling. He was standing on a ladder and was using a handle from a broom to dislodge the waste. Compressed fracture lumbar vertebrae. Ind 1,20(1) and Section 101.06, Wis. Stats.

1/ Reopened case.

2/ Employe failure to use a safety device.

SEE PAGE 17 FOR SUBJECT OF SAFETY ORDER VIOLATED.

TABLE 1.10

PLEASE REPLY TO:

To: All Insurance Carriers Licensed to Write Workmen's Compensation Insurance in Wisconsin, and All Exempt Employers in Wisconsin

In our letter accompanying this report, we generally begin by commending those insurance carriers that have maintained a ranking well above 90% over a period of years for promptness of first workmen's compensation payment within fifteen days of injury.

For the year 1969, however, we would like to begin by commending the company that has made the most consistent progress in promptness of first payment over the last six years. This same firm moved from one of the lowest ranked positons in 1964 to the top position in 1969.

We offer our warmest congratulations and wish to commend the Northwestern National Insurance Company of Milwaukee for truly outstanding progress in moving up nearly 20 percentage points over a six year period.

We also wish to commend those carriers that have consistently given prompt service over many years despite the very large number of claims they handle. Employers Mutual Liability Insurance Company of Wisconsin has consistently paid claims promptly and in 1969 paid 70% of all claims for the insurance carriers ranked, and those with more than 50 cases.

Hardware Mutual Casualty Company and Liberty Mutual also must be commended for prompt payment of the second and third largest numbers of claims paid promptly in 1969.

Over the past six years, the two firms that have maintained a ranking well above 90% for promptness of first payment are; Iowa National Mutual Insurance Company and General Casualty Company of Wisconsin. We commend both of these firms for superior service to those injured workers whose claims were paid promptly.

We again strongly encourage all insurance carriers and exempt employers with percentages below 80 to carefully scrutinize their records and re-examine their methods. Promptness in payment of compensation due an injured worker is the only fair and equitable way to discharge the obligation.

If you are experiencing difficulty in getting out checks promptly, it may be to your advantage to consult those firms that have solved the problem. We must work together to insure the fullest consideration for injured workers.

Sincerely,

E. E. Estkowski

E. E. Estkowski, Chairman

J. R. Kautzer

J. R. Kautzer, Commissioner

PLEASE REPLY TO:

To: All Insurance Carriers Licensed to Write Workmen's Compensation Insurance in Wisconsin, and All Exempt Employers in Wisconsin

The record of most insurance carriers in meeting their obligation to pay due claims promptly is very good. Yet there are a number of problems which require special attention and concerted effort on the part of all carriers and exempt employers.

First, our Statistical Division has noted that in checking late compensation payments (as reported on the promptness post card mailed to every injured worker), the form WC-13 is not on file after several months following receipt of the WC-12. The WC-13 is used as a check against the promptness card.

Section Ind 80.02 (2) of the Wisconsin Administrative Code provides that, "Self-insured employers and insurance companies on all accidents which require a first report must: (a) Make a supplementary report on form WC-13 on the eleventh day following that on which the accident occurred."

Second, some employers and insurance carriers are not complying with Ind 80.02 (2)(b) which requires that there must be a supplementary report WC-13 (other adequate notice will suffice) immediately upon stopping payments for any reason. This report must be accompanied by an explanatory memorandum, with a copy furnished to the claimant or his attorney.

Third, the problem of the identification of the carrier or exempt employer on the WC-13 still exists. The carrier name that should be used on all forms and correspondence is the name under which the carrier is licensed to write workmen's compensation insurance. Exempt employers should also identify themselves, rather than using the name of the carrier which has written the excess coverage insurance.

Again, group names should never be used for insurance carriers. When a carrier elects to use a given name for writing workmen's compensation, that name and none other should be used in communicating with the Workmen's Compensation Division or in other matters related to the particular case. Insurance groups do not remain constant and it is impossible for us to maintain records that would reflect changes each year.

Your thoughtful cooperation in observing this rule of the Commission will be very much appreciated and will result in a better administered program for all concerned.

Sincerely,

Ralph E. Gintz

Ralph E. Gintz
Administrator

1/ An exempt employer (self-insured) is a subject employer exempted from insuring all or part of his liability as provided by The Workmen's Compensation Act of Wisconsin. An employer who has been granted exemption from insuring his risk under the act may carry excess insurance in accordance with regulations of the Insurance Commission without further order of The Department of Industry, Labor and Human Relations. Such excess insurance is not deemed to be full coverage. Injury cases protected by excess insurance are classified with exempt employers.

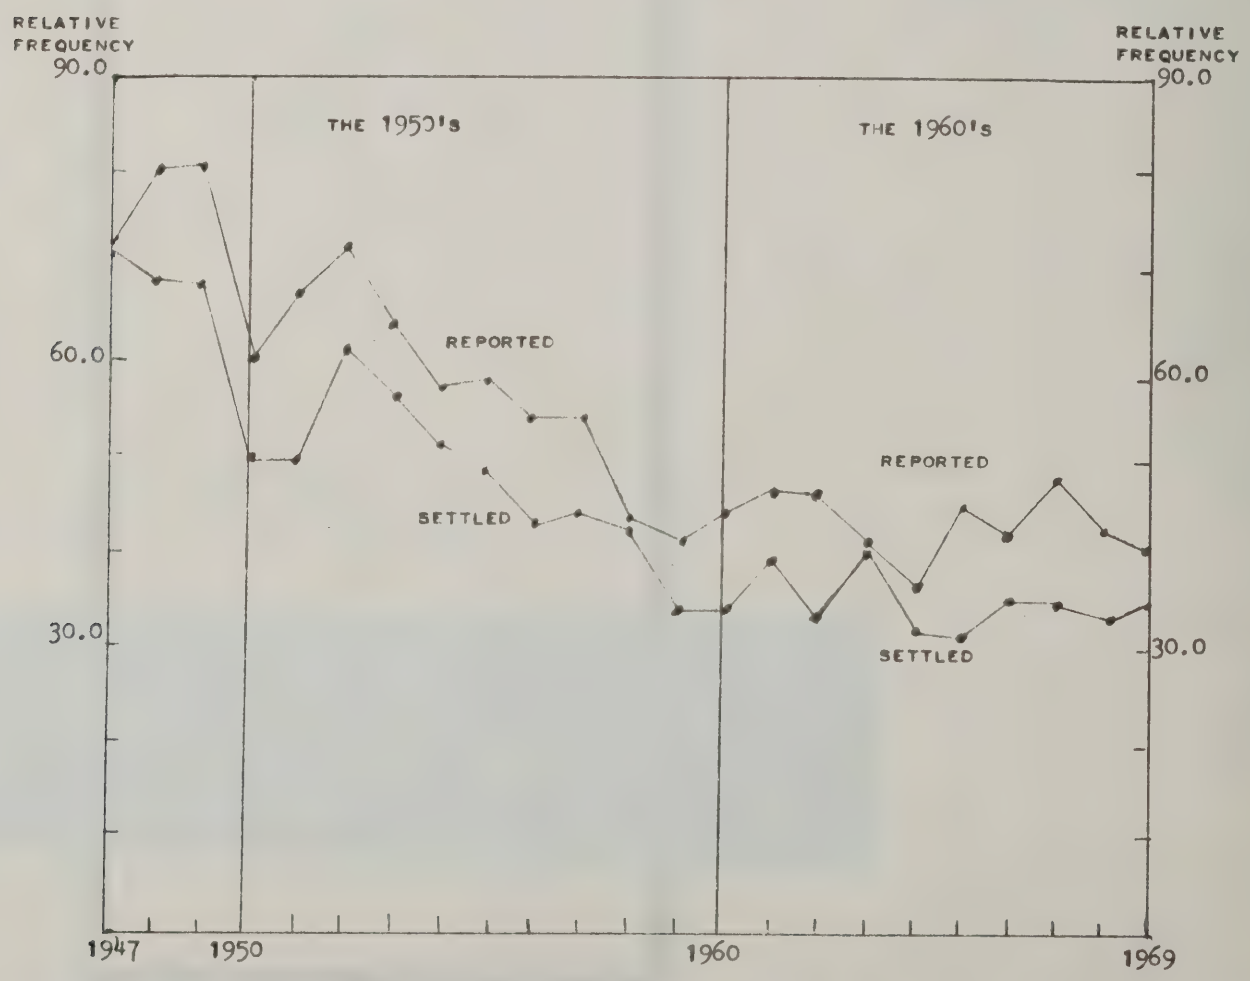
Canning Industry In Wisconsin

This report covers the experience of establishments primarily engaged in: (a) Canning fruits and vegetables, and fruit and vegetable juices; (b) manufacturing catsup and similar tomato sauces, preserves, jams and jellies; (c) pickling and brining fruits and vegetables; (d) manufacturing salad dressings, vegetable relishes, sauces, and seasonings; (e) quick freezing and cold packing (freezing) fruits, fruit juices, vegetables and specialities; (f) shucking and packing of fresh oysters in non-sealed containers; (g) sun drying or artifically dehydrating fruits, vegetables, and nuts; (h) manufacturing packaged soup mixes from dehydrated ingredients; (i) cooking and canning fish, shrimp, oysters, clams, crabs, and other sea foods; (j) smoking, salting, drying or otherwise curing fish for trade; and (k) canning specialty products, such as baby foods, "native foods", and soups.

The chart below shows the trend (since the first comparable annual Wisconsin Canners Safety Institute held in April 1946) in the relative frequency of injury cases reported, and of compensable injury cases settled, under the Workmen's Compensation Act of Wisconsin, per 1,000 wage and salary workers employed in the Canning Industry.



The leveling off of the relative frequencies of work injuries in Wisconsin Canning during the 1960's, following their declines during the late 1940's and 1950's, indicates a need for extra effort and, perhaps, new safety methods. The need for new methodology becomes more apparent and urgent as gross accident prevention problems are reduced and the residue displays a tenacity that does not yield easily to increased safety efforts.

Relative frequencies plotted on page 2:

Year	Reported	Settled	Year	Reported	Settled	Year	Reported	Settled
47	72.6	71.5	50	60.3	50.0	60	44.6	34.2
48	80.6	68.7	51	67.2	49.9	61	46.6	39.7
49	81.0	68.0	52	72.4	61.6	62	46.5	33.6
			53	64.2	56.1	63	41.4	40.3
			54	57.2	51.2	64	36.3	32.1
			55	58.5	48.3	65	45.4	31.4
			56	54.2	43.6	66	42.4	35.9
			57	54.4	44.6	67	48.0	35.3
			58	43.8	42.5	68	42.9	33.2
			59	41.5	34.1	69	41.0	35.2

Work Injury Highlights During 1960 Decade and 1969

1. Injury cases reported.

Most employers in Wisconsin became subject to the Workmen's Compensation Act and were required to have Workmen's Compensation insurance on or before January 1, 1969. The Amendment effective July 1, 1968, provided that every employer, other than a farmer, who has less than three employes but who has paid wages of $500 or more in any calendar quarter for services performed in Wisconsin shall become subject as of the first day of the following calendar year. Such an employer must obtain Workmen's Compensation insurance. He was subject for the entire year 1969 and was required to have insurance covering any employment during that year even though his payroll was less than $500 in every quarter of 1969.

Employers covered under the Act must make a first report of injury or disease, on a prescribed form, directly to DILHR's Workmen's Compensation Division - on the fourth day after the employee leaves work due to injury or disease (if disability still continues), or sooner in case of death, permanent disability or where more than three days of disability is certain to result.

During the 1960 decade, about 2 of every 10 cases reported resulted from falls. During the last four years close to 3 of every 10 cases resulted from being struck by or against something. Two other broad accident type categories showed increases in the relative number reported -- the category "caught in, on, under, between" rose from around 16 of every 100 in the early 1960's to around 19 of every 100 in 1968-1969; nontraffic vehicle accidents rose from about 1 of every 100 to about 4 of every 100. Injury cases from explosion, heat, and cold, and from overexertion, etc., dropped off quite noticeably. See Table 920.9A.

The accident type identifies the event which directly resulted in the injury.

Even though more cases were usually reported during August and September, the number reported per each 1,000 workers employed in the Canning Industry remained above 4 for the month of November for each of the ten years in the decade. See Table 933.11.

Injury cases reported in 1967, 1968 and 1969 are shown for each individual canning company in Table 920.9, by broad accident type groups. The total number of "falls" varied by only one from 1967 to 1968 to 1969.

2. Compensable cases settled.

Compensable work injury cases in the Canning Industry in Wisconsin were settled or disposed of during 1968 at a cost of almost $360,000, a record high for any year in history (due primarily to a permanent total disability case). The comparable cost figure for 1969 stood at about $290,000. See Table 975.3. Using the average total employment for the industry in 1969, the average cost per employee for work injuries was $31.41 (down from $37.89 in 1968).

The above figures include medical aid and indemnity for compensable cases. Not included are: medical aid reported in noncompensable cases, additional amounts paid in reopened cases, compromise agreements approved, payments made into either the Children's Additional Death Benefit Fund or the Second Injury Indemnity Fund, additional costs such as funeral expense, insurance premiums, net cost of property damage, cost of maintenance during rehabilitation, production losses, first aid treatments, medical aid not reported in cases not covered under the Wisconsin Workmen's Compensation Act, etc.

The manual premium rates, effective March 1, 1969, and the new manual premium rates, effective March 1, 1970, also reflect the increasing costs of work injuries in the Canning Industry in Wisconsin. For example, the rate for canneries, n.o.c. (code 2111x) jumped from $1.68 to $2.13 to $2.24, an increase of almost 27 percent from 1968 to 1969 and an increase about 5 percent from 1969 to 1970.

There were 315 compensable work injury cases settled in 1968: 1 fatal, 1 permanent total, 46 permanent partial and 267 temporary disability cases. There were 325 compensable work injury cases settled in 1969; again 1 fatal and 1 permanent total, 49 permanent partial and 274 temporary disability cases. See Table 913.9.

Compensable time for the 315 cases settled in 1968 was 4,515-1/6 weeks, and for the 325 cases settled in 1969 was 4,428-1/6 weeks. In other words, the actual time loss paid for each year was the equivalent of paying an extra 85-87 employees for a full year at a wage equal to the amount allowable for work injuries.

The total healing period for the 313 cases settled in 1968 (excluding the fatal and the permanent total disability cases) was 1,568-1/2 weeks, and for the 323 cases settled in 1969 (excluding the fatal and the permanent total disability cases) was 1,807-1/2 weeks. This is the equivalent of a year's full time work for 30 workers for the 1968 cases and for 35 workers for the 1969 cases.

Healing period = actual time lost from work, due to work injury or occupational disease, counting six days to the week.

Compensable time = number of days for which indemnity (workmen's comepnsation) is due and payable under the Workmen's Compensation Act of Wisconsin, counting six days to the week.

There were 23 injury cases settled in 1969 with employer violations of safety orders. The total amount of extra indemnity paid by employers was $3,841.45. Comparable figures for 1968 were 9 and $445.95.

There was 1 case with employer violation of the Child Labor Law in 1968, in which double indemnity of $486.53 was paid. There were two such cases in 1969, in which double indemnity of $964.28 was paid. See Table 912.9.

Wisconsin administrative code section 1.18 -- belts, pulleys, etc. was held violated 25 times during the 1960's. Statute 101.06 -- employers duty to furnish safe employment and place -- was held violated 45 times during the last five years. See Table 912.97.

1968 and 1969 Fatal Cases:

1968: 20 year old migratory worker was stacking pea vines (with tractor) on the pea stack. The tractor was too close to the edge and tipped off the stack; the tractor landed on him.

1969: 57 year old brine mixer was cleaning brine tanks with a caustic solution. He fell and slipped behind the tank. The cleaning solution boiled over the top of the tank causing burns over more than 90% of his body.

1968 and 1969 Permanent Total Disability Case:

1968: 53 year old foreman suffered multiple injuries in a traffic accident August 7, 1951; he died November 23, 1967. A medical report prior to death: "....he was rapidly deteriorating as the result of paraplegia, degenerative bone disease, chronic cystitis, defused atrophy of leg musculature." His medical expenses amounted to $74,543.06; his indemnity, $22,261.72. In this case, a third party settlement was also approved in 1954 for $55,000. The injured employee received $12,333.34; his attorney, $18,333.33; his employer's workmen's compensation insurance carrier, $24,333.33.
1969: 75 year old canning laborer was cleaning out a pit in a bean viner when another employee turned on the switch, trapping him in the conveyor. He died in 1968. His medical expenses amounted to $5,371.95 and his indemnity to $22,160.04.

Median ages of workers.

1966 = 45
1967 = 46
1968 = 41
1969 = 43

26 of the injured workers were under 18 years of age in the cases settled in 1969; 25 were under 18 years of age in the 1968 cases; 48 were 18 through 20 in 1969 as compared with 53 in 1968 and 29 in 1967; 13 were over 65 in 1969 as compared with 17 in 1968 and 21 in 1967; ages for 7 and 6 cases were not reported for 1969 and 1968, respectively. 27 18-year old's constituted the largest single age group in the 1969 settled cases, 16 19 year old's the next largest, 15 17-year old children the next, and 11 16-year old children and 65-year old persons the next highest number.

The 325 compensable cases closed in 1969, included 8 migratory workers, 7 foremen, 1 supervisor, 9 truck drivers, 9 fork lift operators, 6 maintenance mechanics, 14 maintenance men, 20 farm machinery operators, 17 farm workers, 10 inspectors, etc. Most were classified as general cannery workers or factory laborers.

Occupation shown on first report of injury received the other day "Town Drunk"! Another one showed: "He had none".

Source of injury in compensable cases settled in 1969:

1. Working surfaces.....63 injury cases
   a. Building floor.....25
   b. Ground.....13
2. Machines, machinery.....62
   a. Combine.....10
3. Containers (empty or full).....41
4. Vehicles.....38
   a. Truck.....11
   b. Fork lift truck.....11
   c. Farm tractor..... 5
5. Bodily motion.....14
6. Conveyors.....13
7. Environmental, atmospheric conditions..10
8. Hand tools..... 9
9. Mechanical power transmission apparatus 5
10. Other sources.....70

The source of the injury identifies the object, substance, exposure, or bodily motion which directly produced or inflicted the injury.

Two answers on first report of injury to Previous Physical Defects: (1) no ambition, and (2) alcoholism. Another first report had the following comments: "Work interferes with his drinking...even a small compensation check would make it unnecessary for him to work" -- "He called in Friday and said he was drunk from celebrating a nice court settlement."

Nature of injury and part of body in 1969 compensable cases:

1. Nature of injury
   a. Fractures.....65 cases
   b. Cuts, lacerations, abrasions..51
   c. Sprains, strains.....39
   d. Bruises, contusions.....36
   e. Amputations.....24 (one hand, rest fingers)
   f. Burns, hot substance.....15
   g. Torn muscle, tendon, etc.....10
   h. Others.....85

2. Part of body
   a. Fingers (thumbs).....73
   b. Leg(s).....62
   c. Trunk.....53
   d. Arm(s).....32
   e. Feet.....28
   f. Multiple parts.....21
   g. Hand(s).....17
   h. Head and neck.....15
   i. Toe(s).....14
   j. Eye(s)..... 5
   k. Genitals..... 3
   l. Arm(s) and Leg(s)..... 2

The number of occupational disease cases dropped from 14 in 1968 to 12 in 1969.

1968

Eight were dermatitis cases: source in 1 case, paint thinner; in 1 case, beans; in 2 cases, corn, in 1 case, disinfectant; in 3 cases, not reported. Four resulted from repeated motion. One was a heat exhaustion case; the last was a respiratory infection case which arose from inhaling fumes from an unspecified chemical. Total cost of the 14 cases was $5,834.

1969

Six were dermatitis cases: Source in 1 case, beans; in 1 case, carrots; in 1 case, corn; in 1 case, cucumbers; and two cases from a minor rash. Four resulted from repeated motion, and one from repeated friction. The other resulted from a burn from welding equipment. Total cost of the 12 cases was $5,266.

Effective February 1, 1970, Subsection 102.11 (1) of the Workmen's Compensation Act was amended to increase the maximum weekly wage for temporary disability, permanent total disability, and death benefits to $112.86. This increased the maximum weekly compensation from $73 to $79 for temporary and for permanent total disability, and to $56.43 for death benefits. The maximum death benefit was increased from $20,858 to $22,572. The maximum weekly wage for permanent partial disability was raised to $69.29, resulting in an increase of the maximum weekly compensation rate from $47.50 to $48.50.

The average weekly wage in compensable cases settled in 1969 was $91.12, as compared to $87.00 in 1968 and $80.72 in 1967.

Disabling Work Injury Rate Data

The injury frequency rate in the Canning Industry in Wisconsin, as a whole, rose from 24.1 in 1966 to 25.9 in 1967, and then dropped to 22.9 in 1968. See Table 1.9.

The injury severity rate decreased from 1,475 in 1966 to 1,298 in 1967, to 963 in 1968; the average days charged or lost per disabling injury also decreased, from 61 to 50 to 42.

The above injury rate data were compiled from data collected in our annual survey of Wisconsin injury rates. Source: Work Injuries Cooperative Survey, form BLS 1418. This survey was made in cooperation with the Bureau of Labor Statistics, U. S. Department of Labor.

SAFETY ORDER VIOLATION COSTS TO CANNING INDUSTRY EMPLOYERS
IN CASES SETTLED, 1959 - 1969

$17,735.62 WAS PAID IN EXTRA INDEMNITY BY CANNING EMPLOYERS DURING THE 1960'S.

WISCONSIN ADMINISTRATIVE CODE SECTION IND 1.18 -- BELTS, PULLEYS, ETC. -- WAS HELD VIOLATED IN ALMOST 27% OF THESE PENALTY CASES; HOWEVER, THERE WERE NONE IN 1968, BUT 7 AGAIN IN 1969. STATUTE 101.06 -- EMPLOYER'S DUTY TO FURNISH SAFE EMPLOYMENT AND PLACE -- WAS HELD VIOLATED IN ALMOST 69% OF THE VIOLATION CASES SETTLED DURING THE 3 YEAR PERIOD, 1966-1968, AND IN ALL OF THE VIOLATION CASES SETTLED IN 1969.

****

THERE WAS ONE VIOLATION OF THE CHILD LABOR LAW IN CASES SETTLED IN 1968 IN THE CANNING INDUSTRY IN WHICH DOUBLE INDEMNITY OF $486.53 WAS PAID; THERE WERE TWO IN 1969 IN WHICH DOUBLE INDEMNITY OF $137.66 AND $826.62 WERE PAID: A 17 YEAR OLD BOY CAUGHT HIS FINGER IN A FILLING MACHINE; PART OF THE DISTAL END OF HIS INDEX FINGER WAS AMPUTATED; (2) A 17 YEAR OLD BOY CAUGHT HIS HAND IN THE REVOLVING BLADES OF A CAN FILLING MACHINE, RESULTING IN AMPUTATION TO 7/19 OF THE DISTAL JOINT OF HIS RIGHT INDEX FINGER; AND (3) A 16 YEAR OLD BOY WAS BURNED BY LYE ON HIS LEFT FOOT, LEFT UPPER LEG, RIGHT ARM, AND ABDOMEN WHILE PUTTING CAUSTIC SODA IN PEELER.

****

IN 1969, THERE WAS ALSO AN INJURY CASE SETTLED IN THE CANNING INDUSTRY IN WHICH INDEMNITY WAS DECREASED BY 15% ($17.42), PURSUANT TO SECTION 102.58, WISCONSIN STATUTES, BECAUSE OF THE FAILURE OF THE EMPLOYE TO USE SAFETY DEVICES.

Work Injury Statistical Releases Survey

The Statistical Division requests your cooperation in completing this survey to help us evaluate user need for our work injury statistical releases. The survey will also be used to update our mailing list for statistical releases.

YOUR NAME WILL BE REMOVED FROM OUR MAILING LIST IF YOU DO NOT RETURN THIS FORM BY May 28, 1971 or IF YOU INDICATE BELOW THAT YOU WANT YOUR NAME REMOVED.

A. Check one:

☐ 1. Keep my name on mailing list. ☐ 2. Remove my name from mailing list.

Check one:

☐ Address is correct as printed on release

or

☐ Change address as follows:

_____

_____

_____

Comments _____

_____

_____

_____

_____

_____

B. If you checked 1 above, please indicate the source data you are interested in:

☐1. First reports of injury and illness filed under W.C. Act of Wis.
☐2. Injury and illness cases closed under W.C. Act of Wis.
☐3. Injury frequency and severity rate data compiled in cooperation with U. S. Dept. of Labor.
☐4. W.C. children's fund and second injuries fund data.
☐5. Promptness of first W.C. payment data.
☐6. Violations of safety rules and child labor law.
☐7. Formal hearings involving W.C. Cases and decisions by circuit and supreme court.
☐8. Pilot project on direct and indirect costs of sample of accidents involving W.C. reportable injuries and illnesses.
☐9. Other (Specify) _____

_____

_____

C. Please indicate the detailed analytical data you are interested in:

☐ 1. Insurance or self-insured status
☐ 2. Source of Injury

INJURY TREND LOOKS ENCOURAGING

by Charles A. Hagberg, Administrator
Industrial Safety and Buildings Division

I am very pleased that fewer injury cases were reported to our Workmen's Compensation Division in 1970 than in 1969, and that the downward trend has continued into 1971. Wisconsin employers and employees are to be commended for this favorable trend.

If we compare the number of cases to the number of nonfarm and nonfederal employees we may note an even more pronounced level of achievement. Declines in employment in Wisconsin in December 1970 and January and February 1971, as compared with the same months in the previous year, have been exceeded by even sharper declines in the number of work injuries reported.

Part of the reason for the abnormally low job injury rate might be attributed to recent lay-offs in those industry categories which usually account for more than their share of accidents. Another reason behind these lower levels might be the possibility of greater efforts by employers to reduce the cost of accidents as a part of economic "belt-tightening". Accidents not only affect production and payroll, but also may force an increase in the premiums an employer pays for his workmen's compensation insurance.

In addition, Federal legislation enacted last December soon will establish strong Federal control over the occupational health and safety standards which employers must meet and the enforcement of those standards. Part of that safety package calls for stiffer penalties for violators -- in some cases fines up to a thousand times more costly than in the past. Since the Federal legislation takes effect April 28, some employers may be reviewing their safety procedures more closely than in the past.

I am also very pleased that work injury levels dropped off considerably from the trend which probably would have continued had we not initiated our "Operation Safe Place". Additionally, the chart on the next page shows we are now falling below levels projected on the basis of 1967-1969 experience.

With the Federal government's new role in occupational health and safety, it is more important than ever that all of us in Wisconsin must work closer together to continue this downward trend in work injuries and diseases.

Page 5 shows a quality control chart which provides us a bird's - eye view of what is happening in the various safety regions throughout the state. There are many causes which might contribute to some of them being "out of control" (for example, screening practices of obvious nonreportable noncompensable cases might change, etc.).

After reading this report the thought occurred to me: it's odd -- the chances we take.

The odds in favor of an employee becoming a statistic for this report are about 1 to 25 (as based on our 1970 experience), which means that the chances of reporting an injury or disease to our Workmen's Compensation Division are greater than the chances of finding a royal flush in picking up a five card poker hand, or of finding a full house, or a straight flush, or simply a flush. Some probabilities by major groups are shown on page 17.

Page 23, shows that the number of occupational disease cases rose from 1,120 in 1968, to 1,169 in 1969, and to 1,171 in 1970. I think it is well worth while to look at this table. Tables on source of injury, accident type, part of body and nature of injury should also be studied. Injury accident statistics have a very important role in accident prevention.

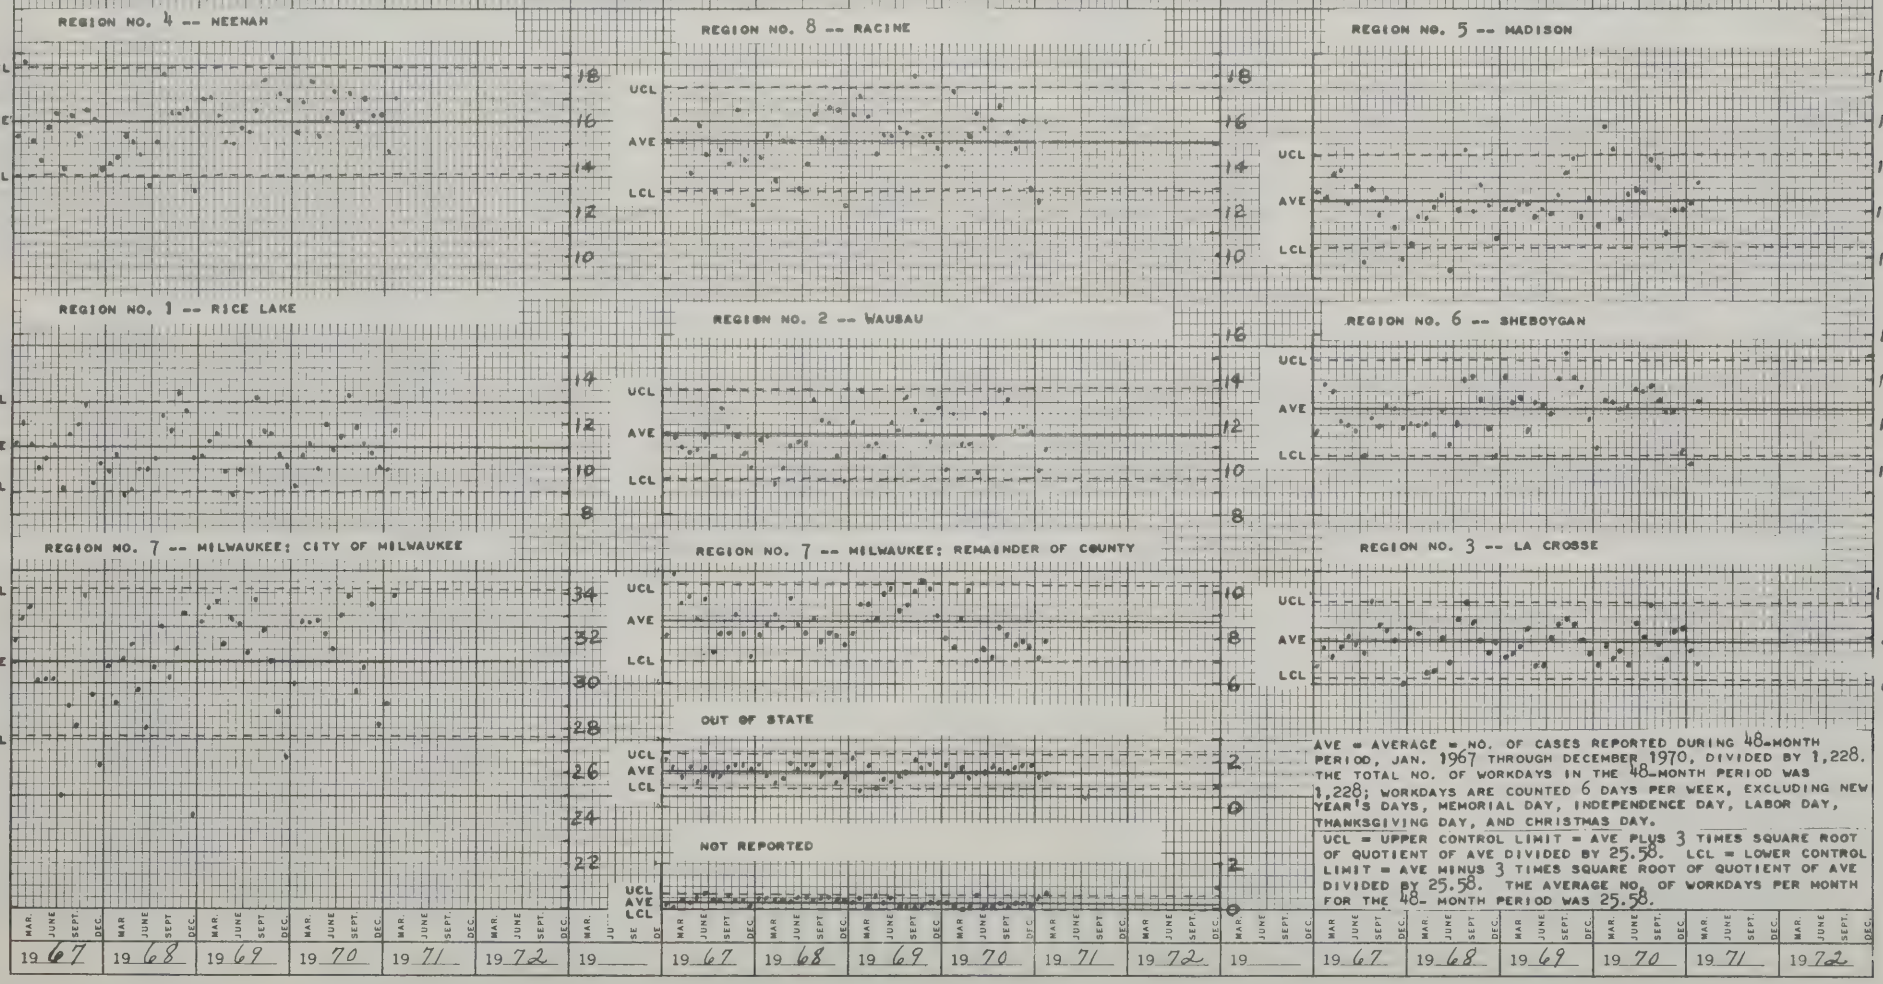
FIRST REPORTS OF INJURY FILED UNDER WORKMEN'S COMPENSATION ACT OF WISCONSIN

JAN. 1967 TO DATE

NO. REPORTED PER DAY BY SAFETY REGION QUALITY CONTROL CHARTS



AVE = AVERAGE = NO. OF CASES REPORTED DURING 48-MONTH PERIOD, JAN. 1967 THROUGH DECEMBER 1970, DIVIDED BY 1,228. THE TOTAL NO. OF WORKDAYS IN THE 48-MONTH PERIOD WAS 1,228; WORKDAYS ARE COUNTED 6 DAYS PER WEEK, EXCLUDING NEW YEAR'S DAYS, MEMORIAL DAY, INDEPENDENCE DAY, LABOR DAY, THANKSGIVING DAY, AND CHRISTMAS DAY.

UCL = UPPER CONTROL LIMIT = AVE PLUS 3 TIMES SQUARE ROOT OF QUOTIENT OF AVE DIVIDED BY 25.58. LCL = LOWER CONTROL LIMIT = AVE MINUS 3 TIMES SQUARE ROOT OF QUOTIENT OF AVE DIVIDED BY 25.58. THE AVERAGE NO. OF WORKDAYS PER MONTH FOR THE 48- MONTH PERIOD WAS 25.58.

Work Injury Cases Reported - Selected Data

Item	Calendar Year Total 1968	1969	1970
1. Total - All injury cases reported	38,515	40,666	39,841
2. How they happened (accident type):			
a. Struck by (nontraffic)	7,871	8,348	8,409
b. Overexertion	7,046	7,260	7,013
c. Falls	6,221	6,960	6,647
d. Struck against	4,494	4,355	4,210
e. Caught in, on, under, between	4,172	4,519	4,235
f. Bodily reaction	2,136	2,349	2,713
g. Traffic accidents	1,054	1,089	1,040
h. Nontraffic vehicle accidents, nec	1,046	1,141	1,027
i. Contact with temperature extremes, nec	860	926	959
j. Contact with radiations and caustics; toxic and noxious substances	825	810	801
k. All other reported	1,099	1,253	1,212
l. Not reported	1,691	1,656	1,575
3. Their sources of injury:			
a. Working surfaces	5,272	6,056	5,752
b. Metal items, nec	4,822	5,149	4,901
c. Machines, machinery	3,993	4,315	4,050
d. Vehicles	3,568	3,700	3,564
e. Containers	3,094	3,334	3,284
f. Hand tools	2,297	2,374	2,355
g. Bodily motion	2,274	2,538	2,878
h. Wood items, nec	1,915	1,782	1,765
i. Explosive, hot and flammable substances	1,015	1,121	1,096
j. All other reported	8,123	8,330	8,281
k. Not reported	2,042	1,967	1,915
4. Nature of injury:			
a. Sprains, strains	8,668	9,391	10,297
b. Cuts, lacerations, punctures, abrasions	6,955	7,307	7,256
c. Fractures	4,454	4,634	4,537
d. Brusies, contusions	4,245	4,217	4,303
e. Burns, scalds	1,627	1,467	1,735
f. Hernias	911	898	985
g. Multiple injuries	648	935	1,197
h. Crushing injuries	638	707	678
i. Dermatitis	529	479	466
j. Amputations, enucleations	523	587	512
k. All other reported	5,791	6,229	5,093
l. Not reported	3,526	3,815	2,782
5. Part of body affected:			
a. Trunk*/	11,092	11,610	11,313
b. Leg, legs	6,123	6,459	6,152
c. Finger, fingers	5,979	6,204	6,069
d. Arm, arms	3,490	3,665	3,564
e. Multiple or body system	2,598	3,012	3,320
f. Foot, feet	2,347	2,517	2,350
g. Hand, hands	2,200	2,411	2,323
h. Head, face, neck	1,843	1,847	1,811
i. Toe, toes	1,325	1,418	1,353
j. Eye, eyes	855	873	1,018
k. Not reported	663	650	568
6. Age:			
a. Under 12	-	-	1
b. 12 - 15	94	102	107
c. 16 - 17	653	764	712
d. 18 - 20	3,550	3,922	3,907
e. 21 - 45	19,567	20,679	20,531
f. 46 - 65	11,968	12,535	12,128
g. Over 65	695	683	694
h. Not reported	1,988	1,981	1,761

Amputations, although comparatively few in number, constitute one of the costliest work injuries. In the compensable cases settled in 1969, amputations cost 2.4 million dollars in indemnity (workmen's compensation) and medical aid.

Two of the 511 amputation cases reported in 1970 proved fatal. There was one case of decapitation.

In 3 cases, an arm was amputated - 2 involved part of the upper arm, 1 involved part of the forearm. Eight workers suffered amputation of the hand.

In 477 cases, fingers or thumbs - or parts thereof - was amputated: 1 finger, 401; more than 1 finger (unspecified), 2; 2 fingers, 45; 3 fingers, 19; 4 fingers, 7; 3 or more fingers, 31. (The thumb is included in the finger categories above).

In 3 cases, part of the leg was amputated. In 5 cases, a foot was amputated.

Toe amputations: 1 toe, 7; 2 toes, 3; 3 toes, 5.

Source Of Injury: Hand Tools - Not Powered

Work Injury Report:

On the afternoon of September 17th, 1970, at approximately 2:30 P.M. I was seated before a horizontal surface supported by four vertical columns, engaged in activities relative to the functions of my office. I had arrived at a point in these activities where additional information was necessary. I arose from my assumed position, traversed the breadth of the office to a repository designed and provided for the storage of data.

On the return traversal I collided with the evenly tapered terminal of a cylindrical instrument constructed of cellulose fiber and a compacted core of graphite which was protruding from a sliding receptacle in an object consisting of a horizontal surface mounted on four supporting columns and containing several sliding receptacles of various dimensions. Upon colliding with the cylindrical instrument, the tapered terminal of the graphite core became lodged in the epidermis surrounding the skeletal muscle of the right femur.

After a very brief dialog with the Lord, I proceeded to the emergency room of ZYX Hospital. There, I engaged the services of a Doctor XYZ who after examining the wound, injected several hundred cc's of a substance known as Novocain and thereupon performed surgery to extract the tapered terminal of the graphite core. After so doing, the services of a nurse were employed, who applied an antibiotic compound and a surgical dressing. She thereupon injected into my upper right arm a serum consisting of the anti-toxin of the bacillus clostridium tetani.

After completion of the foregoing, I put on my pants and went back to work.

Briefly Stated:

Pencil protruding from desk drawer was jabbed into thigh of employe when he was attempting to sit down in his chair causing a puncture of upper thigh-right leg.

Fatal Injuries Reported to Department of Industry, Labor and Human Relations

June 1970 - February 1971

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
June 1970:					
Fond du Lac	Wisconsin Power & Light Co.	John P. Kobs	22	Gas & Electric Utilities Construction Laborer	Electrocuted when he came in contact with energized transformer.
State of Illinois	C. A. Hooper Company	Balzer Brendel	22	Construction Contractors Operating Engineer	Electrocuted while driving ground rod. Came in contact with energized wire connected to pole ground.
	Wm. O'Donell, Inc.	Curtis J. Mehring	45	Truck Transportation Truck Driver	Truck overturned.
Sauk County	Helgesteel Corporation	Slater A. Pribble	59	Sale & Erection of Steel Buildings Concrete Worker	Traffic accident.
Chippewa Falls	Northern Freeport Silo Co.	Roger E. Nelson	18	Mfg. of Cement Silo Products & Silo Construction Silo Builder	Silo collapsed burying employee under debris & sand.
Unknown	Ruan Transport Corp.	John E. Howe	43	Trucking Transporter Truck Driver	Unknown.
Milwaukee	The Jacobus Company	Keith E. Weber	45	Fuel Dealer Truck Driver	Traffic accident.
Burnett County	Hanefeld Brothers, Inc.	Howard Hanefeld	46	Trucking Livestock President	Traffic accident.
Milwaukee	Acme Disposal Service Corp.	Robert S. Hunter	32	Rubbish Disposal Truck Driver	Traffic accident.
Columbia County	Michigan Fruit Canners, Inc.	Arthur W. Kirley	60	Vegetable Processing Cannery Worker	He was found lying at the base of the stairs in a semi-conscious state.
Yorkville	Hoffman York, Inc.	James A. Boyce	39	Advertising Corporate Officer	Struck a concrete abutment.
Crawford County	Turner Redi Mix Concrete Co.	La Verne Atkinson	43	Redi Mix Superintendent	Traffic Accident.
Sturtevant	Empire Excavating Co.	Richard Ostrowski	24	Excavation Contractor Machine Operator	Cave-in of sewer excavation.
Peshtigo	Marinette County	Howard Kulberg	54	Highway Commission Road Patrolman	Tractor he was driving overturned in drainage ditch.

A/ Note: Fatal injuries reported to the Department from January through May 1970 were listed in Stat. Release 3868, dated April 30, 1970.

Fatal Injuries Reported (continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Watertown	Rogers Brothers Company	Wayne C. Hunter	52	Seed - Food Products Wholesale Salesman	Automobile overturned.
Milwaukee	Tri-State Bowling Service	Arnold Knuth	54	Bowling Alley Equipment Installation Carpenter	Traffic accident.
Racine County	Wind Lake Produce Corp.	Epigemio Rodriguez, Jr.	35	Sod Farming Farm Tractor Operator	Drowned while pinned under tractor after it went into drainage canal.
July 1970:					
Walworth County	Town of Delavan	Gerald Breidenstein	47	Municipality - Highway Laborer	Tractor tipped over on him.
Eau Claire	Collins La Crosse Sign Company	Ervin G. Friet	58	Outdoor Advertising Sign Hanger	Sign supports gave way and he was knocked onto a building roof edge from which he fell to the ground.
Waukesha County	Bauer Construction Company Inc.	Paul Rajchel	55	General Construction Construction Laborer	Traffic accident.
South Milwaukee	Jerome E. Steffen	Robert Pfeffer	47	Mason & Concrete Work Stone Mason	Fell head first into fresh concrete.
Richland County	Edward Kraemer & Sons, Inc.	Frank L. Wegner	24	Highway and Bridge Construction Construction Laborer	Caught between rock crusher units.
August 1970:					
Adams County	Arthur Overgaard, Inc.	Wendell A. Stomner	37	Ready Mix Concrete Truck Driver	Electrocuted - bucket attached to crane hit high voltage electrical wire.
Chilton	Wisconsin Public Service Corporation	Douglas W. Newton	23	Gas and Electric Utility Electrician	Electrocuted while connecting 240 volt circuit.
Combined Locks	Village of Combined Locks	Thomas F. Janssen	17	Municipality Laborer	Fell from ladder.
Grant County	Grant County Highway Department	Aemil D. Hardy	48	Municipality Road Patrolman	Tractor unit slid down bank and landed upside down on the operator.
Kenosha	American Motors Corporation	Alexander Pelsley	52	Manufacturer of Automobiles Millwright	Fell from platform.
Madison	City of Madison	John D. Allen	46	Municipal Government Street & Sewer Maintenance Man	Heart attack while attempting to clear a blocked sewer pipe in a trench.
Unknown	Oakite Products, Inc.	Raymond L. Hansen	46	Chemical Products Wholesale Salesman	Automobile accident.

Fatal Injuries Reported (Continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
September 1970:					
Adams County	N.E. Isaacson and Assoc., Inc.	John R. Bielanski	32	Lake developer Diver	Drowned.
Belleville	Endres Mfg. Company	Ronald Endres	19	Machine Shop Factory laborer	Electrocuted when cable on boom truck came in contact with electric wire.
Dane County	Funk Bros. Seed Company	Vernon L. Yelk	37	Hybrid Seed Corn Laborer	Traffic accident - fell asleep at wheel.
Green Bay	Bayside Erecting, Inc.	Michael C. Salscheider	44	Steel and Concrete Erection Structural Iron Worker	Fell off wall while he was putting bridging in place.
Lincoln County	Murray Machinery, Inc.	Hilbert Fricke	61	Industrial Machinery Traveling Salesman	Head - on collision.
Madison	University of Wisconsin	Robert E. Fassnacht	33	Physics Dept. Project Associate	Crushed - bombing of University building.
Menomonee Falls	Falls Publishing Co., Inc.	Anthony O'Leske	70	Newspaper Printing Delivery man	Automobile accident.
Pewaukee	E. Gibes Distributing Company, Inc.	Robert E. Hartling	25	Wholesale Distributor Truck Driver	Traffic accident.
Waukesha County	Lifetime Construction Co., Inc.	Norman E. Walters	42	Concrete Construction Operating Engineer	Train-truck collision.
October 1970:					
Badger Army Ammo Plant	Olin Corporation	Victor R. Schommer, Jr.	31	Manufacturer of Explosives Carpenter	A steam relief stack sprayed him with steam.
Fond du Lac County	Monroe, Div. of Litton Ind.	Darrel R. Daoust	45	Commercial Machines Sales and Service Wholesale Salesman	Traffic accident.
Greendale	Kinetic Tool Co., Inc.	C. L. Masters	60	Mfg. of Slitting Knives Corporate Officer	Blacked out, fell backwards and struck his head.
State of Illinois	Edward Kraemer & Sons, Inc.	Wilbur H. Richards	50	Highway and Bridge Construction Carpenter	Pile hammer became disengaged from the catch and fell hitting him with a glancing blow, struck his left arm and severed it from his body.
Kewaunee	Klug & Smith Co.	Richard E. Grumann	53	General Contractor Carpenter	Working on top of scaffold tower and as the crane cable was going up, it hooked the scaffold and tipped it over.

Fatal Injuries Reported (Continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Kewaunee County	Boulanger Construction Co., Inc.	Norbert F. Detampel	42	Road Construction Construction Laborer	Loading crawler tractor on flat bed when tractor tipped landing on top of employee.
Lac du Flambeau	Wisconsin Public Service Corporation	Russell Aiken	26	Public Utility Lineman	Electrocuted - boom on truck made contact with 14,400 volt load.
Marathon County	Quality Machine Sales, Inc.	David V. Dobeck	21	New and Used Machinery Mechanic	While working under cab of a semi-tractor; it rolled over him.
Milwaukee	Boynton Cab Company	Claud Carroll	47	Taxicab and Limousine Service Taxi Cab Driver	Driver was shot to death.
	Lakeside Oil Co., Inc.	Clyde M. Steeves	52	Petroleum Products Truck Driver	Clothing caught on fire in cab of truck.
Pelican Lake	Riverside Marine Dist., Inc.	Fred V. Gates, Jr.	35	Marine & Snowmobile Sales & Service Corporate Officer	Traffic accident - truck left the highway.
Shawano County	Marion Joint School District	Fred Riege	58	School Janitor	Auto accident.
Wausau	L. H. Hall Motor Company	Alfred W. Pecha	41	New and Used Car Sales Serviceman	Collapsed on floor with convulsions.
State of Wyoming	Pirkle Refrigerated Freight Lines, Inc.	Alvin H. Lingo	38	Transportation Truck Driver	Truck collided with another automobile causing truck to tip over.
Appleton	Appleton Coated Paper Company	Darnell W. Tellock	23	Paper Converters Truck Operator	Driving truck through door. Standing and apparently had head above and in front of overhead guard. Only 1' clearance between guard and door frame.
November 1970:					
Brookfield	S & K Pump Company, Inc.	Clarence A. Hoeft	44	Installation and Servicing of Water Systems Pumpman	Electrocuted - while erecting hydraulically operated truck, mounted hoist boom came in contact with 5000 volt transmission line.
Mequon	National Electric Service, Inc.	Robert C. Vahl	25	Electrical Contractor Electrician Apprentice	Fell from pole 30 feet to the ground.
Milwaukee	Merchants Police Inc.	Albert J. Read	45	Property Protection Policeman (Merchant)	Shot while sitting in patrol car.
	City of Milwaukee	Alan Sroczynski	27	Municipality Policeman	Traffic accident - crushed beneath vehicle.
Mt. Pleasant	Racine Private Police, Inc.	Charles J. Stege	58	Security Security Officer	Weapon discharged while handing it to another employee.

Fatal Injuries Reported (Continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Wauwatosa	Craftsmen Painting Service	Robert S. Weber	29	Painting Contractor Painter	Fell from tower.
Whitehall	Independence Ready Mix Inc.	Dallas B. Dascher	29	Ready Mix Concrete Truck Driver	Heart attack - unloading ready mix at the time.
Wood County	Wood County Hwy. Dept.	Fridolin C. Peters	53	Government Oiler	Pulled into conveyor of crusher.
December 1970:					
Cameron	Health & Social Services Dept.	Thomas P. Brunstad	29	Vocational Rehabilitation Teacher	Automobile collided with truck.
Dodge County	City Products Corp.	C. V. Schroeder	30	General Merchandise Distributor Route Salesman	Automobile collision.
Marathon County	Marathon County Highway Department	Ervin B. Wisnewski	35	Highway Maintenance Equipment Operator	Pinned under tractor when it slid off trailer and tipped over on him.
Clark County	Clark County	Joseph T. Pietrek, Jr.	35	Municipality County Agent	Automobile collision.
Milwaukee	Doctors Hospital	Felix R. Stawicki	52	Hospital Maintenance Man	Found in truck - details unknown.
	Milwaukee County	Michael Haley	23	Institutions-Fire and Police Dept. Ambulance Driver	Fell from ambulance.
	Sentry Insurance	Charles P. Clark	58	Insurance Claim Adjuster	Automobile accident.
Odanah	Ashland County	Walter F. Gaik	57	Municipality Sheriff's Deputy	Shot by unknown assailant.
Washington County	Helgesen Harvestore Inc.	James J. Strupp	18	Sales and Erection of Harvestore Silos Tester	Overcome by silo gas.
Waukesha	Spring City Flying Service Inc.	Raphael J. Crowley	57	Flying Instruction Teacher	Plane crash.
Waukesha County	U Profit Corporation	Daniel M. Moen	43	Car Wash Machine Sales Sales Manager	Plane crash.
Wausau	Aid Association for Lutherans	Stanley M. Wasilewski	32	Life and Health Insurance Insurance Salesman	Fell and struck his head.

Fatal Injuries Reported To Department of Industry, Labor and Human Relations

January 1971

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Badger Army Ammo Plant	Olin Corporation	Richard D. Hardy	31	Manufacture of Explosives Drier Operator	Fire - explosion.
Dane County	General Cigar Co. Inc.	Richard K. Bean	33	Wholesale Distribution of Tobacco Products Wholesale Salesman	Pedestrian struck by automobile.
Fond du Lac	Fred Rueping Leather Co.	Ralph E. Diederichs	37	Tannery Mixer	Buried in salt bin.
Milwaukee	A. O. Smith Corporation	Carlo Giano	38	Manufacture Motor Vehicle Parts Electrician	Electrocuted.
State Of South Dakota	Kenwood Homes Inc.	Richard L. Jones	34	Manufacturer of Mobile Homes Corporate Officer	Airplane crash.
Spencer	McNeely Construction Inc.	Keith McNeely	45	General Contractor Corporate Officer	Endloader - train collision.
Vernon County	Stuber Floor Covering Shop	Leo J. Soffa	66	House Furnishings Installations Carpet & Resilient Floor Layer	Heart attack.
February 1971:					
Badger Army Ammo Plant	Olin Corporation	Leo G. Turner	58	Manufacture explosives Factory Laborer	Struck by large piece of coal which broke loose from stack.
Eau Claire	American Cyanamid Company	Roger W. Frank	37	Wholesale Distribution of Drugs, Chemicals and Allied Products Wholesale Salesman	No details given.
Iron County	Wisconsin Telephone Company	Robert C. Boyle	47	Communication Civil Engineer	Collision with oncoming car.
Madison	Dan Rolfsmeyer Corporation	Daniel E. Rolfsmeyer	58	Laboratory Animals Corporate Officer	Stroke-unloading heavy cartons.
Menomonee Falls	E V S Chrysler Plymouth Inc.	David Dornblaser	33	New & Used Car Dealer Auto Salesman	Heart attack while shoveling snow.
Milwaukee	City of Milwaukee	Ralph E. Helminiak	24	Municipality Fireman	Fighting fire - asphyxiated.

WISCONSIN WORK INJURY TRENDS

IN MEMORIAM

This report is dedicated to the late Mrs. Jeanne J. Prendergast, who was called to her eternal reward on April 24, 1970 after a lingering illness.

Jeanne was born July 5, 1919 and grew up in La Crosse, Wisconsin, and graduated from the University of Wisconsin in 1941. She is survived by her husband Charles, one son and three grandchildren. She is greatly missed by her family, her co-workers, and everyone else who has known her -- and especially here in the Department of Industry, Labor and Human Relations.

Jeanne was Deputy Administrator of the Statistical Division for many years.

She was an outstanding employee who took pride in her status as a State of Wisconsin employee -- the State flag which hung over her casket attested to this.

Jeanne worked while she suffered with nary a whimper; her work-a-day extended far beyond the eight hour day.

Jeanne was also a two term president and active member of WSEA Local Union #145.

The records of the Statistical Division whisper of her gifted expertise in writing speeches and analysis and in preparing accurate and meaningful reports with a modicum of effort and time.

P.O. BOX 2209
310 PRICE PLACE
MADISON, WISCONSIN 53701

To: Readers of this Report

In behalf of my associate Commissioners, J. R. Kautzer and Stanley York, and myself, I would like to thank the many Wisconsin employers, insurance carriers, employees, and others who provide us with basic work injury and related data, some of which are included in this report.

These data provide us and many others with the answers and decision-making tools and performance indicators we need to carry out our responsibilities in today's and tomorrow's complex industry, labor and human relations environment.

I would also like to commend the many establishments who have excellent safety records, and those who are working towards that goal. Special mention should be made of the fact that members of the Wisconsin Council of Safety, as a group have again in 1969 had a better injury frequency record than nonmembers, as a group.

On the surface, data in this report may appear dry and useless. However, quite the opposite, if they could speak they would talk of life and death, health and sickness, income and outgo, claims handling and rehabilitative training, dependent spouses and children, safety violations, additionally needed preventive safety measures, costs of accidents and exposures producing these injuries and diseases, time lost from work, damaged equipment, litigation, promptness of reports and payments, insurance rates, etc. Properly evaluated and analyzed, they are as interesting as life itself.

From this report I note that an all time high of 35,353 compensable cases were settled in 1969 (employment levels have also risen) -- 6,832 (almost 1 of every 5) were back injuries -- 5,123 of the back injuries arose from sprains and strains. In 1938, back injuries accounted for 7.7% of the total indemnity and medical aid paid in all compensable work injury cases -- in 1969, back injuries accounted for 19.5% of these payments. This trend suggests that both employers and employees have a lot to learn about proper lifting.

Is there a way to minimize the number of accidents and injuries that may occur to women? Do women require some extra considerations that men do not especially require? Is the social cost of an accident greater for married women than for men? Does the presence of women in industry in increasing numbers imply a radical change in safety programs? Page 13 of this report shows that females suffered 12.5% of the injury cases reported in 1959, and 18.2% of those reported in 1969.

In the early 1960's, our Department triggered considerable safety effort in logging and lumbering; effective August 1, 1961 the manual premium rate for logging and lumbering was $17.73 per $100 of payroll -- effective March 1, 1970 it was down to $6.43. These premium rate reductions indicate that much has been achieved in this industry. (However, the injury frequency rate for 1969 is 83.0.)

We too miss our Jeanne Prendergast, who so generously gave of her time and talents in providing us with the basic information we have used and needed over these many years before she passed away.

Sincerely,

E. E. Estkowski

E. E. Estkowski
Chairman

PART I

TRENDS IN DISABLING INJURY RATES
(Data were collected in cooperation with the Bureau of Labor Statistics, U. S. Department of Labor; for technical notes see page 7.)

Nonfarm-nonfederal standard injury frequency rates rose from 15.1 in 1967 to 15.4 in 1968 to 16.4 in 1969; this means between 16 and 17 Wisconsin employees suffered a disabling injury for every million man hours worked in 1969 as compared with between 15 and 16 for each 1,000,000 man hours during the previous two years.

26 major industry groups experienced higher rates in 1969 than the 16.4 average. The top 13 are shown on page 2.

The rate of disabling work injuries in manufacturing industries in 1969 rose to the highest level since 1960, the first year for which such data were compiled.

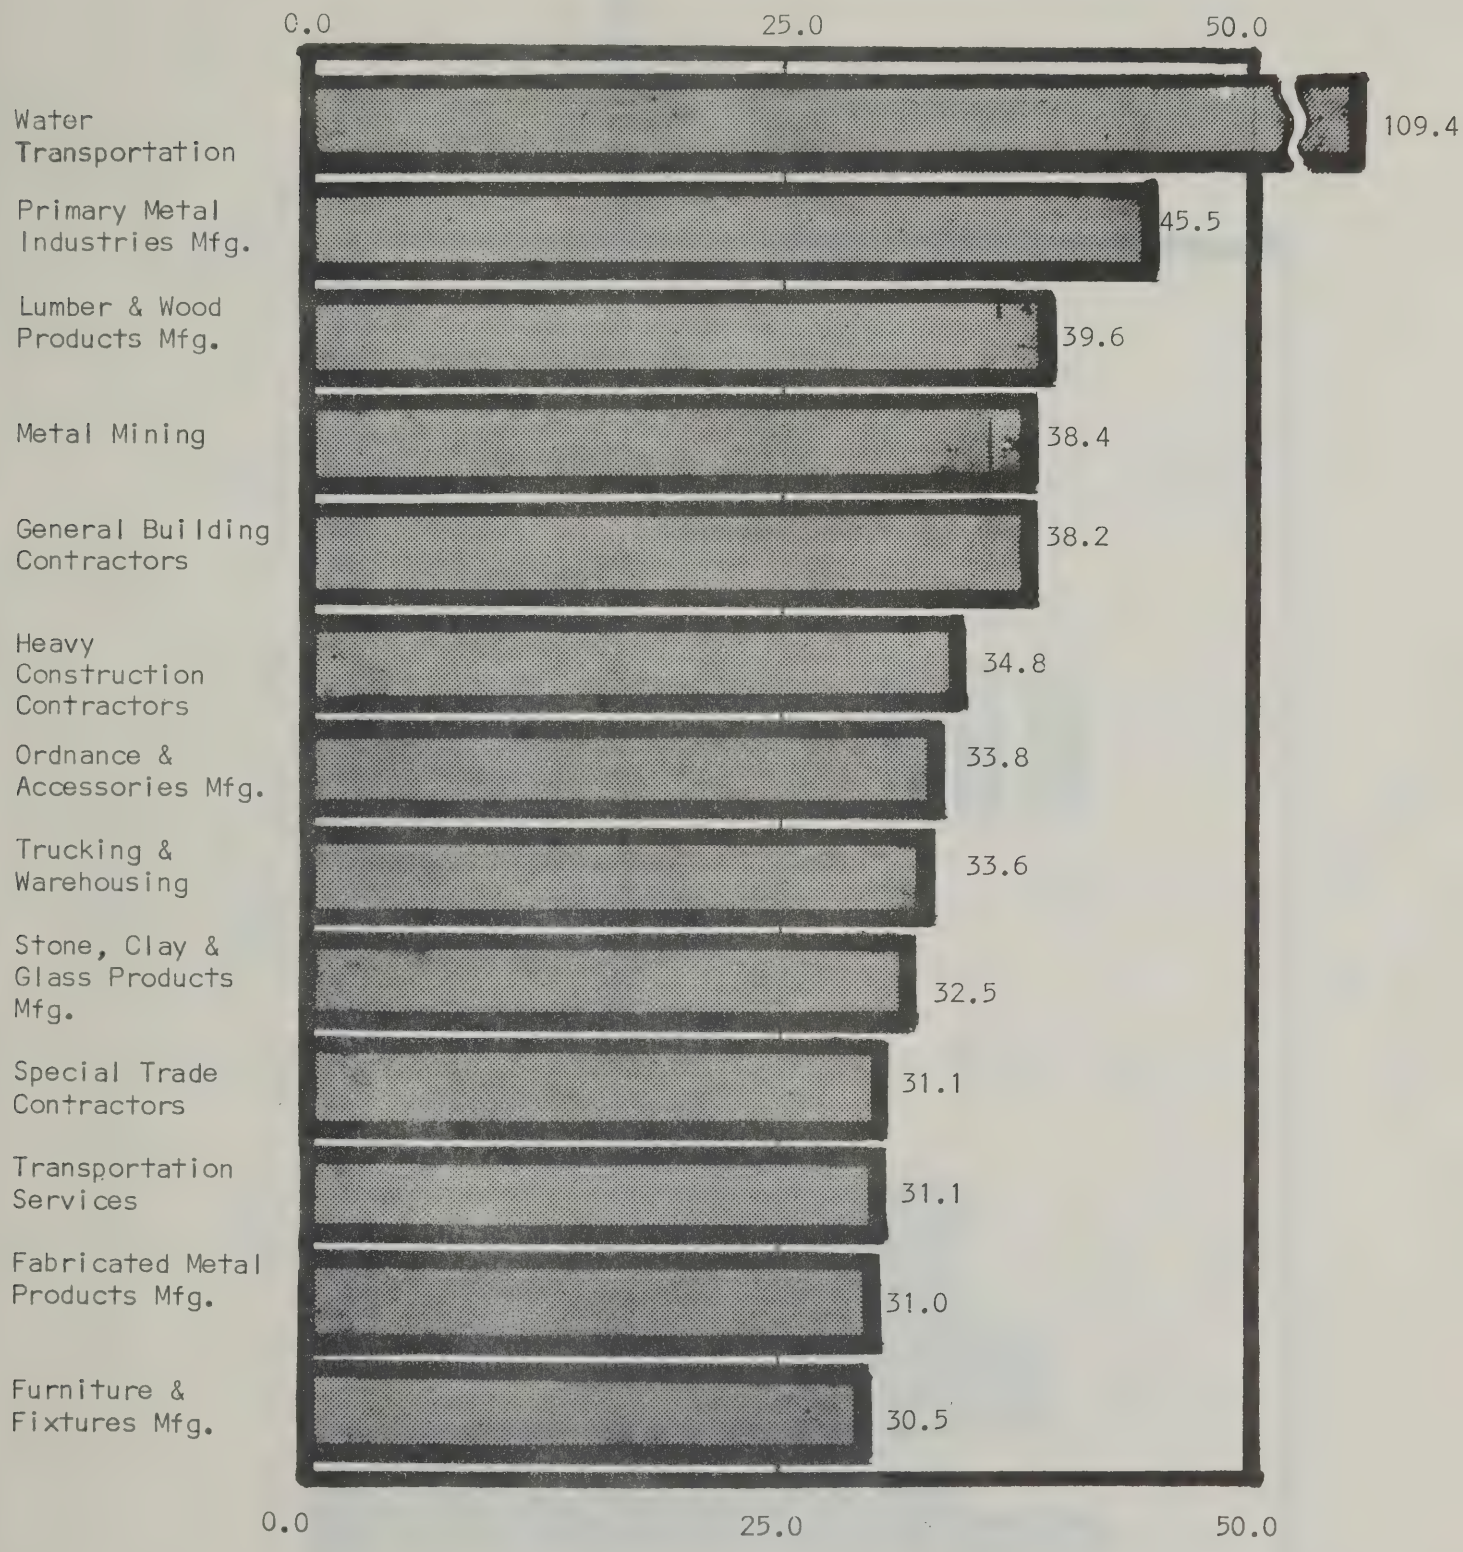
1960.....	14.4	1965.....	17.6
1961.....	14.2	1966.....	19.3
1962.....	15.0	1967.....	19.1
1963.....	15.2	1968.....	18.2
1964.....	16.5	1969.....	20.9

On the other hand, the injury frequency rate for contract construction dropped to an all time low in 1969, since we first started compiling contract construction rates in 1961.

1960.....	N.A.	1965.....	37.8
1961.....	39.3	1966.....	38.0
1962.....	36.5	1967.....	36.7
1963.....	35.6	1968.....	37.2
1964.....	38.3	1969.....	33.8

1969 Employment estimates for the 13 major industry groups arrayed on page 2, are: Water transportation 2,300; Primary Metal industries mfg. 31,000; Lumber and wood products mfg. 16,800; Metal mining 300; General building contractors 20,300; Heavy construction contractors 11,600; Ordnance and accessories mfg. 5,400; Trucking and warehousing 23,200; Stone, clay and glass products mfg. 8,000; Special trade contractors 35,100; Transportation services 900; Fabricated metal products mfg. 43,800; and Furniture and fixtures 8,400.

13 Major Industry Groups Showing Highest Injury Frequency Rates in 1969



See Table 56.1 on pages 5, 6 and 7.

R/ Revised.

B/ Data were ommited where information was insufficient to warrant their presentation.

Technical Notes

Wisconsin Disabling Work Injury Rates

Injury rate data were compiled by the Statistical Division of the State of Wisconsin Department of Industry, Labor and Human Relations, from data collected in its annual survey of injury rates. Source: Work Injuries Cooperative Survey, B. L. S. Form 1418, sent to employers in all types of Wisconsin industries. This survey was made in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

Reporting under this program is voluntary. The report form furnishes both the DILHR and the U. S. Department of Labor with the information needed to compile their respective summaries.

All injury rate data were compiled according to the provisions of the U. S. A. Standard Method of Recording and Measuring Work Injury Experience, Z16.1, approved by the United States of America Standards Institute, December 27, 1967. The methods outlined in this standard for classifying work injuries are independent of workmen's compensation laws and rulings of workmen's compensation agencies.

The injury frequency rate is the average number of disabling injuries for each 1,000,000 employee-hours worked. The injury severity rate is the average number of days charged or lost, as a result of disabling work injuries, for each 1,000,000 employee-hours worked. The average days charged or lost per disabling injury is the total days charged or lost divided by the total number of disabling injuries.

A disabling work injury is any injury occurring in the course of and arising out of employment, which (a) results in death or any degree of permanent physical impairment, or (b) makes the injured worker unable to perform the duties of any regularly established job which is open and available to him throughout the hours corresponding to his regular shift on any one or more days after the day of injury, (including Sundays, days off, or plant shutdown). The term "injury" includes occupational disease.

Injury rates for major industry groups are weighted averages. The weights were based on the relation between the employment reported and the estimated total employment.

Our minimum requirements for publishing injury rate data: 3 reporting units and 500,000 employee-hours of exposure. The required minimum for national rates, published by the U. S. Department of Labor: 3 reporting units and 1,000,000 employee-hours of exposure.

(continued on page 12)

Technical notes (continued from page 7)

Definition of a reporting unit: an employer whose report on all Wisconsin operations was included in the compilation of data for this report. Exception: Employers who reported separately for their establishments or plants or subdivisions thereof, in which cases such units were each counted as a reporting unit.

The experience of all classes of employees--production and related workers, force-account construction workers, sales, service, technical, professional, office, administrative and all other personnel--is included in the computation of injury rates. Self-employed persons, however, are not included.

Industry Classifications conform to the definitions of the 1967 edition of the Standard Industrial Classification Manual, prepared by the Office of Statistical Standards of the U. S. Bureau of the Budget. Certain exceptions to the classification of multi-unit establishments for employment statistics purposes were made necessary because certain employers kept their accident records by different units than their employment records.

Injury rates compiled in accordance with the Z16.1 standard allow comparisons within identical industries; with other industries; with other employers; by size of employer; by location of establishment; between states; with national summaries; with the experience of employers affiliated with various safety councils, trade associations, etc.

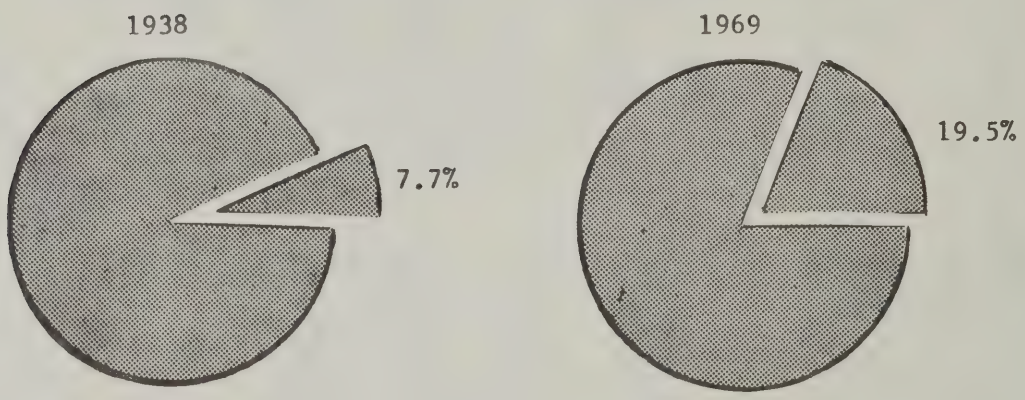
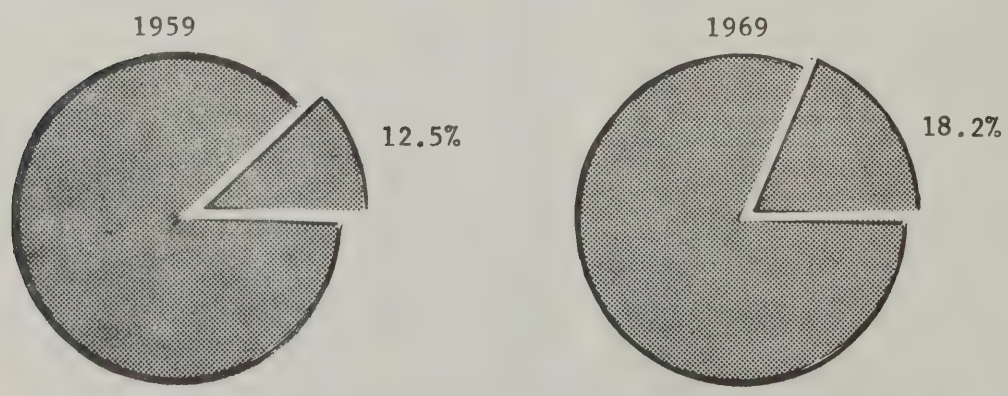
(Workmen's Compensation Data)

PERCENT OF INDEMNITY AND MEDICAL AID PAID IN ALL COMPENSABLE WORK INJURY CASES ACCOUNTED FOR BY BACK INJURIES



PERCENT OF REPORTED INJURY CASES INCURRED BY WOMEN



PART II

TRENDS IN INJURY CASES COVERED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN
(See explanations for workmen's compensation cases on page 16.)

Reported Cases

19,520 injury cases were reported during the first six months of 1970 as compared with 20,050 reported during the same period in 1969.

Taking into account the higher employment levels for the first half of 1970, the number of injury cases reported for each 10,000 workers dropped 4.4%.

A few comparisons on reported cases follow:

	Calendar Year		First 6 Months	
	1968	1969	1969	1970
1. Total no. reported	38,515	40,666	20,050	19,520
2. How they happened (accident type):				
a. Struck by (nontraffic)	7,871	8,348	3,993	4,037

1/ The figures in this column cover medical costs in both fee cases and contract cases. The estimated medical cost of contract cases was computed by multiplying the number of contract cases by the average medical cost per case in fee cases.

EXPLANATIONS FOR WORKMEN'S COMPENSATION CASES

Under the Workmen's Compensation Act of Wisconsin, a covered employer must make a report of injury directly to the Department of Industry, Labor and Human Relations on the fourth day after employee leaves work if disability still continues. In death cases, a report is made within twenty-four hours. In case of permanent disability, or where more than three days of temporary disability is certain to result, a report is made at once. Therefore, Workmen's Compensation data included in this report with the exception of Table 190.1 do not reflect the many medical aid, one, two and three days lost time cases.

The law was amended March 1, 1968 to abolish the so-called numerical exclusions. Until then, employers of three or more employes were covered. Effective July 1, 1968 an employer who usually did not employ three employes but who had a quarterly payroll in Wisconsin of $500 or more became a subject employer. He was required to provide coverage January 1, 1969. Thereafter any employer having a $500 Wisconsin quarterly payroll became subject January 1 of the next calendar year.

The law covered only accidental injuries until 1919, when occupational diseases were included. Coverage continued to be voluntary or elective until 1931, when it became compulsory for employers who usually employed three or more employes (except farmers). In that same year the waiting period was reduced from seven to three days. Effective January 1, 1962, farmers having six or more employes on any twenty different days of a calendar year became subject and must obtain workmen's compensation insurance.

Compensable cases = all cases, except compromise cases, in which indemnity (workmen's compensation) is due and payable. With the exception of Table 190.1, all tables in this report show data for compensable cases initially settled in given year.

Compromise cases = all cases in which a compromise of liability under the Workmen's Compensation Act of Wisconsin is made by the employer and the employee. All compromises may be reviewed, set aside, modified or confirmed by the Wisconsin Department of Industry, Labor and Human Relations upon application of either party within one year from the date of compromise. The amount of the compromise settlement includes both indemnity and medical aid.

Noncompensable cases = cases in which no indemnity (workmen's compensation) is due or payable. Examples: no temporary disability beyond 3 days; statute of limitations bars claim; injury was either not in course of or not due to employment; claim not prosecuted by claimant; etc.

Reopened cases = cases which were settled or disposed of in prior years but were reopened because additional or lesser benefits were due. From the Foreword, Workmen's Compensation Twenty-Ninth Report: "It is the Commission's policy not to approve final settlements in cases in which no contest arises. When the Commission determines that proper benefits have been paid, the case is placed on file. If later it is discovered that additional benefits are due, the matter is reactivated and the employer or insurance carrier is required to make additional payment. Cases so handled may be reopened within six years from the date of last payment of compensation, and further benefits ordered on proper showing." Contested cases may also be reopened.

Healing period = actual time lost from work, due to work injury or occupational disease, counting 6 days to the week.

Compensable time = number of days for which indemnity (workmen's compensation) is due and payable under the Workmen's Compensation Act of Wisconsin, counting 6 days to the week.

Total benefits include indemnity and medical aid; medical aid includes estimated costs in contract cases. Excluded are: payments for funeral expenses, payments to or from the Second Injuries Fund and the Children's Additional Death Benefit Fund, payments for maintenance during rehabilitation training periods, the cost of artificial members furnished, payments in compromise cases, additional payments in reopened cases, and the amount of medical aid payments where the injury did not cause disability beyond the waiting period of three days.

Data for 1961 through 1969 are not strictly comparable with data for former years, so far as nature of injury
(continued on page 28)

Table 1.31 Supplement

Summary Of Total Compensable Workmen's Compensation Cases Settled In Years 1929 - 1969

A/ Earlier data not available.

Note: This type of injury was formerly called "slipt disc", and refers to injuries to the intervertebral discs. Before 1943, such injuries were probably included, for statistical purposes, under dislocations and strains.

(continued from page 16)

and part of body classifications are concerned. Because of increasing requests for specialized information, our nature of injury classification was greatly expanded in 1961. The part of body classification was modified to follow the concepts of Z16.2 (American Standard Method of Recording Basic Facts Relating to the Nature and Occurrence of Work Injuries).

The major changes in the nature of injury classification concern the group related to sprains and strains, all of which were formerly classified as sprains or strains. The group has been broken down to the following individual classifications: sprains or strains; rupture, except hernia; ruptured blood vessel; rupture of previous incision; muscle spasm; pinched nerve; disc protrusion; separation of bone, cartilage, ligament, muscle tendon; torn cartilage, ligament, tendon, muscle; torticollis; and whiplash injury. Although not all of them are at all times synonymous with sprains or strains (some may result from being struck by something, for example), the above gives some idea of the changes and additions we have made. As used in our coding, disc protrusions include the old classification of "slipt disc", herniated discs, etc. -- in fact, any injury to the intervertebral discs. All of our nature of injury and part of body classifications are based on the definitions in "Stedman's Medical Dictionary", Twentieth Edition.

A/ Figures given in this Table are subject to various qualifying provisions of the law.

B/ See footnote 33 on page 30 of the 1931 Printing Of The Law.

C/ To be taken at $35.00 per week for the first 78 weeks of disability, and at $30.00 per week thereafter.

D/ In conformity with footnote C/ above, this figure is $24.50 per week for the first 78 weeks of disability, and $21.00 per week thereafter.

E/ Minimum weekly indemnity rates have not been changed by any subsequent revisions of the law.

1/ Represents maximum amount of weekly death benefit payable to spouse.

P.T.D. = Permanent total disability; P.P.D. = Permanent partial disability; Temp. D. = Temporary disability.

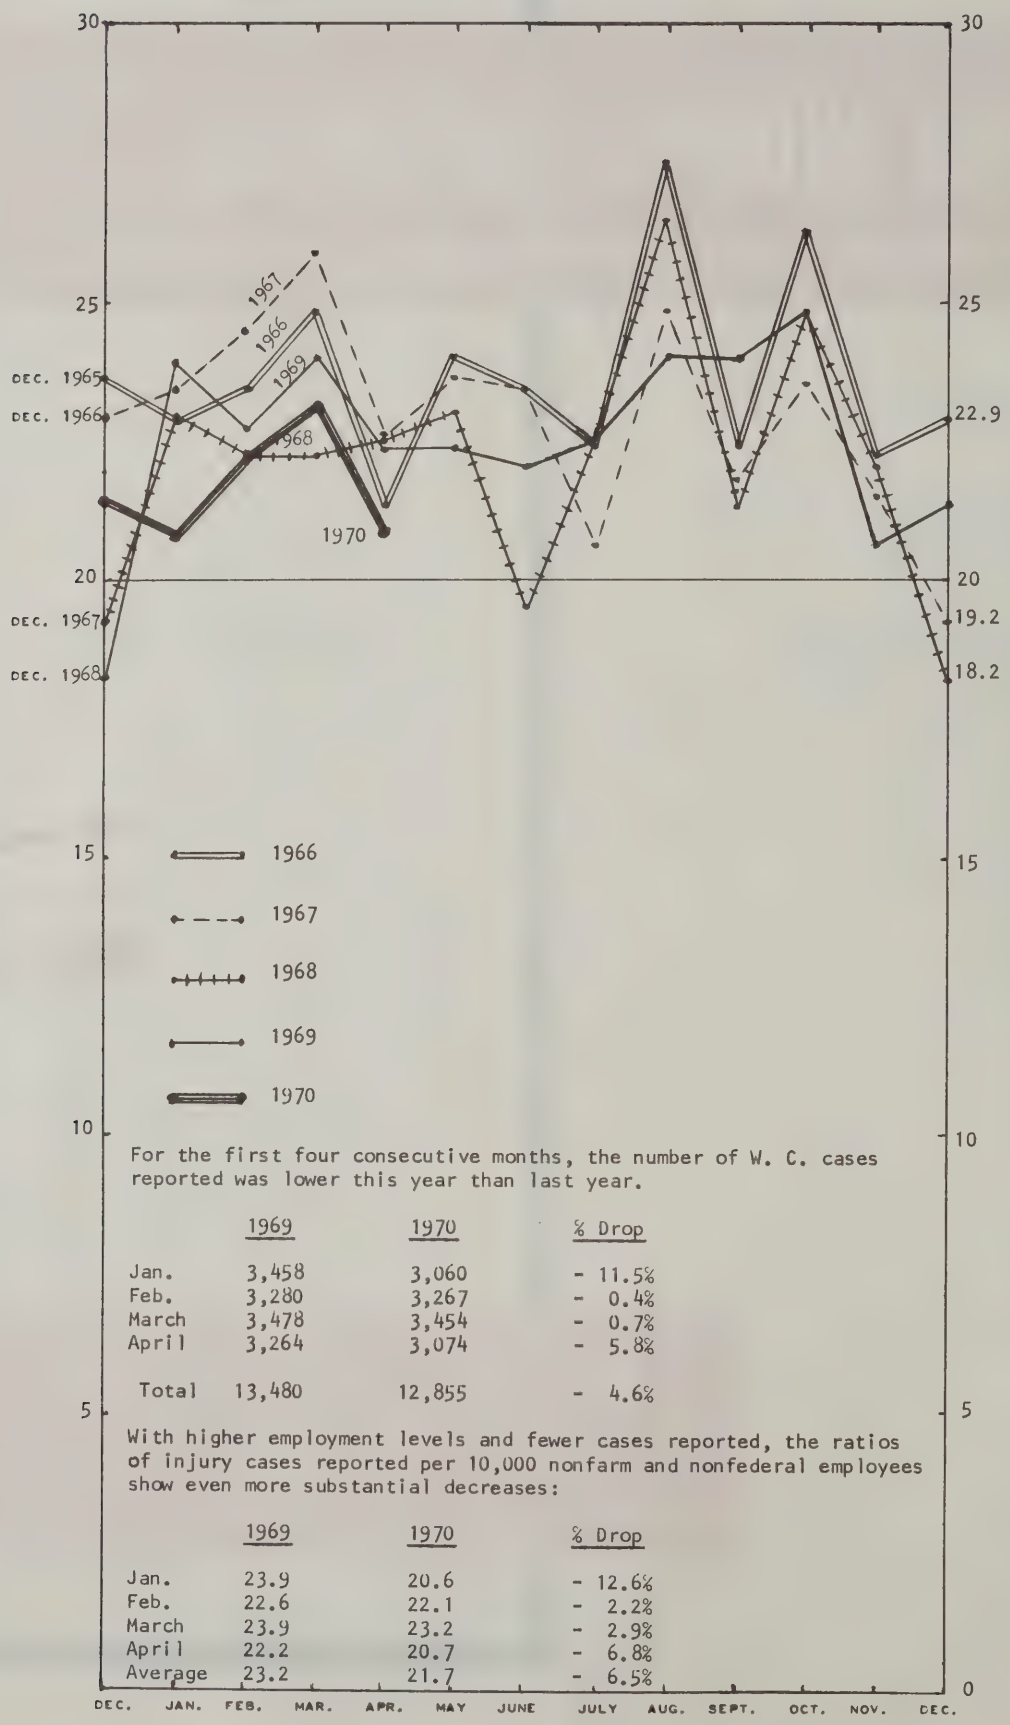
State of Wisconsin
Department of
INDUSTRY, LABOR and HUMAN RELATIONS
STATISTICAL DIVISION

Hill Farms State Office Building/Madison

No. of Injury Cases Reported Per Month Per 10,000 Nonfarm and Nonfederal Employees

December 1965 To Date (Source: Table 3001)



For the first four consecutive months, the number of W. C. cases reported was lower this year than last year.

	1969	1970	% Drop
Jan.	3,458	3,060	- 11.5%
Feb.	3,280	3,267	- 0.4%
March	3,478	3,454	- 0.7%
April	3,264	3,074	- 5.8%
Total	13,480	12,855	- 4.6%

With higher employment levels and fewer cases reported, the ratios of injury cases reported per 10,000 nonfarm and nonfederal employees show even more substantial decreases:

	1969	1970	% Drop
Jan.	23.9	20.6	- 12.6%
Feb.	22.6	22.1	- 2.2%
March	23.9	23.2	- 2.9%
April	22.2	20.7	- 6.8%
Average	23.2	21.7	- 6.5%

Apprentices.....	206	191
Unskilled.....	10,489	11,166
Not Reported.....	67	45

1/ In accordance with the classification system of the Dictionary Of Occupational Titles, 1949 (U. S. Department Of Labor).

Note: In the various tables where alphabetical letters are in parentheses after a number, the letter tells how many fatal cases were included in the number of cases for a given category. For example, (A) denotes 1 fatal case, (B) denotes 2 fatal cases, etc.

NEC = Not Elsewhere Classified.

All Other Reported.....	5,791	7,564	41	40
Not Reported.....	3,526	3,815	6	5

Table 2004.94A

Work Injuries Reported In 1968 And 1969
Classified By Part Of Body Affected

Part Of Body	Total		Fatal	
	1968	1969	1968	1969
Total.....	38,515	40,666	159	136
Trunk.....	11,092	11,610	4	10
Leg, Legs.....	6,123	6,459	1	-
Finger, Fingers.....	5,979	6,204	-	-
Arm, Arms.....	3,490	3,665	-	1
Multiple Or Body System.....	2,598	3,012	124	94
Foot, Feet.....	2,347	2,517	-	1
Hand, Hands.....	2,200	2,411	-	-
Head, Face, Neck.....	1,843	1,847	27	22
Toe, Toes.....	1,325	1,418	-	-
Eye, Eyes.....	855	873	-	-
Not Reported.....	663	650	3	8

Note: Included in the injuries to the Trunk in 1968 were 7,066 Back Injuries (including the Back, Vertebrae, Intervertebral Discs, Sacrum and Coccyx); 4,844 of the Back Injuries were due to Sprains or Strains.

Table 2030.33A

Work Injuries Reported In 1968 And 1969
Classified By Accident Type

Accident Type	Total		Fatal	
	1968	1969	1968	1969
Total.....	38,515	40,666	159	136
Struck By (Nontraffic).....	7,871	8,348	9	12
Overexertion.....	7,046	7,260	4	4
Falls.....	6,221	6,960	26	14
Struck Against.....	4,494	4,355	-	-
Caught In, On, Under, Between.....	4,172	4,519	12	21
Bodily Reaction.....	2,136	2,349	4	3
Traffic Accidents.....	1,054	1,089	56	33
Nontraffic Vehicle Accidents, Nec.....	1,046	1,141	15	12
Contact With Temperature Extremes, Nec..	860	926	2	4
Contact With Radiations And Caustics; Toxic And Noxious Substances.....	825	810	2	6
All Other Reported.....	1,099	1,253	22	22
Not Reported.....	1,691	1,656	7	5

Table 2031.33A

Work Injuries Reported In 1968 And 1969
Classified By Source Of Injury

Source Of Injury	Total		Fatal	
	1968	1969	1968	1969
Total.....	38,515	40,666	159	136
Working Surfaces.....	5,272	6,056	24	17

Amputations, although comparatively few in number, constitute one of the costliest work injuries. In the compensable cases settled in 1967, amputations cost almost 2 million dollars in indemnity (workmen's compensation) and medical aid.

One of the 523 amputation cases reported in 1968 proved fatal. This was a case of decapitation - this case was included with amputations because it was more closely related to that nature of injury than to any other.

In 6 cases, an arm was amputated - 2 involved part of the upper arm, 4 involved part of the forearm. Three workers suffered amputation of the hand.

In 489 cases, fingers or thumbs - or parts thereof - were amputated: 1 finger, 402; more than 1 finger (unspecified), 3; 2 fingers, 39; 3 fingers, 27; thumb and 2 or more fingers, 3; 4 fingers, 11; 4 fingers and thumb, 1; 5 or more fingers, 2; more than 1 metacarpal, 1. (The thumb is included in the finger categories above).

In 3 cases, part of the leg was amputated. In 1 case, a foot was amputated.

Toe amputations: 1 toe, 15; 2 toes, 2; 3 toes, 2; and 4 toes, 1.

Fatal Injuries Reported to Department of Industry, Labor and Human Relations

October 1969 Through May 1970

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
October 1969:					
Algoma	City of Algoma	Ronald E. Leist	30	Municipality Police Officer	Two fisherman were swept from the breakwater by strong waves. Employee went to their rescue drowning in the attempt.
Barron County	Loren Wiesner	Edward Widiker	33	Road Construction Operating Engineer	Employee had parked lowboy carrying bulldozer on roadway and was attempting to unload the bulldozer. The roadway gave way throwing employee and the cat slid on top of him.
Cedarburg	Meta-Mold Aluminum Company	Jorge D. Garcia	25	Foundry Caster	Employee moved out of his position and was caught between permanent mold dies and aluminum melting furnace. The Switch at the Station where employee normally works is to be shut off when they leave their position.
Chippewa County	State. St. Methodist Church	Linda Rakow	21	Church Volunteer Religious Worker	Car accident.
Columbia County	Madison Transit Co., Inc.	Thomas B. Nichols	22	Trucking Mail & Newspapers Truck Driver	Auto accident.
Fond du Lac County	Pieper Electric Inc.	Edward E. Horton	22	Electrical Contracting Lineman Trainee	Boom on line truck hit primary wire.
Green Bay	Norman F. Thiex, Inc.	Norman F. Thiex	69	Outdoor Advertising President	Employee fell 5 stories when cable clamp broke on swingstage.
State of Illinois	Beloit-Passavant Corp.	Robin R. Ruth	23	Mfg. Water & Waterwaste Treatment Equipment Field Technician	Auto accident.
Iowa County	Village of Black Earth	Charles E. Hacker	23	Government Laborer	Employee was in bucket of the electric truck changing transformers, when he came in contact with live wire. Electrocuted.
Madison	Chitwood Sewing Center & Stereo City	Robert G. Hamilton	35	Stereo & Records Store Manager	Auto accident.
State of Missouri	Quality Carriers, Inc.	John F. Behrens	34	Transportation of Liquid & Bulk Commodities Truck Driver	Truck accident.
Mt. Horeb	Buechner Construction & Redi-Mix, Inc.	Ronald Hamilton	21	Masonry & Concrete Construction Laborer	Employee was cleaning out a cement truck when an exploding valve cap struck him in the head.

Fatal Injuries Reported (continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Racine County	Lang Engineering Co., Inc.	Leon Beranek	28	Asphalt Paving Paver Operator	Car went out of control, veering into a parked truck which employee was beside.
Sun Prairie	State of Wisconsin Dept. of Military Affairs	Felipe K. Fernandez	27	Government National Guard	Employee was enroute to Madison for Civil Disturbance duty when truck in which he was riding overturned.
Walworth County	State of Wisconsin Public Service Commission	Richard V. Maves	44	Public Utilities Research Analyst	Auto accident.
Waukesha	Palmer Company, Inc.	LeRoy W. Powell	53	Manufacturing Polish or Dressing Chemist	Employee engaged in mixing toxic materials. Fumes from his job resulted in his illiness.
Wausau	Sheet Metal Contracting Co.	William E. Schlink	35	Sheet Metal Work Sheet Metal Worker	Fell from metal roof deck.
West Allis	Allis-Chalmers Mfg. Co.	Howard Reed	50	Mfg. Farm Machinery & Equipment Fork Lift Operator	Employee was driving a fork lift truck which tipped over.
November 1969:					
Brown County	Fairmont Foods Company	George M. Blaney	37	Dairy Truck Driver	Head on collision.
Dodge County	Heling's Garage, Inc.	Roy A. Braunschweig	54	Farm Implement President	Auto accident.
Fond du Lac County	Holtger Bros., Inc.	John J. Mc Carthy	18	Utility Construction Construction Laborer	Hit a gas main throwing employee off tractor.
Outagamie County	Bruce B. Purdy	Richard C. Scheibe	36	Beef Farming Farm Worker, nec	Employee apparently fell under the wheels of a large tractor.
Shawano County	Lee H. Parker Construction Inc.	Wayne E. Collar	Not Given	Highway Construction Construction Laborer	Auto accident.
South Milwaukee	Bucyrus-Erie Co.	Epifanio P. Alba	44	Mfg. of Heavy Excavating Equipment Shakeout Shifter	Employee's body was found in a sand mulling machine. He might have been dragged into the machine when he attempted to retrieve a testing ladle which he had dropped inside.
Tomah	Tomah Public Schools	Martin Mogensen	47	School District Principal	Shot by a junior high school boy.

Fatal Injuries Reported (continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
December 1969:					
Janesville	Sig Olson Company, Inc.	Gerald C. Rants	58	Retail Floor Covering, etc. Sales & Estimator	Auto-truck accident.
Kenosha County	Paul J. Grunau Company	Alfred C. Jensen	69	Mechanical Contractors & Engineers Construction Laborer	Employee was buried alive in a ditch with backfill.
Keshena	Menominee Community Action Program	Therea F. Webster	29	Anti-poverty Program Recreation Aid	Auto accident.
Marathon County	Anderson Bros. & Johnson Co.	Harold E. Davis	43	Granite Markers & Memorials Quarry Laborer	Fell or slipped from air hoist.
Marathon	County Concrete Corp.	John F. Endres	40	Concrete Blocks & Ready-Mix Truck Driver	Employee was installing rubber chute in cement mixer.
Menasha	Embassy Motor Lodge, Inc.	Frank Frye	63	Motel & Supper Club Desk Clerk	Employee was killed in a hold up.
Milwaukee	Blankstein Enterprises, Inc.	Rovolyn E. Ross	61	Real Estate Manager	Shoveling snow.
	Koch & Bonness, Inc.	Carl G. Brandstrom	39	Public Utilities Contractor Pipelayer	Employee was hooking up a pipe as the crane boom or cable came in contact with powerline. Electrocution.
Monona	Morauske Construction, Inc.	Joseph Morauske	44	Excavating Contractor President	Cave-in.
Sheboygan	Gabe's Construction Company, Inc.	Warren Le Mahieu	40	Underground Contractor Operating Engineer	Involved in an accident with a Front End Loader.
Watertown	Hevi-Duty Electric Co.	Reuben R. Raatz	50	Electrical Equipment Maintenance Man	Shoveling snow.
January 1970:					
Antarctica	State of Wisconsin University of Wisconsin	Thomas E. Berg	36	Government Research Scientist	Helicopter accident.
Beloit	Beloit Corporation	Conrad Brown	51	Mfg. Paper Making Machinery Factory Laborer	Employee found at bottom of pit.
Burnett County	United Parcel Service	Donald A. Zach	22	Delivery Service Deliveryman	Truck accident.

Fatal Injuries Reported (continued)

Month and Place Of Occurrence	Employer	Employee	Age	Industry Occupation	Available Description
Chippewa Falls	Northern Hotel Company, Inc.	Eugene L. Loiselle	43	Hotel and Restaurant Bellman	Jumped from the hotel roof.
Cudahy	Ladish Company	Adolf Rebiger	32	Drop forgings Repairman	While repairing wiper on #32 hammer, injured was standing on top of guard of lift truck when employee fell to the floor.
Dodgeville	St. Joseph's Hospital	Pearl A. Bussan	48	Care of the Sick Credit Manager	Auto accident.
State of Illinois	The Rose Company	Frank Maio	38	Steel Fabrication-Road Machinery Truck Driver	Truck accident.
State of Indiana	Clairmont Transfer Co.	Lloyd E. Isenberg	44	Common Carrier Truck Driver	Truck accident.
Knowlton	Dubay Finer Foods, Inc.	Lawrence J. Koss	52	Canning Vegetables Plant Superintendent	Fell off of lift truck in warehouse.
Ladysmith	Power Excavators of Wis. Inc.	Lorance Kocken	44	Earth Excavating Maintenance Mechanic	Employee was struck by motorcycle.
Milwaukee	A. O. Smith Corporation	Melvin B. Miklautsch	34	Storage Structures Welder	Struck by sliding bars which was being transported by overhead crane.
	Milwaukee County	Theodore Kinski	35	County Government Laborer	Employee was assisting in raising metal light pole. Employee slipped on snow, causing pole to swing into high tension wires.
